Due to the printing process, the colors reproduced in this catalogue are to be considered as approximate only, and may not correspond exactly to the originals.

Debido a la impresión en cuatricromía, los colores en este catálogo pueden variar de los colores originales, y su reproducción es tan solo orientativa.

Introduction

EN The Vallejo Company was established in 1965, in New Jersey, U.S.A. In the first years the company specialized in the manufacture of Film Color, water-based acrylic colors for animated films (cartoons). In 1969 the company moved to Spain; in those years many important cartoon studios were based in Europe. The special qualities and unique formula of Film Color soon became known, and the product was used by most of the important studios on the continent.

In 1972 Amadeo Vallejo developed Acrylic Artist Color, the first acrylic for fine arts manufactured in Spain, and one of the first acrylic colors for artists produced in Europe. In this period, Vallejo also introduced Liquid Watercolor-colors for graphic design.

“The experience and knowledge accumulated in the elaboration of artist colors over the last 55 years is the most valued asset of our company”

Amadeo Vallejo Díez, Founder.

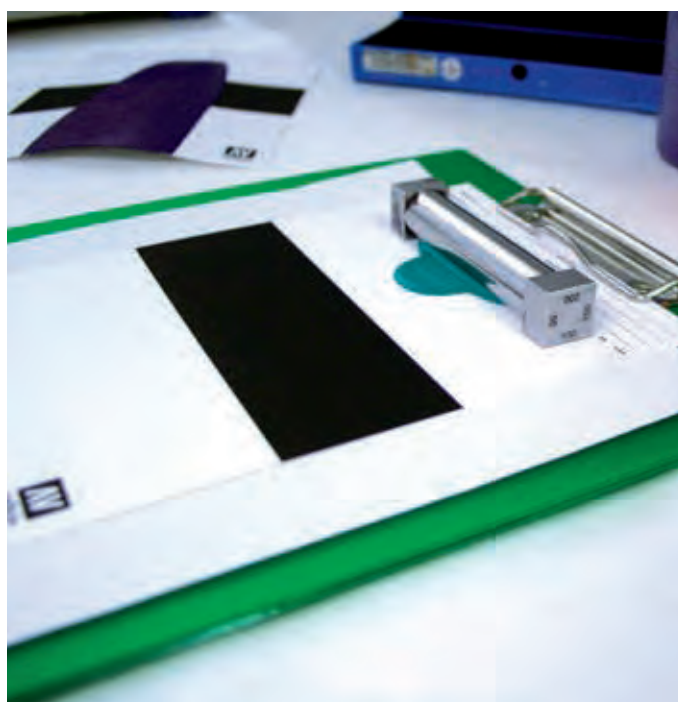

In 1981, following suggestions by professors of the Fine Arts University of Barcelona, Vallejo presented Acrylic Studio, a range of high quality acrylic colors for fine arts in large size packaging, the first such presentation in artist colors worldwide at a reduced and unified price. With this range, a result of the most careful selection of permanent artist pigments, avoiding the most expensive colors, such as cadmiums and cobalts, Vallejo created the line of colors which was to become a benchmark for the industry and the beginning of a new period of expansion for Acrylicos Vallejo.

The growing popularity of water-based acrylic colors became of interest to airbrush artists, until then working with solvent based products. With the help of these artists during the periods of trial and testing, Vallejo formulated the first acrylic colors for airbrushing in 1986. In the following years, the company began developing a range of colors, Model Color, for hobby and model-painters, as well as complete lines of colors and auxiliary products for decorative arts.

Acrylicos Vallejo still is a family company and the Vallejo family continues to supervise the development of new products, supported by a technical department dedicated to investigation and development. The testing of new products and formulations in the chemical industry is a constant process and Vallejo takes pride in the constant aim to improve the quality and presentation of the colors and to continue offering products with exceptional quality to all artists.

Since the beginning in the seventies until today, the company has extended its installations several times, starting in a garage of 30 square meters, then moving to a warehouse, and finally expanding to the actual installations in 5 industrial buildings, divided into raw material storage, manufacturing and stock sections.

At present Acrylicos Vallejo exports to more than 55 countries, and the AV colors comply with all the security and environment regulations in force in the European Common Market and the United States. More information is available in the (SDS) security sheets of our web page or can be requested at info@acrylicosvallejo.com.

Introducción

ES La empresa Vallejo se constituyó en el estado de New Jersey, EE.UU. en otoño de 1965. En los primeros años se especializó en la fabricación de colores acrílicos para dibujos animados. En 1969 la empresa se traslada a Barcelona y continua produciendo la gama de colores Film Color. Las excepcionales características de formulación de esta gama de colores la convierten en imprescindible en los más importantes estudios de animación ubicados en Europa. En 1972 Amadeo Vallejo desarrolla la gama de colores Acrylic Artist's Color, el primer acrílico para bellas artes fabricado en España y uno de los primeros colores acrílicos para artistas producido en Europa. Pocos meses después, se inicia la producción de la gama Acuarela Líquida, colores para diseño e ilustración.

“La experiencia y el conocimiento acumulado en la elaboración de colores para artistas en estos últimos 55 años es el activo más valioso de nuestra empresa”

Amadeo Vallejo Díez, Fundador.

En el año 1981, atendiendo la petición de varios profesores de la Facultad de Bellas Artes de Barcelona, Vallejo desarrolla la gama de colores Acrylic Studio. El objetivo de esta gama de colores es proporcionar a los artistas una gama de colores acrílicos de óptima calidad, con pigmentos seleccionados en función de su máxima permanencia, a un precio único y comercializado en grandes formatos. En aquellos años fue una presentación revolucionaria e innovadora en el ámbito artístico español. Con la presentación de la gama Acrylic Studio se inicia una nueva época de expansión de nuestra empresa y el concepto de ésta gama de colores para artistas se convertirá, décadas después, en una categoría de productos de referencia para la industria.

En el año 1986 presentamos la primera gama de colores acrílicos para aerografía. A principios de la siguiente década formulamos las primeras series de colores específicos para los aficionados al Modelismo y las Artes Decorativas. Nuestra empresa continua siendo de carácter familiar, la familia Vallejo supervisa el desarrollo de nuevos productos con el soporte de nuestro departamento técnico encargado de investigación y desarrollo. Seguimos elaborando nuestros colores en pequeños lotes con la misma filosofía “mejorar las cualidades de nuestros colores para seguir ofreciendo a todos los artistas productos de excepcional calidad”.

Desde los años 70 hasta el presente la empresa ha ampliado sus instalaciones en varias ocasiones, desde el primer garaje de 30 m2 en el cual se elaboraban las primeras partidas de colores hasta nuestras actuales instalaciones que cuentan con más de 3500 m2. Hoy en día, Acrylicos Vallejo es el primer especialista a nivel mundial en colores acrílicos para modelismo ofreciendo a nuestros clientes la más completa selección de gamas de colores y complementos para este sector.

Actualmente los productos Vallejo se exportan a más de 55 países y nuestros colores cumplen con las exigentes normativas de seguridad y medio ambiente vigentes en la Comunidad Europea y Estados Unidos. Para mayor información pueden consultar las hojas de seguridad disponibles en nuestra pagina web o pueden requerir más información a través de nuestra dirección de correo electrónico info@acrylicosvallejo.com.

Model Color

Very highly pigmented permanent colors for models and miniatures, formulated with an acrylic resin, excellent for all surfaces

Colores acrílicos permanentes de muy alta pigmentación, para maquetas, miniaturas y modelismo, aptos para todas las superficies

EN Matt and opaque acrylic colors with high pigment concentration in a water-based formula, especially developed for brush-on application. The Model Color range is very extensive and includes basic shades as well as many references developed by our experts for use on historical figures, as well as the specific colors employed for all types of vehicles, planes and military models. The assortment includes a selection of glazes, transparent and fluorescent colors used for achieving special effects. It is recommended to apply the colors on a surface which has first been primed; the colors dry rapidly and form a self-leveling, homogenous paint film, equally perfect for large surfaces as for the most miniature details of the model. Model Color performs exceptionally well on all surfaces, with extraordinary adherence on resin, plastics, steel and white metal. Tools and brushes are cleaned with water. Model Color is not flammable, and does not contain solvents.

Packaging:

Model Color is presented in bottles of 17 ml./0.57 fl.oz. with eyedropper. This packaging prevents the paint from evaporating and drying in the container, so that it can be used in minimal quantities and preserved for a long time.

ES Colores acrílicos mates y opacos, de base agua, especialmente formulados para su uso a pincel. La selección de colores es muy diversa y ofrece referencias desarrolladas por nuestros expertos para su empleo tanto en figuras históricas, como en todo tipo de vehículos, aviones y figuras militares. La gama contiene una selección de colores transparentes, pátinas y fluorescentes con el fin de facilitar la obtención de diversos efectos. Se recomienda aplicarlos sobre una superficie previamente imprimada. Los colores secan rápidamente formando una película homogénea y autonivelante que respeta el más mínimo detalle presente en el modelo. Model Color tiene un comportamiento excepcional sobre todos los soportes, la adherencia de la pintura sobre resina, plástico, acero y metal blanco es extraordinaria. Los utensilios pueden limpiarse con agua. Model Color no es inflamable y no contiene disolventes.

Presentación:

Model Color se presenta en botellas de 17 ml./0.57 fl.oz. con cuentagotas. Esta presentación evita la evaporación de la pintura y el secado dentro del frasco. Se pueden utilizar cantidades mínimas y conservar el contenido del frasco durante mucho tiempo.

Effects Color Series

A series of sets developed to depict different special effects on figures and models. The colors have been selected specifically to reproduce the consequences of exposure to the elements and of extreme wear under battle conditions on all kind of vehicles, such as the traces of rust and chipped paint, accumulated dirt and the impacted damages of battle, fire and destruction. They include the step by step use of non-metallic colors for metal surfaces.

Serie de sets diseñados para reproducir diversos efectos especiales sobre figuras y maquetas. Los colores han sido cuidadosamente seleccionados para representar fielmente efectos como la exposición a la intemperie de todo tipo de vehículos; secuelas de combate, como el óxido y la suciedad acumulada; efectos metálicos en figuras, usando colores no metalizados.

Figure Color Series

The Figure Color Series consists of a comprehensive collection of color sets designed to assist the modeller in all steps and techniques of painting figures. The colors have been carefully developed to allow for a faithful reproduction of the historical shades of the colors used, following the norms, military nomenclatures and operational background. In the design of some of these sets we have been assisted by historical and military specialists adjoined to museums and historical societies.

Serie de sets diseñados para facilitar al modelista diferentes procesos y técnicas de pintura sobre figuras. Los colores han sido cuidadosamente seleccionados para reproducir fielmente los tonos empleados según normativa histórica y nomenclatura militar en el entorno de cada una de sus operaciones, así como contextos históricos, equipos y complementos. En la confección y diseño de algunos sets intervienen regularmente modelistas profesionales y asesores históricos, personal cualificado vinculado a museos militares.

Wargames Color Series

A series of sets designed to assist the modeller in the painting of miniatures used in fantasy or military table-top games. The selection of sets includes the references of historical colors used for figures and vehicles of the WWII, as well as for the Napoleonic era and other periods. These sets have been created by our team of modellers in association with well-known manufacturers of table top games.

Nuestra selección de estuches ha sido diseñada para facilitar al modelista los procesos de pintura sobre figuras y vehículos para su empleo en miniaturas, juegos de mesa y de guerra, tanto de fantasía como militares. Esta serie de estuches contiene referencias de colores históricos para aplicar sobre figuras y vehículos de la II Guerra Mundial, soldados napoleónicos y otras temáticas. Estos sets han sido realizados por nuestro equipo de modelistas en asociación con prestigiosos fabricantes de juegos de sobremesa.

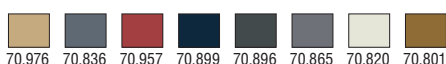

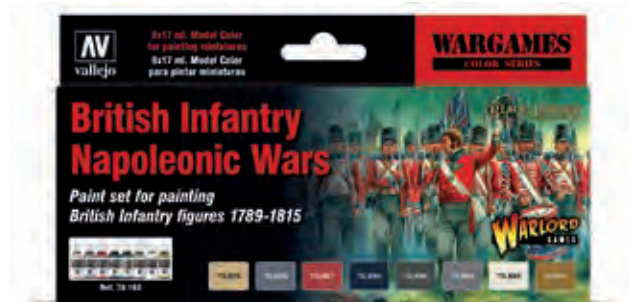

Art. 70.163

British Infantry Napoleonic Wars

8 x 17 ml./0.57 fl.oz. Model Color

The red coated soldiers of British Infantry formed the only force able to withstand the might of the French Army of the Napoleonic Wars.

Los casacas rojas de la infantería británica eran los únicos soldados capaces de hacer frente al poderío del ejército francés de las campañas napoleónicas.

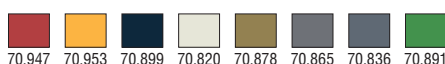

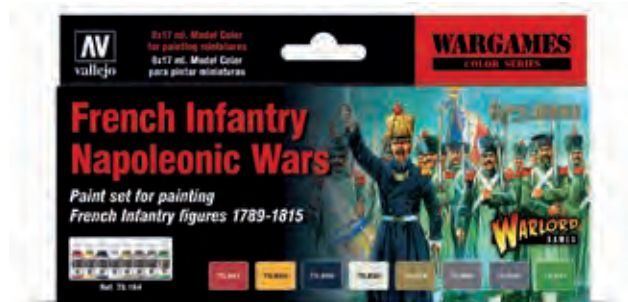

Art. 70.164

French Infantry Napoleonic Wars

8 x 17 ml./0.57 fl.oz. Model Color

The French armies, led by Napoleon, dominated Europe through the early 19th century.

Los ejércitos franceses, liderados por Napoleón dominaron Europa durante el principio del siglo XIX.

Wargames Color Series

Flames of War paint sets by Vallejo

The new assortment is the result of the collaboration between Battlefront and Vallejo and takes the guesswork out of painting World War II and World War III scale miniatures.

La nueva colección de sets desarrollados en colaboración con Battlefront, creadores del juego de wargames Flames of War y Team Yankee, han sido diseñados con la finalidad de facilitar los procesos de pintura de miniaturas a escala tanto de la WWII como de la WWIII.

Liquid Gold

EN Range of 8 alcohol based metallic colors for figures and model kits. Shiny metallic colors manufactured with actual metal pigments in an alcohol based formula resulting in a metallic finish of extraordinary realism and permanence. The colors can be diluted with alcohol or mixed with one another to achieve further variations of tonality and dry rapidly on all kind of surfaces. Brushes are cleaned with alcohol or with Brush Cleaner (ref. 28.900). Liquid Gold is flammable due to its alcohol content, but does not contain xylene or toluene.

Packaging: In 35 ml./1.18 fl.oz. plastic pots with childproof cap.

ES Gama de 8 colores metálicos con base alcohol para figuras y maquetas. Los colores de esta gama se han formulado con pigmentos metálicos dispersados en alcohol, por lo que ofrecen un acabado metalizado de excepcional realismo. Los colores se pueden mezclar entre sí para modificar la tonalidad y secan rápidamente sobre todo tipo de soportes. Los pinceles pueden limpiarse con alcohol o con nuestro Limpiador de Pinceles al alcohol (ref. 28.900). Oro Líquido es inflamable por su contenido en alcohol, pero no contiene xileno, ni tolueno.

Presentación:

En frascos de 35 ml./1.18 fl.oz. con tapón de seguridad.

Model Air

Acrylic colors developed especially for airbrush techniques, in a formula with very finely ground pigments and an acrylic resin with properties of extreme resistance and durability

Colores acrílicos desarrollados especialmente para el aerógrafo con pigmentos de molido extrafino y una resina acrílica de última generación de extrema resistencia y duración

EN Matt acrylic colors, water-based and especially formulated for airbrushing. The Model Air color range contains the most complete selection of the military colors used in recent history, including the colors of WWI, WWII and up to the present. Each color is based on extensive research by our experts on the existing and previous military references so as to offer the modeller the highest possible historical accuracy.

Model Air is used directly or diluted with Vallejo Airbrush Thinner or Flow Improver. It is recommended to prime the surface first and then apply Model Air in several layers. The colors dry very rapidly and form a homogenous paint film of extraordinary resistance while preserving even the smallest detail of the model. For airbrushing these colors, the compressor air pressure is recommended at 15 - 20 PSI or 0.5 to 1 kg. Model Air can of course also be applied with a brush. For correct airbrush maintenance we recommend using Airbrush Cleaner. Model Air is not flammable, and does not contain solvents.

Packaging:

Model Air is presented in bottles of 17 ml./0.57 fl.oz. with eyedropper. This packaging prevents the paint from evaporating and drying in the container, so that it can be used in minimal quantities and preserved for a long time.

ES Colores acrílicos mates, a base de agua, especialmente formulados para aerografía. Cada color ha sido rigurosamente desarrollado por nuestros expertos con el fin de ofrecer al modelista la máxima fidelidad histórica. La gama de Model Air contiene la más amplia selección de colores militares empleados tanto en vehículos como en aviones, desde conflictos de la Primera y Segunda Guerra Mundial, hasta nuestra era.

Los colores se pueden emplear directamente sobre la superficie, o bien diluidos con nuestro Airbrush Thinner o Flow Improver. Secan rápidamente y es recomendable aplicar sucesivas capas sobre una superficie previamente imprimada. Transcurridas unas horas tras su aplicación el color forma una película de extraordinaria resistencia sin alterar el más mínimo detalle del modelo. Se puede usar con pincel. Los ajustes recomendados para el uso del compresor rondan los 15 - 20 PSI o 0.5 a 1 kg. Para un correcto mantenimiento del aerógrafo recomendamos emplear Vallejo Airbrush Cleaner. Model Air no es inflamable y no contiene disolventes.

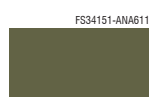

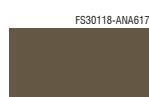

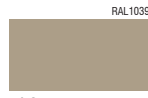

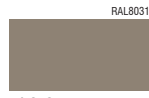

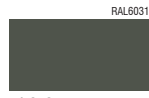

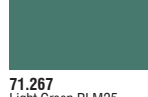

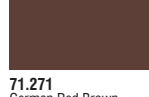

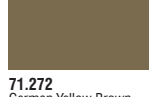

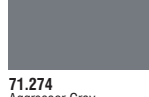

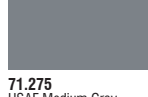

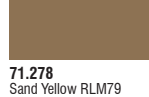

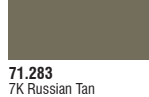

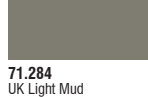

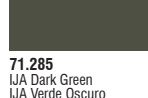

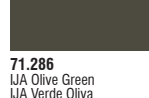

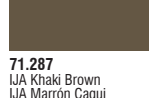

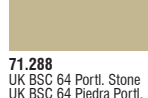

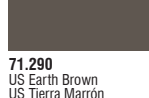

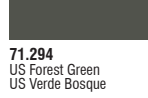

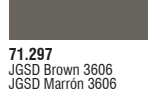

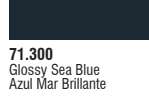

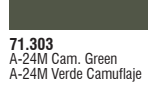

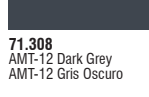

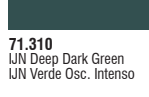

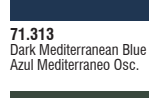

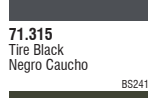

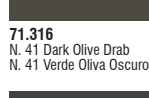

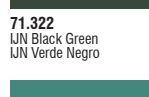

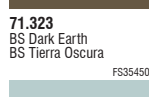

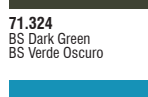

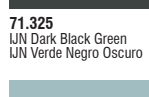

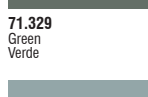

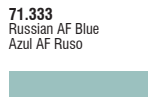

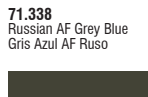

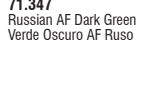

Presentación:

Model Air se presenta en botellas de 17 ml./0.57 fl.oz. con cuentagotas. Esta presentación evita la evaporación de la pintura y el secado dentro del frasco. Se pueden utilizar cantidades mínimas y conservar el contenido del frasco durante mucho tiempo.

Basic Color Series

These introductory sets contain a selection of essential basic colors for all those modellers who want to create their own shades by mixing and blending colors to explore all the chromatic possibilities.

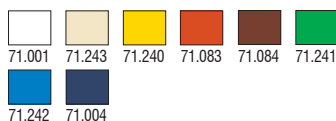

Art. 71.154

Bluelight Set

8 x 17 ml./0.57 fl.oz. Model Air

The Bluelight Set contains the official RAL colors employed in the EEUU (official guide 2005) for use on emergency vehicles, such as ambulances, police vehicles and fire brigades.

El set "Luz Azul" contiene colores que corresponden a los colores RAL designados oficialmente en la EEUU (guía oficial de 2005) para vehículos de emergencia como ambulancias, coches de policía y bomberos.

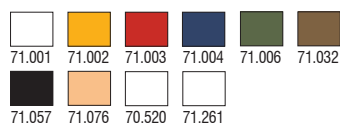

Art. 71.167

Basic Colors & Airbrush

8 x 17 ml./0.57 fl.oz. Model Air + 2 x 17 ml./0.57 fl.oz. auxiliaries

Selection of 8 acrylic Model Air colors, 2 auxiliary products, an Ultra Harder & Steenbeck airbrush and a color chart.

Selección de 8 colores acrílicos Model Air y 2 productos auxiliares, con un aerógrafo Ultra Harder & Steenbeck y una carta de colores.

SCI-FI Color Series

The SCI-FI Color Series consists of a collection of sets developed to provide the model painter with the colors for science fiction figures and vehicles. The colors have been selected and formulated to reproduce the most popular colors from the science fiction universe.

La serie SCI-FI Color Series fue diseñada para facilitar al modelista diferentes procesos de pintura sobre figuras y vehículos de ciencia ficción, modelos de cazas de combate estelar, naves espaciales y modelos de ciencia ficción en general, muchos de ellos inspirados en modelos disponibles de dichas naves protagonistas en diversas sagas cinematográficas.

Art. 71.612

Star Fighters Colors

8 x 17 ml./0.57 fl.oz. Acrylic Airbrush Colors

Set designed for painting the scale models of space ships, jet hunters, star bombers or escort fighters of the Science Fiction universe, or for painting the models from Sci Fi film epics.

Set desarrollado para pintar modelos a escala de naves espaciales ligeras y cazas de combate, lanzaderas, bombarderos estelares o cazas de escolta, dentro del contexto de la Ciencia Ficción en general, o modelos de sagas cinematográficas.

Navy Color Series

The Navy Color Series is a collection of sets designed to assist the modeller in the process of painting ships and submarines of WWI and WWII. The references have been formulated to reproduce faithfully the original colors according to military norms and nomenclatures and the particular operational theatre. The assistance of historical and military experts has been of great value in the design and concept of these sets.

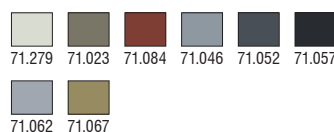

Art. 71.611

Nuclear Submarines

8 x 17 ml./0.57 fl.oz. Model Air

The set includes colors needed to paint the models of nuclear submarines currently deployed and regardless of nationality, since the patterns are very similar.

El set incluye referencias necesarias para pintar submarinos nucleares de toda nacionalidad actual, ya que presentan patrones de pintura muy similares.

Serie de sets diseñados para facilitar al modelista diferentes procesos de pintura sobre barcos y submarinos de la Primera y la Segunda Guerra Mundial. Los colores han sido cuidadosamente seleccionados para reproducir fielmente los tonos empleados según normativa histórica y nomenclatura militar en el entorno de cada una de sus operaciones, así como nacionalidades y periodos histórico. En la confección y diseño de algunos sets intervienen regularmente modelistas profesionales y asesores históricos, personal cualificado vinculado a museos militares.

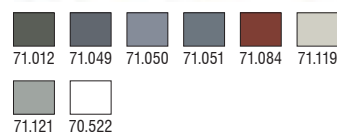

Art. 71.615

Kriegsmarine WWII German Colors

8 x 17 ml./0.57 fl.oz. Model Air

Selection of colors for painting WWII war ships most common in service in Germany, such as submarines and support vessels. The colors selected for this set are the closest possible to available historical references.

Selección de colores para pintar los buques de la Segunda Guerra Mundial más comunes en servicio en Alemania, así como submarinos y navíos de servicio. Los matices seleccionados son los más próximos a las referencias históricas.

Effects Color Series

A series of sets developed to depict different special effects on figures and models. The colors have been selected specifically to reproduce the consequences of exposure to the elements and of extreme wear under battle conditions on all kind of vehicles, such as the traces of rust and chipped paint, accumulated dirt and the impacted damages of battle, fire and destruction. They include the step by step use of non-metallic colors for metal surfaces.

Serie de sets diseñados para reproducir diversos efectos especiales sobre figuras y maquetas. Los colores han sido cuidadosamente seleccionados para representar fielmente efectos como la exposición a la intemperie de todo tipo de vehículos; secuelas de combate, como el óxido y la suciedad acumulada; efectos metálicos en figuras, usando colores no metalizados.

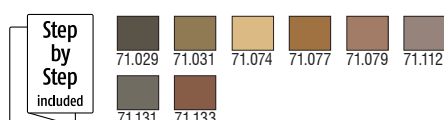

Art. 71.214

Ruins & Rubble

8 x 17 ml./0.57 fl.oz. Model Air

Selection of Model Air colors, especially formulated for painting buildings and unpaved roads; ruins, rubble and stone floors or tiles, in a city or in rural environments. Step by step by Chema Cabrero included.

Selección de colores para aerografía especialmente pensados para pintar edificios, escombros, ruinas, suelos de piedra y adoquines, o caminos sin asfaltar; tanto para ambientes urbanos como rurales. Incluye paso a paso de Chema Cabrero.

Effects Color Series

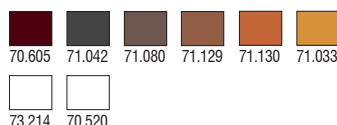

Art. 71.186

Rust & Chipping

8 x 17 ml./0.57 fl.oz. acrylic colors

Selection of airbrush colors to create the effects of rust and wear caused by exposure to weather and battle conditions. Includes step by step by Chema Cabrero.

Selección de colores de aerografía para crear efectos de óxido y envejecimiento sobre la superficie. Ilustrado con un paso a paso de Chema Cabrero.

AFV Color Series

The AFV Color Series consists of a comprehensive collection of color sets designed to assist the modeller in all steps of painting the models of armoured and combat vehicles. The colors have been carefully developed to allow for a faithful reproduction of the historical shades of the colors used, following the norms, military nomenclatures and operational background. In the design of some of these sets we have been assisted by historical and military specialists adjoined to museums and historical societies.

La colección AFV Color Series facilita al modelista los diferentes procesos de pintura en vehículos y carros de combate. Los colores han sido seleccionados para reproducir fielmente los tonos empleados según normativa histórica y nomenclatura militar en el entorno de cada una de sus operaciones, utilizando cartas de color de archivos Federal Standard, RAL, British Standard, entre otros. En la confección y diseño de algunos sets intervienen modelistas profesionales y asesores históricos y personal cualificado vinculado a museos militares.

Art. 71.205

German Colors 1927-1941

Camouflage patterns for German vehicles

8 x 17 ml./0.57 fl.oz. Model Air

This set contains the colors for painting German vehicles from 1927 to 1941, with camouflage patterns by Euromodelismo.

El set contiene colores para pintar los vehículos alemanes de 1927 hasta 1941, con esquemas de camuflaje realizados por Euromodelismo.

Art. 71.206

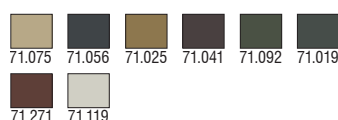

German Colors 1940-1945

Camouflage patterns for German vehicles

8 x 17 ml./0.57 fl.oz. Model Air

The set contains the colors for painting German vehicles from 1940 to 1945, with camouflage patterns by Euromodelismo.

El set contiene colores para pintar los vehículos alemanes de 1940 hasta 1945, con esquemas de camuflaje realizados por Euromodelismo.

AFV Color Series

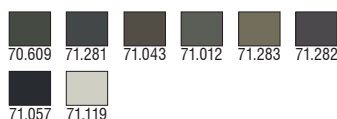

Art. 71.188

Soviet WWII Camo Colors

8 x 17 ml./0.57 fl.oz. Model Air

The set contains the colors for painting Soviet vehicles from 1935 to 1945. With step by step painting instructions by Adam Wilder and 6 camouflage patterns.

El set contiene colores para pintar vehículos soviéticos de 1935 hasta 1945. Incluye un paso a paso de Adam Wilder y 6 esquemas de camuflaje.

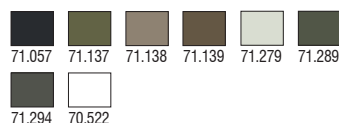

Art. 71.202

MERDC Camo Colors

8 x 17 ml./0.57 fl.oz. Model Air

In the 1970's, the US Mobility Equipment Research & Design Command (MERDC) developed a system of camouflage patterns for US Army vehicles. Each camouflage pattern consists of 4 colors (two primary and two secondary colors); the conditions of the local terrain determined which of the patterns were to be used.

En 1970, la US Mobility Equipment Research & Design Command (MERDC) desarrolló un sistema de patrones de camuflaje para vehículos del ejército estadounidense. Cada uno de los patrones estaba formado por 4 tonos (dos colores primarios y dos secundarios); que vinieron predeterminados según las condiciones del terreno o la estación del año.

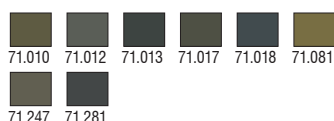

Art. 71.613

Russian Greens (1928's to Present)

8 x 17 ml./0.57 fl.oz. Model Air

The set includes all the shades of green used for base colors and camouflage patterns. From the beginning in the twenties of the mechanization of the army of the Soviet Union, including tanks and light and heavy vehicles, camouflage patterns were considered, and shades of green were employed as a standard base color.

Estuche que incluye todas las variedades de verde usadas como tono de camuflaje y colores base, desde los inicios de la mecanización por parte de la Unión Soviética, su ejército en los años 20, con la inclusión de carros de combate, vehículos de ruedas y vehículos ligeros, se contemplaron tanto patrones de camuflaje, como colores estándar para cubrir los mismos, decidiéndose por tonos verdes como colores base.

6 x 17 ml./0.57 fl.oz. Model Air

The set includes all the tones used to depict the different camouflage schemes used by the USMC on its vehicles, as well as the reference Ocean Grey, used on AMTRAC units operating in Saipan or Tarawa, as well as other combat landing areas.

En el set se incluyen todos los tonos usados para realizar los distintos esquemas de camuflaje comúnmente utilizados por el USMC sobre sus vehículos, así como la referencia Ocean Grey, usada en unidades AMTRAC, operativos en Saipan o Tarawa y otras zonas de desembarco.

NEW!

AFV Color Series

Art. 71.624

WWII USMC Colors Sand Patterns 1942-1945

6 x 17 ml./0.57 fl.oz. Model Air

The set includes all the tones used to depict the different camouflage schemes specifically used by the USMC on its vehicles in combat zones such as Okinawa or Iwo Jima.

En el set se incluyen todos los tonos usados para realizar los distintos esquemas de camuflaje comúnmente utilizados por el USMC sobre sus vehículos, en zonas de combate como Okinawa o Iwo Jima.

Art. 71.209

US Modern Desert Colors

6 x 17 ml./0.57 fl.oz. Model Air

A set designed to show effects of light, shadow and volume on modern US AFV models as well as on other vehicles in a desert environment. The references included allow the application of several concepts such as panel and zenithal light or color modulation with transition from dark shadow to lighter tones, creating the perception of volume. The set includes step by step instructions to suggest the process of painting and highlighting.

Un set diseñado para representar efectos de luz, sombra y volumen sobre los vehículos, equipamiento y blindados americanos contemporáneos. Las referencias permiten aplicar conceptos de iluminación como el panelado, la luz cenital o la modulación de color con transiciones de sombra a tonos más claros, creando percepción de volumen. Incluye un paso a paso como sugerencia de proceso de pintura e iluminación.

Art. 71.207

DAK Colors 1941-44 Deutsches Afrika Korps

6 x 17 ml./0.57 fl.oz. Model Air

The set contains the colors needed to paint the models of AFV and German vehicles operative in DAK units during the 1941-1944 period, starting with the early references from railway depots applied over the color RAL7021, to the new colors designed especially for this operative environment, and including Olivgrün for the Tunisia units.

El set incluye todos los tonos necesarios para pintar carros de combate y vehículos encuadrados dentro de las unidades del DAK durante el periodo de 1941 a 1944, desde los tonos iniciales procedentes de uso ferroviario, aplicado sobre el RAL7021, hasta los nuevos matices especialmente diseñados para ese entorno operativo, incluyendo el Verde Oliva para las unidades estacionadas en Túnez.

Art. 71.210

IDF Colors

Israeli Defence Force

6 x 17 ml./0.57 fl.oz. Model Air

This set includes the Olive Drab used on the operative vehicles in the beginning of the 1956 Sinai War, the 67 Sand Grey color used in the beginning of the Six Days War, the 73 Sand Grey of the Yom Kippur conflict, the 82 Sinai Grey deployed in Lebanon and the actual shade of 87 Tan Green.

Incluye el verde Olive Drab usado en los vehículos operativos durante sus inicios en las Guerras del Sinai del 56, el tono Sand Grey 67 usado desde la Guerra de los seis días, el tono Gris Arena 73 en el conflicto del Yom Kippur, el tono Sinai Grey 82 de los conflictos del Líbano, y el actual Tan Green 87.

AFV Color Series

Art. 71.211

British Caunter Colors

6 x 17 ml./0.57 fl.oz. Model Air

This set contains the colors for the application of the well know British Caunter Camouflage scheme on AFV vehicles, as well as other equipment included in this new ordinance for disruptive camouflage. The colors have been developed especially, following the historical references given in the book by M. Starmer. Also included are the references Purple Light Brown and Light Stone used for the two-tone camouflage scheme.

En este set podemos encontrar las referencias que nos permitirán aplicar el conocido camuflaje tipo Caunter sobre camiones y blindados, así como en otro equipamiento que quedó agrupado por esa nueva normativa de camuflaje disruptivo. Los matices se han estudiado especialmente siguiendo las indicaciones históricas de M. Starmer. Asimismo se incluyen las referencias de Light purple Brown y Ligth Stone para representar el camuflaje de dos tonos.

Art. 71.212

MERDC Desert Colors

Mobility Equipment Research & Design Command

6 x 17 ml./0.57 fl.oz. Model Air

In the 1970s, the US Mobility Equipment Research & Design Command (MERDC) developed a camouflage pattern color system for vehicles of the United States Army. This consisted of a color scheme of standardized patterns for each vehicle, to be used with twelve colors. This set includes all the tones needed to represent the Gray and Red Desert patterns.

En la década de 1970, el US Mobility Equipment Research & Design Command (MERDC) desarrolló un sistema de patrones de camuflaje para vehículos del Ejército de los Estados Unidos. Éstos consistieron de un sistema de patrones estandarizados para cada vehículo, para ser utilizado con un sistema de doce colores. El set incluye todos los tonos necesarios para representar los patrones Grey y Red Desert.

Art. 71.213

Wheels & Tracks

6 x 17 ml./0.57 fl.oz. Model Air

The set contains colors to represent of several types of rubber on wheels and covers, for the rubber used on the mixed track links used on modern and Second World War AFV, as well as for the tracks with a rust effect or metal with a polished finish due to abrasion. Ivory color is used to create effects of dust, using an airbrush or a regular brush.

El set incluye colores para representar varios tipos de caucho sobre ruedas y cubiertas así como para representar dicho material sobre las cadenas mixtas de carros tanto modernos como de la Segunda Guerra mundial, incluyendo la pintura de cadenas con un efecto de óxido o metal pulido por el roce. La referencia Ivory nos permite crear efectos de empolvado sea a pincel o usando aerógrafo.

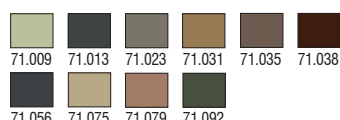

Art. 71.168

Camouflage Colors & Airbrush

10 x 17 ml./0.57 fl.oz. Model Air

Selection of 10 acrylic Model Air colors with an Ultra Harder & Steenbeck airbrush and a color chart.

Este estuche contiene una selección de 10 colores acrílicos Model Air, con un aerógrafo Ultra Harder & Steenbeck y una carta de colores.

AFV

Armour Painting System

Airbrush colors for gradation highlights, shadows and volumes

AFV Painting System. Consists in the application of a series of base colors in half and quarter tones, in a gradual change from one shade to another. These effects of light and shadow, contrast and volume, will give the scale model an authentic and realistic appearance.

Colores de aerografía para gradaciones de luces, sombras y volúmenes

Sistema de pintura para Vehículos Blindados. Consiste en la aplicación sucesiva de varias capas graduales aportando una variedad en los tonos con lo que el modelista conseguirá un efecto de luz, sombra, contraste y volumen, aportando un atractivo realismo al modelo.

German Camouflage 1943/1944

6 x 8 ml./0.27 fl.oz. Model Air

The set contains the Wehrmacht camouflage colors 1943-44 for armoured vehicles, with step by step by Chema Cabrero.

El set contiene colores de camuflaje Wehrmacht (1943-44), para vehículos blindados. Incluye paso a paso de Chema Cabrero.

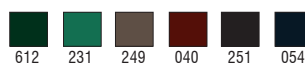

Art. 78.413

NATO Armour Colors

6 x 8 ml./0.27 fl.oz. Model Air

The set contains NATO colors for armoured vehicles are presented in this set, with step by step by Chema Cabrero.

Contiene los 6 colores de la OTAN para vehículos blindados. Incluye paso a paso de Chema Cabrero.

Air War Color Series

Model Air sets developed on the base of intensive research and precise color matching with the Federal Standard 595, RLM and British Standard Colors BS381C color specifications. The sets include the colors for the airplane profiles and camouflage patterns drawn by Mark Rolfe and Pablo Albornoz. With the collaboration of "Pieza a Pieza Modelling Workshop".

Estuches de Model Air formulados después de un riguroso estudio y comprobado su tono exacto con la guía Federal Standard 595, RLM y British Standard Colours BS381C. Incluyen perfiles de aviones realizados por Mark Rolfe y Pablo Albornoz, en los cuales se indican los colores necesarios para pintar los esquemas de camuflajes y una descripción de los mismos. Con la colaboración de "Pieza a Pieza Modelling Workshop".

Art. 71.155

US Navy & USMC colors from 70's to present

8 x 17 ml./0.57 fl.oz. Model Air

Set of Model Air colors developed for painting the color schemes of most of the US NAVY and USMC aircraft in service since the seventies to present.

Estuche de colores Model Air desarrollado para pintar los esquemas de la mayoría de los aviones de la US NAVY y USMC de la década de los 70 hasta la actualidad.

FS37875 AV71.279	FS36440 AV71.121	FS35237 AV71.114	FS36118 AV71.097	FS36231 AV71.277	FS36320 AV71.120	FS36375 AV70615	FS36495 AV71.276
---------------------	---------------------	---------------------	---------------------	---------------------	---------------------	--------------------	---------------------

FS36440: Upper surface color for carrier-based US Navy aircraft from 1955 to 1977. Employed in combination with FS17875 for the lower surface. Also general finish for TPS 1977 color scheme and "Ferris" camouflage. **FS37875:** Lower surface color for carrier-based US Navy aircraft from 1955 to 1977. Employed in combination with FS36440 or FS16440 for upper surface. **FS35237:** Low visibility TPS color scheme for carrier-based aircraft starting 1980. Combined with FS36375/36320. For example see aircraft: F-4S, F-14D, A-6E, EA-6B, etc. **FS36118:** Low visibility TPS color scheme for USMC aircraft starting 1980. Combined with FS36320/36231.

For example see AV-8B Harrier. **FS36231:** Low visibility TPS for USMC aircraft starting 1980. Combined with FS36118/36320. For example see AV-8B Harrier. **FS36320:** Low visibility TPS color scheme for carrier-based aircraft starting 1980. Combined with FS35237/36375. For examples see aircraft F-4S, F-14D, A-6E, EA-6B, etc. **FS36375:** Low visibility TPS color scheme for carrier-based aircraft starting 1980. Combined with FS35237/36320. For examples see aircraft F-4S, F-14D, A-6E, EA-6B, etc. **FS36495:** Low visibility TPS color scheme for the first models of F/A-18 aircraft, starting 1980. Combined with FS36375/35237.

Art. 71.156

USAF colors "Grey Schemes" from 70's to present

8 x 17 ml./0.57 fl.oz. Model Air

Set of Model Air colors developed for painting the low visibility grey color schemes ("Hill", "Mod Eagle", "Ghost", etc.) of the USAF aircraft from the seventies to present.

Estuche de colores Model Air desarrollado para pintar esquemas grises de baja visibilidad ("Hill", "Mod Eagle", "Ghost", etc.) de los aviones de la USAF de la década de los 70 hasta la actualidad.

FS36231 AV71.277	FS36118 AV71.097	FS36176 AV71.273	FS36251 AV71.274	FS36270 AV71.275	FS36320 AV71.120	FS36375 AV70615	FS36495 AV71.276
---------------------	---------------------	---------------------	---------------------	---------------------	---------------------	--------------------	---------------------

FS36231: Interior cockpit color in the USAF fighters (F-4, F-15, F-16, etc.). **FS36118:** Color scheme "Ferris", "Egypt" and "Hill". Combined with FS36270/36320/36375. Example aircraft F-4G, A-10C, F-16C. **FS36176:** Color schemes "Mod Eagle" and "Ghost". Combined with FS36251/36375. Example aircraft F-15C, F-22A. **FS36251:** Color scheme "Mod Eagle" and "Ghost". Combined with FS36176/36375. Example aircraft F-15C, F-22A. **FS36270:** Color scheme "Egypt" and "Hill". Combined with FS 36118/36375. Example aircraft F-4G,

F-16C. **FS36320:** Color scheme "Ghost" and "Hill". Combined with FS 36118/36375. Example aircraft : A-10C, F-15C. **FS36375:** Color scheme "Ghost", "Egypt", "Hill", "Ferris" and "Mod Eagle". Combined with FS36118/36176/36251/36270/36320. See example aircraft: F-15C, A-10C, F-16C, F-22A. **FS36495:** Color scheme "Ghost" First models F/A-18's. Also color scheme "Flipper" (A-10A) and Aggressor "MIG-29" (F-16).

Soviet Air Force VVS pre-war to 1941 "Great Patriotic War"

8 x 17 ml./0.57 fl.oz. Model Air

Set with Model Air colors developed for painting the various color combinations of the camouflage color schemes of the Soviet aircraft, starting with the years prior to WWII (the thirties) until the URSS entered "The Great Patriotic War" in June 1941.

Estuche de colores Model Air desarrollado para pintar los esquemas de camuflaje de aviones soviéticos y sus distintas combinaciones de colores, de los años previos a la Segunda Guerra Mundial (años 30's) hasta la entrada en el conflicto de la URSS en Junio de 1941 o "Gran Guerra Patriótica".

Zashchitnyi AV71.409	All Zashchitnyi AV71.410	A-19F AV71.411	Grey-Blue AV71.412	All Sv. Gol AV71.317	A-18F AV71.413	All Aluminiovy AV71.062	AEH-9 AV71.414
-------------------------	-----------------------------	-------------------	-----------------------	-------------------------	-------------------	----------------------------	-------------------

"Zashchitnyi" Khaki: Upper surfaces of airplanes with metallic finish or combined construction of wood and fabric. **All Zashchitnyi Camouflage Green:** Nitrocellulose lacquer for upper surfaces of aircraft with a combined structure of wood and fabric, and eventually metal. Specifications issued in 1937 and used between 1938-1941. **A-19f Grass Green:** Alkyd treated enamel for upper surfaces of aircraft with a metal structure or metal parts in a combined structure of wood and metal. Specifications issued June 1940. **Grey-Blue:** Lower surface color for airplanes with a metallic finish or a combined wood and fabric structure during the 1927-37 decade. **All Sv.gol. (Svetlo goluboi) Light Blue:** Nitro cellulose lacquer for the lower

surfaces of aircraft with structures of combined wood and fabric, and eventually metal. Widely used in 1940 -1942 and gradually replaced by AMT-7. **A-18f Light Blue:** Alkyd treated enamel for lower surfaces of airplanes with metallic structures or metallic parts in a mixed metal and wood structure. Specifications issued in June 1940. **All Aluminiovy:** Nitrocellulose lacquer for overall finish or for lower surface on some models in 1938, as well as fabric surfaces of mixed structure aircraft. Specifications issued in 1938-1940. **AEH-9 Light Grey:** Alkyd treated enamel for general surface of aircraft with metal structures and metallic parts in mixed structures. Beginning 1941 used for interior structures. Specifications issued in 1937-1940.

All Zashchitnyi Camouflage Green: Nitrocellulose lacquer for upper surface of aircraft with combined wood/fabric and eventually metal structures. Specifications issued in 1937 and used between 1938 and 1941. **AMT-4 Camouflage Green:** Nitrocellulose lacquer for upper surface color scheme "Black/Green" for aircraft of combined wood/metal structures and metallic finish. **A-24m Camouflage Green:** Oil-based enamel equivalent of the color AMT-4, upper surface color scheme "Grey/Brown/Green" and "Black/Brown Green" for airplanes with metal structures. **AMT-6 Matt Black:** Nitrocellulose lacquer for upper color scheme "Black/Green" used on aircraft of mixed structure and metal finish. **All Sv.gol. (Svetlo goluboi) Light**

Blue: Nitrocellulose lacquer for lower surface of aircraft with combined fabric/wood and eventually metal structure. Used widely in 1940-1942 and gradually replaced by AMT-7. **AMT-7 Greyish Blue:** Nitrocellulose lacquer for lower surfaces of aircraft with combined fabric/wood and metal structures. Introduced starting 1943 as a substitute for All Sv.gol. **A-28m Greyish Blue:** Oil-based enamel equivalent to color AMT-7, for inferior part of aircraft with metallic structure. With time this color acquired a yellow tint. **MK-7 Matt White:** Removable, water-soluble paint, for temporary or seasonal deployment, used for Winter camouflage during the entire war (1941-1945).

Art. 71.198

Soviet Air Force VVS 1943 to 1945 "Great Patriotic War"

8 x 17 ml./0.57 fl.oz. Model Air

Set with Model Air colors developed for painting the various camouflage schemes of the Soviet aircraft and their different color combinations, from 1943 to the end of the "Great Patriotic War" in May 1945 with the Fall of Berlin and the end of the Third Reich.

Estuche de colores Model Air desarrollado para pintar los esquemas de camuflaje de aviones soviéticos y sus distintas combinaciones de colores, de 1943 hasta el final la "Gran Guerra Patriótica" en Mayo de 1.945 con la caída de Berlín y el final del Tercer Reich.

--	--	--	--	--	--	--	--

AMT-1 Light Greyish Brown: Nitrocellulose lacquer for upper part color scheme "Grey-Brown-Green" for airplanes of mixed fabric/wood and metal structure. Used starting 1943. **A-21m Light Greyish Brown:** Oil-based enamel, equivalent to the color AMT-1 but more yellow, used in upper color scheme "Grey/Brown/Green" and "Black/Brown/Green" for aircraft of metallic structure. **AMT-4 Camouflage Green:** Nitrocellulose lacquer, upper color scheme "Black/Green" for airplanes of mixed structure and metallic finish. **A-24m Camouflage Green:** Oil-based enamel, equivalent to the color AMT-4, superior color scheme "Grey/Brown/Green" and "Black/Brown/Green" for aircraft of metal structure. **AMT-6 Matt Black:**

Nitrocellulose lacquer, upper color scheme "Black/Green" and "Black/Brown/Green" for aircraft of mixed structure and metallic finish, as well as for lower part of aircraft for night deployment. **AMT-7 Greyish Blue:** Nitrocellulose lacquer for lower surfaces of aircraft of metal and mixed structure. Introduced starting 1943 as a substitute for All Sv.gol. **AMT-11 Blue Grey:** Nitrocellulose lacquer for upper surface scheme "Grey/Grey" for aircraft of mixed structure, principally fighters. Used starting 1943. **AMT-12 Dark Grey:** Nitrocellulose lacquer for upper scheme "Grey/Grey" (fighters) and "Grey/Brown/Green" for aircraft of mixed structure. Used starting 1943.

Imperial Japanese Army (IJA) colors pre-war to 1945

8 x 17 ml./0.57 fl.oz. Model Air

Set with Model Air colors developed to paint aircraft of the aviation division of the Japanese Imperial Army (IJA) deployed in the war with China during the years previous to the attack on Pearl Harbor (December 1941) and the subsequent entry into the WWII conflict until August 1945.

Estuche de colores Model Air desarrollado para pintar los aviones de la división de aviación del ejército Imperial Japonés (IJA), utilizados en la guerra con China durante los años previos al ataque a Pearl Harbor (Diciembre de 1941) y su posterior entrada en el conflicto mundial hasta Agosto de 1945.

 IJA Dark Green AV71.285	 IJA Olive Green AV71.286	 IJA Khaki Brown AV71.287	 IJA Dark Beige AV71.416	 IJA Grey Green AV71.326	 IJA Light Grey Green AV71.321	 AOTAKE Trans. Green AV71.417	 Aluminium AV71.062
--	---	---	--	--	--	---	---

IJA Dark Green (FS 34082): Upper surface color applied in one coat only and/or mottled on natural metal or Grey Green/Light Grey Green lower surface. Also combined with Dark Beige in multiple combinations. **IJA Olive Green (FS 33070):** Upper surface color very similar to its equivalent "Olive Drab" of the USAAF. Used beginning 1943 on fighters of the IJA. On natural metal or Grey Green/Light Grey Green lower surface. **IJA Khaki Brown (FS 30118):** Upper surface color and occasionally on all surfaces of single-engine aircraft and bi-engine fighters in the years 1944/45. Combined with Grey Green on lower surfaces. **IJA Dark Beige (FS 30215):** Upper surface color combined with Dark Green or occasionally as single

color coating. Lower surface in metal or Grey Green/Light Grey Green. **IJA Grey Green (FS 36405):** Lower surface color used beginning 1943. Combined with any of the green or khaki colors on the upper surface. Fabric control surfaces on aircraft with metal finish. **IJA Light Grey Green (FS 34424):** Color for lower or all surfaces. Combined with any of the green or khaki colors on the upper surface. Fabric control surfaces on aircraft with metal finish. **Aluminium (FS 37178):** In aircraft of the IJA the absence of camouflage, either partial or total, is customary. **"Aotake" Translucent Green:** Translucent lacquer, a protector applied on the interior parts of metallic structures (fuselage, cockpit, etc.).

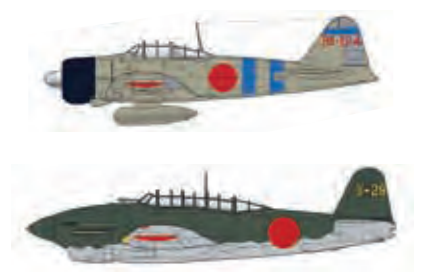

Art. 71.169

Imperial Japanese Navy (IJN) colors pre-war to 1945

8 x 17 ml./0.57 fl.oz. Model Air

Set of Model Air colors developed to paint aircraft of the aviation division of the Japanese Imperial Navy (IJN) for aircraft embarked on carriers as well as land based, used in the war with China during the years previous to the attack on Pearl Harbor (December 1941) and the subsequent entry into the WWII conflict until August 1945.

Estuche de colores Model Air desarrollado para pintar los aviones de la división de aviación de la Marina Imperial Japonesa (IJN) tanto embarcados en portaaviones como en tierra, utilizados en la guerra con China durante los años previos al ataque a Pearl Harbor (Diciembre de 1941) y su posterior entrada en el conflicto mundial hasta Agosto de 1945.

 IJN Dark Black Green AV71.325	 IJN Black Green AV71.322	 IJN Deep Dark Green AV71.310	 IJN Ash Grey AV71.311	 IJN Medium Grey AV71.312	 IJN Medium Brown AV71.418	 AOTAKE Trans. Blue AV71.419	 Aluminium AV71.062
--	---	---	--	---	--	--	---

IJN Dark Black Green (FS 34052): Upper surface color applied in one coat only on Ash Grey/Medium Grey on lower surface or natural metal. Used on Mitsubishi and other makes of aircraft. **IJN Black Green (FS 34077):** Upper surface color applied in one coat only on Ash Grey/Medium Grey on lower surface or natural metal. Common on "Zeros" produced by Nakajima and all kind of aircraft of other manufacturers. **IJN Deep Dark Green (FS 34058):** Upper surface color applied in one coat only on Medium Grey on lower surface or natural metal. Planes manufactured by Kawanishi, Aichi, etc. **IJN Medium Brown (FS 30122):** Upper surface color combined with Dark Black Green/Black Green on Ash Grey/Medium Grey on lower

surface, on bombers and hidro-planes in Chinese and Pacific theaters of operations until the middle of the war. **IJN Ash Grey (FS 36350):** Color used until 1942/43 for most embarked aircraft on all surfaces or combined with Dark Black Green/Black Green for the upper part. **IJN Medium Grey (FS 36375):** Color for lower part or all surfaces, combined with any of the green shades of the upper part. Fabric control surfaces. **Aluminium (FS 37178):** On IJN aircraft, the partial or total absence of camouflage in prewar years and at the end of the war is customary. **"Aotake" Translucent Blue:** Translucent lacquer, a protector applied on the interior parts of metallic structures (fuselage, cockpit, etc.).

Armée de l'Air colors 1939 to 1942 "Battle of France" & Vichy AF

8 x 17 ml./0.57 fl.oz. Model Air

Set of 8 Model Air Colors developed for painting the camouflage patterns of the French Air Force during the Second World War, starting with the initial period in 1939, the end of the Battle for France in June 1940, and the subsequent armistice in November 1942. The set contains the profiles of airplanes with indications and detailed descriptions of the colors needed for painting the camouflage patterns.

Estuche de colores Model Air desarrollado para pintar esquemas de camuflaje del Ejército del Aire Francés en la Segunda Guerra Mundial, desde el inicio de las hostilidades en 1939, hasta el fin de la "Batalla de Francia" en junio de 1940, y el posterior Armisticio hasta noviembre de 1942. Incluye perfiles de aviones, donde se indican los colores necesarios para pintar los esquemas de camuflaje y una descripción detallada de los mismos.

	Jaune AV71.078		Rouge AV71.269		Sienne Naturelle AV71.035		Kaki AV71.043		Ombre Calcinée AV71.040		Vert AV71.093		Gris Bleu Clair AV71.275		Gris Bleu Foncé AV71.047
--	-------------------	--	-------------------	--	------------------------------	--	------------------	--	----------------------------	--	------------------	--	-----------------------------	--	-----------------------------

Vert: Color of the upper surfaces in basic camouflage patterns, approved in December 1938 by the Ministère de l'Air for land-based aircraft. This color is a substitute for the color Kaki according to manufacturer and model. **Kaki:** Color of the upper surfaces of land-based aircraft in basic camouflage patterns, approved by Ministère de l'Air in December 1938. **Gris Bleu Foncé:** Color for the upper aircraft surfaces in the basic camouflage pattern. Approved for land-based aircraft by the Ministère de l'Air in December 1938. This color is a substitute for the color Kaki according to manufacturer and model. **Ombre Calcinée:** Color for the upper aircraft surfaces in basic camouflage schemes, approved for land-based aircraft by the Ministère de l'Air in December 1938. The color was also used for

the lower surface of night bombers. **Sienne Naturelle (Terre de Sienne):** Color for the basic camouflage schemes of upper aircraft surfaces. Approved by the Ministère de l'Air in December 1938. Substitute for Ombre Calcinée in the overseas colonies. **Gris Bleu Clair:** Color of the lower aircraft surfaces in basic camouflage schemes. Approved for land-based aircraft models by the Ministère de l'Air in December 1938. **Rouge:** Color of national insignia and tactical markings. To be combined with the color Jaune for the distinctive identification bands of the Vichy Government. **Jaune:** Color for tactical markings. To be combined with the color Rouge to form the identification bands which were distinctive of the Vichy Government.

Art. 71.627

Armée de l'Air colors post WWII to present

8 x 17 ml./0.57 fl.oz. Model Air

Set of Model Air Colors developed for painting the camouflage patterns of the French Air Force, in the period starting with the end of the WWII until to date. The set includes the color for the natural metal finish, commonly used during the decades of the 50's & 60's, the colors for the mimetic schemes of air superiority patterns and desert camouflage named "Chad" and the color for the latest tendency of low visibility grey. The set contains profiles of the airplanes with detailed descriptions of the camouflage patterns and the colors needed for painting them.

Estuche de colores Model Air desarrollados para pintar esquemas de camuflaje del Ejército del Aire Francés desde el final de la Segunda Guerra Mundial hasta la actualidad. Incluye acabados en metal natural, en boga durante la década de los 50's y 60's, patrones miméticos de superioridad aérea, camuflaje desértico denominado "Chad" y la última tendencia en gris de baja visibilidad. Incluye perfiles de aviones, donde se indican los colores necesarios para pintar los esquemas de camuflaje y una descripción detallada de los mismos.

 Aluminium (Métallisé) AV71062	 Gris Moyen AV71277	 Gris-Bleu Moyen Foncé AV71097	 Bleu Defense Aérienne AV71299	 Ivoire Vif AV71400	 Marron Clair AV71035	 Brun Verdâtre AV71294	 Gris-Bleu Clair AV70615
---	--	---	---	--	---	---	---

Aluminium (Métallisé): Metal finish for all surfaces and all types of aircraft, in accordance with general tendencies for most of the air forces in the years 1950-1960. This color was also applied on lower surfaces and on the schemes for air superiority and desert camouflage during 1970 and 1980. **Gris-Bleu Moyen Foncé (FS36118):** Color used on upper air craft surfaces in air superiority color schemes and combined with Brun Verdâtre in the decades of 1970 and 1980. **Brun Verdâtre (FS34079):** Color applied on upper aircraft surfaces as part of the air superiority color schemes and combined with Gris-Bleu Moyen Foncé. The color was used in the decades of 1970 and 1980. **Bleu Defense Aérienne (FS35164):** Color applied on upper air craft surfaces for air superiority color schemes

and combined with the color Aluminium on the lower surfaces. Used in the decades of 1970 and 1980. **Ivoire Vif (FS33798):** Color used on upper aircraft surfaces in the desert color schemes type "Chad", combined with Marron Clair and Aluminium on the lower surfaces. **Marron Clair (FS30140):** Color used on the upper surfaces of the aircraft in the desert color scheme "Chad", combined with Ivoire Vif and Aluminium on the lower surfaces. **Gris-Bleu Clair (FS36375):** Color applied on the upper and lower surfaces in air superiority color schemes, and combined with Bleu Defense Aérienne in the "Wrap Around" color scheme introduced in the decade of the 80ties. **Gris Moyen (FS36231):** Grey camouflage pattern of low visibility on all surfaces, for aircraft of the latest generation.

Panzer Aces

A color system designed for reproducing the colors of the tank crew uniforms and vehicles in WWII

Sistema de colores para pintar los uniformes de los carristas y vehículos en la WWII

EN Matt and opaque water-based acrylic colors, developed especially for brush-on use. Each color has been developed with the assistance of the Euromodelismo team of experts in order to offer the modeller a quick and practical system for painting the tank crews of World War II. The color range has been chosen to simplify the painting process and includes all the shades needed for the uniforms of the German, American, British, Italian, French, Russian and Japanese crews, using the popular figure painting technique of base color, shadow and highlights. It is recommended to apply the colors on a previously primed surface; they dry rapidly and form a homogenous and self-leveling surface while preserving even the smallest detail of the model. Panzer Aces performs extremely well on all supports and the adherence of the paint on resin, plastic, steel and white metal is extraordinary. Brushes and tools can be cleaned with water. Panzer Aces is not flammable, and does not contain solvents.

Packaging:

Panzer Aces is presented in bottles of 17 ml./0.57 fl.oz. with eyedropper. This packaging prevents the paint from evaporating and drying in the container, so that it can be used in minimal quantities and preserved for a long time.

ES Colores acrílicos mates y opacos, de base agua, desarrollados por los expertos de la editorial Euromodelismo, con el fin de ofrecer al modelista un sistema que le permita pintar con facilidad las tripulaciones de los blindados de la Segunda Guerra Mundial. La gama se ha seleccionado para facilitar los procesos de pintura al modelista e incluye todas las referencias para pintar uniformes de tripulaciones y blindados alemanes, americanos, británicos, italianos, franceses, rusos y japoneses, empleando la popular técnica de iluminación en figuras, consistente en la selección de un tono base, sombra y luz. Los colores de Panzer Aces han sido especialmente formulados para uso a pincel. Se recomienda su aplicación sobre una superficie previamente imprimada. Los colores secan rápidamente y forman una película homogénea y autonivelante que respeta el más mínimo detalle presente en el modelo. Panzer Aces tiene un comportamiento excepcional sobre todos los soportes, la adherencia de la pintura sobre resina, plástico, acero y metal blanco es extraordinaria. Los utensilios se pueden limpiar con agua. Panzer Aces no es inflamable y no contiene disolventes.

Presentación:

Panzer Aces se presenta en botellas de 17 ml./0.57 fl.oz. con cuentagotas. Esta presentación evita la evaporación de la pintura y el secado dentro del frasco. Se pueden utilizar cantidades mínimas y conservar el contenido del frasco durante mucho tiempo.

Panzer Aces colors

Sets 70.122 and 70.123 contain the colors used to paint this tank: the tracks, wooden parts, periscopes, signs, headlamps, pilot lights, highlights and shadows.

Los sets 70.122 y 70.123 contienen los colores empleados para pintar este tanque: sus cadenas, madera, periscopio, señales, lamparas, sombras y luces.

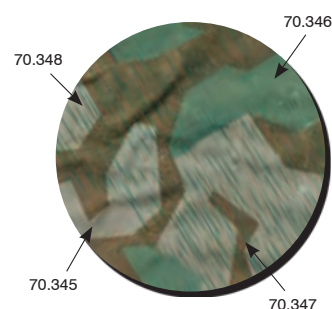

Panzer Aces Sets (8 colors)

Each set contains a selection of 8 special colors in 17 ml./0.57 fl.oz., used for the weathering of tanks, tires, tarps, lights, ribbons, periscopes, and uniforms for the crew, skin tones and camouflage patterns.

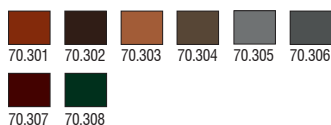

Cada estuche contiene una selección de 8 colores especiales en botellas de 17 ml./0.57 fl.oz. utilizados para el desgaste de los tanques, ruedas, lonas, luces, etc... y para los uniformes de los carristas, tonos de piel y camuflaje.

Metal Color

Metal Color is a range of water-based metallic colors, especially designed for airbrush techniques

Metal Color es una gama de colores metálicos de base agua, especialmente diseñados para aerografía

EN Metal Color is an innovative range of metallic colors formulated with aluminium pigments in a water-based formula. The metallic colors selected for this range are those most commonly employed by international air forces worldwide, and their exceptionally shiny finish and reflectance allow the modeller to use Metal Color for the entire painting process without having to resort to solvent based enamels or lacquers. Metal Color can be applied directly to the model with an airbrush, or diluted with our Airbrush Thinner or Flow Improver, dries very rapidly and forms a self-leveling and homogenous paint film of extraordinary resistance while preserving even the smallest detail of the model. Can be mixed directly in the cup of the airbrush with other colors of the Model Air or Game Air series. Metal Color can also be applied by brush. For airbrushing, the recommended compressor settings are around 15 - 20 Psi o 0.5 to 1 kg. For best airbrush maintenance we recommend using the Vallejo Airbrush Cleaner. For fuselages and components of airplane models, it is recommended to first apply a base of Black Gloss Primer to bring forth the unique qualities of the aluminium finish. In masking Procedures: Metal Color dries very rapidly, but it is convenient to wait 12 hours after application before proceeding with the masking process.

Packaging:

Available in 32 ml./1.08 fl.oz. bottles with a flip-top/eyedropper closure. Includes stainless stirring ball. Gloss Black Primer available in bottles of 60 ml./2.02 fl.oz. (Ref. 73.660) and 200 ml./6.76 fl.oz. (Ref. 74.660) with a flip-top/eyedropper closure. Gloss Metal Varnish available only in bottles of 60 ml./2.02 fl.oz. (Ref. 26.657) with a flip-top/eyedropper closure.

ES Metal Color es la innovadora gama de colores metalizados de formulación base agua, que emplea pigmentos de aluminio en su elaboración. La gama Metal Color ofrece un amplio abanico de tonos con el fin de imitar el acabado metálico de aviones de cualquier tipo y época. De excepcional brillo y extraordinario poder de reflectancia, permiten al modelista realizar todos los procesos de pintura sin necesidad de recurrir a esmaltes y lacas. Se puede aplicar directamente con aerógrafo sobre la maqueta, o diluido con nuestro Airbrush Thinner o Flow Improver. Metal Color seca muy rápidamente, respetando el más mínimo detalle presente en el modelo formando una película homogénea y autonivelante de extraordinaria resistencia transcurridas unas horas tras su aplicación. Metal color se puede teñir directamente en la cazoleta del aerógrafo empleando colores de la gama Model Air o Game Air. También se puede usar a pincel. Los ajustes del compresor recomendados para nuestros colores rondan los 15 - 20 Psi o 0.5 a 1 kg. Es aconsejable, en el caso de fuselajes y componentes de modelos de avión, aplicar una Imprimación Negro Brillante para realzar las características especiales de los tonos de aluminio. Metal color seca muy rápido, pero es conveniente esperar 12 horas tras su aplicación antes de proceder con el proceso de enmascaramiento. Para un correcto mantenimiento del aerógrafo recomendamos emplear Vallejo Airbrush Cleaner.

Presentación: Disponible en botellas de 32 ml./1.08 fl.oz. con tapón bisagra y cuentagotas. Incluye bola de acero inoxidable para mejorar la agitación. Imprimación Negro Brillante disponible en botellas de 60 ml./2.02 fl.oz. (Ref. 73.660) y 200 ml./6.76 fl.oz. (Ref. 74.660) con tapón bisagra y cuentagotas. Barniz Metal Brillante disponible en botellas de 60 ml./2.02 fl.oz. (Ref. 26.657) con tapón bisagra y cuentagotas.

Dull Aluminium / Aluminio Mate

Internal structures / exterior varnish or "Dope" / wear due to climatic factors / flight-control surfaces.

Estructuras internas / laca exterior o "Dope" / desgaste debido a factores climatológicos / superficies control direccional.

77.720
Gunmetal Grey / Gris Metalizado

Armour / panels in high-heat areas (engines/jet exhausts) / mechanical components / engines.

Armamento / paneles zona tensión térmica (motor/toberas) / componentes mecánicos / motores.

77.721
Burnt Iron / Hierro Quemado

Panels in high-heat areas (engines/jet exhausts) / mechanical components / areas damaged by heat and fire.

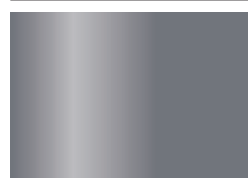

Paneles zona tensión térmica (motor/toberas) / componentes mecánicos / zonas dañadas por fuego y altas / temperaturas.

77.723
Exhaust Manifold / Colector Escape

Jet engine exhaust (radial/lineal) / panels in high-heat areas (engines/jet exhausts).

Motores explosión (radial/lineal) / paneles / zona tensión térmica (motor/toberas).

77.724
Silver / Plata

Exterior coating / mechanical components / engines / parts and aeronautical structures of all types.

Recubrimiento exterior / componentes mecánicos / motores / piezas y estructuras aeronáuticas de todo tipo.

77.725
Gold / Oro

Exterior panels / engines and mechanical components / flight instruments and precision equipment / ammunition pods.

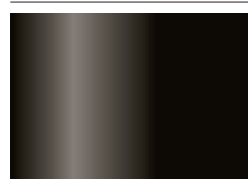

Aleación paneles exteriores / motores y componentes mecánicos / instrumentación vuelo y equipos de precisión / vainas munición.

77.657
Gloss Metal Varnish / Barniz Metal Brillante

Protective varnish for metallic pigment. Protects colors against wear and aging processes (washes, etc.).

Barniz protector para pigmentos metalizados, protege la pintura de procesos de desgastes (lavados, etc.).

77.660
Gloss Black Primer / Imprimación Negro Brillante

Black base primer, improves adherence of Metal Color, applied diluted increases the intensity of the color.

Imprimación base, mejora el agarre de Metal Color y aplicado diluido aumenta la intensidad tonal del color.

Metal Color Sets

The sets in the Metal Color series contain a selection of water-based metallic colors which have been selected to faithfully reproduce the different metallic finishes of radial or lineal engines, exhausts or panels which are part of most airplanes of any type or era. Starting with aircraft in WWI, which were constructed with a combinations of materials such as wood, metal and fabric up to the most modern fighter airplanes of today.

Los sets de la serie Metal Color contienen una selección de colores metálicos de base agua seleccionados para reproducir fielmente diferentes acabados metalizados como motores radiales o lineales, toberas o panelados que se encuentran en la mayoría de aviones de cualquier tipo y época; desde aviones de la Primera Guerra Mundial que combinan en su fabricación materiales como madera, metal y recubrimiento textil hasta modernos cazas de combate.

Mecha Color

Mecha Color, extra resistant colors, especially designed for painting robots, Gundam, Transformer and Gunplas figures

Mecha Color, colores extra resistentes formulados para pintar todo tipo de robots, Gundam, Transformers y Gunplas

EN Acrylic colors with a satin finish, extra resistant and impact proof especially designed for airbrushing surfaces exposed to aggressive manipulation. Its innovative formulation guarantees exceptional adherence on even the most difficult surfaces, and offers great resistance to rough handling, impact, friction, scratches, etc. Once dry, the Mecha surface looks the same as the original plastic of the model, while yet the smallest details of the original remain clearly visible. The color range includes primers as well as special varnishes -also with an exclusive formulation- and a series of colors for aging and weathering effects. It is recommended to apply the Mecha colors in several layers on the previously primed surface; a few hours after application the colors will have dried to form a homogenous coating of extraordinary strength and resistance. Mecha Color can be airbrushed directly or diluted with Vallejo Airbrush Thinner or Flow Improver, and the colors can also be applied by brush. The compressor adjustment recommended is 15 - 20 PSI o 0.5 to 1 kg. For best airbrush maintenance we recommend using the Vallejo Airbrush Cleaner. Mecha Color is not flammable, and does not contain solvents.

Packaging:

Mecha Color is available in 17 ml./0.57 fl.oz. bottles (with eyedropper). Mecha Primer and Mecha Varnish are also available in 60 ml./2.02 fl.oz. and 200 ml./6.76 fl.oz. bottles (with flip-top and eyedropper).

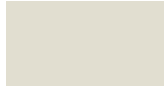

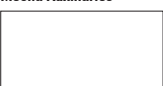

ES Colores acrílicos satinados especialmente formulados para aerografía. Su innovadora formulación garantiza una excelente adherencia sobre todo tipo de robots articulados y gran resistencia a impactos, roces, arañazos etc. Una vez seco su aspecto recuerda al del mismo plástico inyectado respetando el más mínimo detalle presente en el modelo. La gama incluye tanto imprimaciones como barnices de formulación exclusiva y también una serie de colores para efectos de envejecido. Se recomienda aplicarlos sobre una superficie previamente imprimada y aplicar sucesivas capas. Los colores secan rápidamente formando una película homogénea de extraordinaria dureza y resistencia transcurridas unas horas tras su aplicación. Se puede usar directamente o diluido con nuestro Airbrush Thinner o Flow Improver. También se puede usar a pincel. Los ajustes del compresor recomendados para nuestros colores rondan los 15 - 20 PSI o 0.5 a 1 kg. Para un correcto mantenimiento del aerógrafo recomendamos emplear Vallejo Airbrush Cleaner. Mecha Color no es inflamable y no contiene disolventes.

Presentación:

Mecha Color está disponible en botellas de 17 ml./0.57 fl.oz. (con cuentagotas). Mecha Primer y Mecha Varnish también están disponibles en botellas de 60 ml./2.02 fl.oz. y 200 ml./6.76 fl.oz. (con tapón bisagra y cuentagotas).

Game Color

Acrylic colors especially formulated for miniature figures in fantasy and wargames

Colores acrílicos formulados especialmente para figuras de fantasía o wargames

EN Acrylic colors in a matt and opaque, water-based formula, especially designed for brush-on use. Each color has been meticulously developed in collaboration with model-painters who specialize in fantasy figures and dioramas. The formulation of these colors has been developed taking into account that some of these figures are used in Wargames, Game Color is manufactured with a revolutionary new resin which offers extraordinary resistance to the damage caused by frequent handling. It is recommended to apply Game Color on a previously primed surface. The colors dry rapidly and form a homogenous and self-leveling film while preserving even the smallest detail of a miniature. Game Color presents an extraordinary adherence on all grounds, such as resin, plastic, steel and white metal. Painting tools are cleaned with water. Game Color is not flammable, and does not contain solvents.

Extra Opaques

16 highly pigmented acrylic colors formulated to provide an especially matt and opaque coating which covers all primers and base colors in one application.

Washes & Inks

The washes and inks, developed with a new resin, are used for shadows and for the application of colors in layers. When applied over a basecoat, they enter into the folds and grooves of the figure, instantly bringing forth the features and adding shade to recessed areas. They can also be used for weathering. Inks and Washes can be mixed with Game Color colors and mediums.

Packaging:

Game Color is presented in bottles of 17 ml./0.57 fl.oz. with eyedropper. This packaging prevents the paint from evaporating and drying in the container, so that it can be used in minimal quantities and preserved for a long time.

ES Colores acrílicos mates y opacos de base agua, especialmente formulados para uso a pincel. Cada color ha sido rigurosamente desarrollado en colaboración con modelistas especializados en figuras y dioramas de fantasía. En la formulación de esta gama se ha tenido en cuenta que algunas de las figuras se utilizan en Wargames, y por ello se ha empleado una resina de última generación que ofrece una extraordinaria resistencia a la fricción causada por el movimiento manual de las figuras. Se recomienda aplicarlos sobre una superficie previamente imprimada. Los colores secan rápidamente formando una película homogénea y autonivelante que respeta el más mínimo detalle presente en el modelo. Game Color tiene un comportamiento excepcional sobre todos los soportes, la adherencia de la pintura sobre resina, plástico, acero y metal blanco es extraordinaria. Los utensilios se pueden limpiar con agua. Game Color no es inflamable y no contiene disolventes.

Extra Opacos

16 colores acrílicos de muy alta pigmentación formulados para conseguir una capa especialmente opaca y mate que cubre todas las imprimaciones y bases en una aplicación.

Lavados y tintas

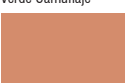

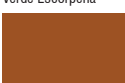

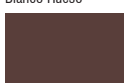

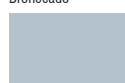

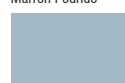

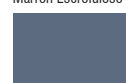

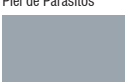

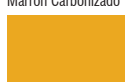

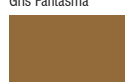

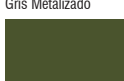

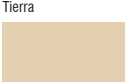

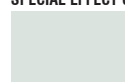

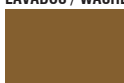

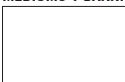

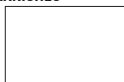

Los lavados y tintas han sido formulados con una resina nueva. Se utilizan para sombras y para la aplicación de colores en capa. Aplicándolas sobre una imprimación, entran en los pliegues y surcos de la figura, resaltando instantáneamente su aspecto. También se pueden utilizar para técnicas de envejecido de las figuras. Se pueden mezclar con los colores Game Color y con los Mediums.

Presentación:

Game Color se presenta en botellas de 17 ml./0.57 fl.oz. con cuentagotas. Esta presentación evita la evaporación de la pintura y el secado dentro del frasco. Se pueden utilizar cantidades mínimas y conservar el contenido del frasco durante mucho tiempo.

Game Air

**Acrylic colors for miniature figures
in fantasy and wargames, developed
especially for airbrush techniques**

**Colores acrílicos para miniaturas
de fantasía o wargames, desarrollados
especialmente para el aerógrafo**

EN Matt acrylic water-based colors, especially formulated for airbrushing. Each color has been meticulously developed in collaboration with model painters who are specialists in fantasy figures and dioramas. Most of the colors in Game Air have their equivalents in Game Color, so that the modeller can combine both formulations and work simultaneously with a brush or an airbrush. Game Air can be used directly or diluted with Vallejo Airbrush Thinner and Flow Improver. It is recommended to apply the colors in several layers on a previously primed surface. The colors preserve the smallest details of the model, they dry very quickly and after a few hours form a homogenous film of extraordinary resistance.

Game Air performs exceptionally well on all surfaces; the adherence of the colors on resin, plastic, steel and white metal is extraordinary. Compressor adjustment for these colors is recommended at 15 - 20 PSI or 0.5 a 1 kg. For best airbrush maintenance we recommend using the Vallejo Airbrush Cleaner. Game Air is not flammable, and does not contain solvents.

Surface Primers:

The water-based acrylic-polyurethane primers dry quickly to the touch, and confer a matt, self-leveling base coat of extraordinary resistance. The painting of the model can be continued almost immediately.

Packaging:

Game Air is presented in bottles of 17 ml./0.57 fl.oz. with eyedropper. This packaging prevents the paint from evaporating and drying in the container, so that it can be used in minimal quantities and preserved for a long time.

ES Colores acrílicos mates de base agua, especialmente formulados para aerografía. Cada color ha sido rigurosamente desarrollado en colaboración con modelistas especializados en figuras y dioramas de fantasía. La mayoría de los colores de Game Air tienen su equivalencia en Game Color por tanto el modelista puede combinar ambas formulaciones para trabajar simultáneamente con aerógrafo y pincel. Los colores se pueden emplear directamente sobre la superficie, o bien diluidos con nuestro Airbrush Thinner o Flow Improver. Secan rápidamente y es recomendable aplicar sucesivas capas sobre una superficie previamente imprimada. Transcurridas unas horas tras su aplicación el color forma una película de extraordinaria resistencia sin alterar el más mínimo detalle del modelo. Se puede usar con pincel.

Los ajustes recomendados para el uso del compresor rondan los 15 - 20 PSI o 0.5 a 1 kg. Para un correcto mantenimiento del aerógrafo recomendamos emplear Vallejo Airbrush Cleaner. Game Air no es inflamable y no contiene disolventes.

Imprimaciones:

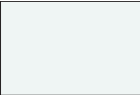

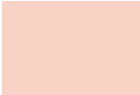

Las imprimaciones de acrílico-poliuretano de base agua, secan al tacto muy rápidamente, con un acabado mate y autonivelante y forman una película de extraordinaria dureza, que permite proseguir con el proceso de pintura de inmediato.

Presentación:

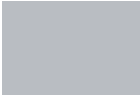

Game Air se presenta en botellas de 17 ml./0.57 fl.oz. con cuentagotas. Esta presentación evita la evaporación de la pintura y el secado dentro del frasco. Se pueden utilizar cantidades mínimas y conservar el contenido del frasco durante mucho tiempo.

Eccentric Colors

Unique colors which behave differently, include Colorshift, fluorescent and metallic colors and other special effects

Colores especiales que actúan de manera diferente, Colorshift, fluorescentes, metalizados y otros efectos especiales

EN The upcoming Eccentric color range by Vallejo includes a selection of unique colors which behave differently, and includes Colorshift, fluorescent and new generation metallic colors, as well as other special effect products obtained with singular pigments, providing the modeler with innovative tools to achieve a maximum level of creativity.

Colorshift

Colorshift, the first selection of ready to use metallic acrylic airbrush colors, with multichromatic pigments used in the formulation of these colors give them a vibrant metallic sparkle, while their glass-like coating acts like a refracting prism. Each flake presents a variety of color depending on the angle of view and incident light; the color shift effect is observable with both high and low-gloss applications and in a wide variety of lighting conditions and is intensified if the colors are applied on a curved surface, while best effects are obtained over a gloss black base color.

Packaging:

The range is available in bottles of 17 ml./0.57 fl.oz. with eyedropper.

ES Eccentric by Vallejo es una gama de colores especiales, que actúan de una manera diferente. La serie incluye diferentes formulaciones como Colorshift, fluorescentes, metalizados de nueva generación y otros efectos realizados con pigmentos singulares que permiten al modelista alcanzar la máxima creatividad.

Colorshift

Colorshift es la primera selección de colores acrílicos metalizados para aerografía con la particularidad que los pigmentos multicromáticos empleados en la formulación confieren a los colores un intenso tono metalizado realzado por unas partículas semejantes a microcristales que actúan como un prisma refractante. El efecto multicolor se observa en función del ángulo o de la iluminación, y se visualiza de forma óptima en aplicaciones sobre soportes curvos imprimados en color negro brillante.

Presentación:

La gama está disponible en botellas de 17 ml./0.57 fl.oz. con cuentagotas.

Colorshift Sets

The sets in the Colorshift range contain a selection of water-based acrylic airbrush metallic colors. Depending on the light or angle, color shifts from one shade to another. Shake well, apply in thin layers. Best effects obtained over a gloss black base color.

Los sets de la gama Colorshift contienen una selección de colores acrílicos metalizados para aerografía. En función del ángulo o la luz, el color varía de un tono a otro. Agitar bien y aplicar en capas finas. Los efectos más espectaculares se obtienen sobre un base negro brillante.

Weathering Effects

For the realistic reproduction of the effects of time and weather on models and dioramas

Para reproducciones realistas de efectos de tiempo e intemperie sobre miniaturas y dioramas

EN The innovative range of Weathering Effects offers the modeller a new medium for depicting the effects of exposure to weather and extreme climates on vehicles and armor. The references of the range are formulated with permanent pigments and water-based acrylic resins, and offer a great variety of scenic possibilities such as the creation of spilled fuel, engine grime, lichen, humidity, crushed grass, mud splashes and fuel stains, each developed to represent a specific effect on vehicles and armor and to show their operative history under harsh conditions. The products can be applied directly on the base, dry rapidly and most of them permit immediate further manipulation with the exception of Thick Mud, which needs a more extended time for drying completely. Tools can be cleaned with water and soap. Weathering Effects is not flammable, and does not contain solvents.

Packaging:

Weathering Effects range is available in 40 ml./1.35 fl.oz. pots. The range of Thick Mud is available in 40 ml./1.35 fl.oz. and 200 ml./6.76 fl.oz. pots.

ES Weathering Effects es una gama de productos formulados de base agua con la cual el modelista podrá reproducir sobre maquetas y dioramas los efectos de la exposición a los elementos y la naturaleza. Las referencias se han diseñado para representar fielmente los efectos de la naturaleza y su entorno, la suciedad que pueda afectar a vehículos y elementos como vertidos o manchas de combustible; salpicaduras de barro o líquen, cubriendo una roca; humedad y verdín, recubriendo madera; manchas de petróleo en bidones y hierba aplastada por las cadenas de un carro, todavía adherida a sus eslabones. Según nuestra elección, podremos ambientar con realismo un vehículo, integrarlo en el entorno y contar toda una historia sobre su vida operativa. Se puede emplear directamente sobre el soporte. Todos los efectos secan muy rápidamente permitiendo continuar con los siguientes procesos, con la excepción de los barroes densos que dependiendo del volumen aplicado requerirán un tiempo de secado más extendido. Los utensilios se pueden limpiar con agua. Weathering Effects no es inflamable y no contiene disolventes.

Presentación:

Weathering Effects está disponible en frascos de 40 ml./1.35 fl.oz. La gama de Barro Denso está disponible en frascos de 40 ml./1.35 fl.oz. y 200 ml./6.76 fl.oz.

Splash Mud

When a vehicle drives through muddy terrain, mud splashes are inevitable. The range of Splash Mud has been formulated so that by simply blowing air through the airbrush over a brush loaded with mud, from a short distance from the model and on the specific area, realistic splash effects will be spattered all over the model. Splash Mud can also be applied using a stiff brush or stick. The range includes six different kinds of mud, manufactured with natural pigments and water-based acrylic resins, which dry to a slightly glossy finish, suggesting the humid nature of the products. The product can also be splashed on the model with an airbrush by loading a regular brush with Splash Mud and projecting air against the brush towards the model. Splash Mud is available in 40 ml./1.35 fl.oz. pots.

Cuando un vehículo se desplaza sobre terrenos encharcados o con lodo, las salpicaduras son inevitables. La formulación de la serie Splash Mud ofrece al modelista una consistencia perfecta para reproducir estos efectos, aportando detalles de realismo a las maquetas y dioramas. La gama consta de seis referencias que reproducen tonos de barro con un ligero matiz brillante siendo su uso tan simple como proyectar aire con nuestro aerógrafo sobre un pincel cargado con la mezcla, a corta distancia del modelo y sobre la zona que queremos trabajar, lo cual generará interesantes efectos de salpicaduras sobre la maqueta de gran realismo. Puede usarse también proyectándolo con la ayuda de un pincel de fibras duras y la ayuda de un palillo. Splash Mud está disponible en frascos de 40 ml./1.35 fl.oz.

Art. 73.801

European Splash Mud Salpicaduras Barro Europeo

A dark brown color most commonly observed in central European terrain and humid areas of the Mediterranean countries. Most of the non alkaline grounds present this color.

Tono marrón oscuro, con el matiz más común observado en terrenos de Europa central y zonas mediterráneas húmedas. La mayoría de terrenos no alcalinos presentan este aspecto.

Art. 73.802

Russian Splash Mud Salpicaduras Barro Ruso

A familiar shade known as Black Earth, very fertile soil, especially dark and dense, found in Eastern Europe, Ukraine and Southern Russia.

Un matiz bien conocido, especialmente oscuro observado en terrenos fértiles y llamado "Tierra Negra" en los países del este de Europa, Ucrania y sur de Rusia.

Art. 73.803

Industrial Splash Mud Salpicaduras Barro Industrial

The color of grayish mud, native to urban environments where the presence of human activity, industrial construction and decay, has caused this particular shade of sludge.

Tono de barro grisáceo, propio de entornos urbanos, donde la actividad humana y sus construcciones, las ruinas o zonas destruidas generan ese matiz que sugiere presencia humana, suciedad y actividad industrial.

Art. 73.804

Light Brown Splash Mud Salpicaduras Barro Marrón Claro

The color of mud on alkaline lands, found in dry climates of desert and Mediterranean areas which, due to their sandy nature, easily absorb the humidity.

Tono de lodo generado sobre terrenos alcalinos, de matices arenosos y que absorben la humedad con facilidad, propio de entornos secos, desérticos o mediterráneos.

Art. 73.805

Brown Splash Mud Salpicaduras Barro Marrón

Dark colored mud, typical of fertile clay terrain where humidity is retained during long seasonal periods, found mostly in Mediterranean lands and the West of Europe.

Tono oscuro, propio de zonas arcillosas y fértiles que retienen la humedad durante mucho tiempo en largos periodos estacionales, en zonas mediterráneas y del oeste de Europa.

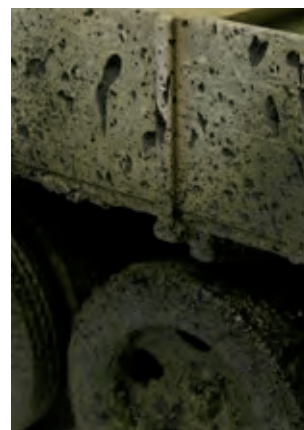

Art. 73.806

Black Splash Mud Salpicaduras Barro Negro

Very dark color, found in earth which is very rich in vegetal substratum, similar to peat, as in wooded and humid areas in North of Europe.

Tono muy oscuro propio de terrenos muy ricos en sustrato vegetal, similar a la turba, como es habitual en zonas boscosas, húmedas y del norte de Europa.

Thick Mud

The range consists of 6 products with a thick and heavy consistency and a slightly glossy finish, ideal for reproducing terrain on vignettes or dioramas, as well as for texture on the wheels of a car or truck, the lower part of vehicles, and accumulations of mud on the tank tracks. The remains of vegetation included in some of the references provide an especially realistic texture to the final aspect of the model. Thick Mud is available in 40 ml./1.35 fl.oz. and 200 ml./6.76 fl.oz. pots.

La gama consta de 6 referencias de consistencia espesa y densa, con un ligero matiz brillante ideal para reproducir terrenos sobre viñetas o dioramas así como para texturizar los bajos de un vehículo y sus ruedas, o bien las cadenas de un blindado y las acumulaciones de barro sobre el tren de rodaje. Los restos de vegetación incluidos en alguna referencia aportan un especial realismo a la textura del mismo y a su aspecto final. Thick Mud está disponible en frascos de 40 ml./1.35 fl.oz. y 200 ml./6.76 fl.oz. pots.

Art. 73.807

European Mud Barro Europeo

A dark brown color with traces of vegetation, most commonly observed in central European terrain & humid areas of the Mediterranean countries. Most of the non alkaline grounds present this aspect. European Mud is also available in 200 ml./6.76 fl.oz. (Art. 26.807).

Tono marrón oscuro que incluye trazas de vegetación con el matiz más común de los terrenos de Europa central y zonas mediterráneas húmedas. La mayoría de terrenos no alcalinos presentan este aspecto. Barro Europeo también está disponible en 200 ml./6.76 fl.oz. (Art. 26.807).

Art. 73.808

Russian Mud Barro Ruso

A familiar shade known as Black Earth, especially dark and dense, found in the very fertile soil of Eastern Europe, the Ukraine and southern Russia. Russian Mud contains traces of vegetation which add a special density and realistic texture. Russian Mud is also available in 200 ml./6.76 fl.oz. (Art. 26.808).

Un matiz bien conocido, observado en terrenos especialmente fértiles y llamado "Tierra Negra" en los países del este de Europa. Es especialmente oscuro y denso y contiene trazas de vegetación. Barro Ruso también está disponible en 200 ml./6.76 fl.oz. (Art. 26.808).

Art. 73.809

Industrial Mud Barro Industrial

The color of grayish mud, native to urban environments, where the presence of human activity, industrial construction, ruins and decay, have caused this particular shade of sludge. Industrial Mud is also available in 200 ml./6.76 fl.oz. (Art. 26.809).

Tono de barro grisáceo, propio de entornos urbanos, donde la actividad humana y sus construcciones, las ruinas o zonas destruidas generan este matiz que sugiere presencia humana, suciedad y actividad industrial. Barro Industrial también está disponible en 200 ml./6.76 fl.oz. (Art. 26.809).

Art. 73.810

Light Brown Mud Barro Marrón Claro

The color of mud occurring on alkaline lands, in dry climates of desert and Mediterranean areas, which due to their sandy nature easily absorb humidity. Light Brown Mud is also available in 200 ml./6.76 fl.oz. (Art. 26.810).

Tono de lodo generado sobre terrenos alcalinos, de matices arenosos que absorben la humedad con facilidad, propio de entornos secos, desérticos o mediterráneos. Barro Marrón Claro también está disponible en 200 ml./6.76 fl.oz. (Art. 26.810).

Art. 73.811

Brown Mud Barro Marrón

Dark colored mud, typical of fertile clay lands where humidity is retained during long seasonal periods, found mostly in Mediterranean areas and the West of Europe. Brown Mud is also available in 200 ml./6.76 fl.oz. (Art. 26.811).

Tono oscuro, propio de tierras arcillosas y fértiles que retienen la humedad durante mucho tiempo y largos periodos estacionales, en zonas del Mediterráneo y del oeste de Europa. Barro Marrón también está disponible en 200 ml./6.76 fl.oz. (Art. 26.811).

Art. 73.812

Black Mud Barro Negro

Very dark color, found in earth which is very rich in vegetal substratum, similar to peat, as in wooded and humid areas in North of Europe. Black Mud is also available in 200 ml./6.76 fl.oz. (Art. 26.812).

Tono muy oscuro propio de terrenos muy ricos en sustrato vegetal, similar a la turba, como es habitual observar en zonas boscosas y húmedas del norte de Europa. Barro Negro también está disponible en 200 ml./6.76 fl.oz. (Art. 26.812).

Engine Effects

A vehicle with an engine has many moving parts -the transmission, wheels and axis, tracks and hinges- all of them mechanisms subject to traction and movement which have to be lubricated to function correctly. In addition, the internal combustion engine needs fuel, and dust accumulates, while dirt forms a part of this mechanical and dynamic context. The range of Engine Effects offers the modeller a series of references to reproduce the fuel stains, the spilled oil (leaving a trail of drops on the vehicle panels and in the dust of the road), the marks left by the oil drums on the floor of the truck, the dirt accumulated in the engine compartment, all these to enhance the realistic aspect of the model. Engine Effects is available in 40 ml./1.35 fl.oz. pots.

Los motores tienen muchas partes móviles (ruedas, ejes, trenes de rodaje y bisagras) sometidas a tracción y desplazamientos que deben ser lubricados para su correcto uso y funcionamiento. Además, un motor a combustión interna precisa de carburante y el polvo y la suciedad se acumulan sobre el mismo formando parte de ese contexto mecánico y dinámico. La gama Engine Effects ofrece al modelista una serie de referencias para reproducir las manchas de combustible, el aceite derramado (dejando un rastro de gotas sobre las planchas del carro o en el polvo del camino), las marcas en la caja del camión de los bidones cargados de petróleo y la suciedad acumulada en el compartimento motor, para aportar el toque de realismo adecuado al modelo. Engine Effects está disponible en frascos de 40 ml./1.35 fl.oz.

Art. 73.813

Oil Stains

Manchas de Aceite

Oil stains are common around engines, hinges and all the moving parts of vehicles. The shiny look of the stains give the model a realistic aspect. Oil Stains is applied in the shape of spatters, drips or traces in specific areas.

Las manchas de lubricantes se encuentran en los motores y alrededor de los elementos móviles de los vehículos. Su tono y su acabado brillante procuran un acabado realista al modelo. Se aplica en forma de salpicaduras, goterones o trazas en zonas determinadas.

Art. 73.814

Fuel Stains

Manchas de Combustible

In combat, the refueling of tanks and trucks took place in the field, and the crews used pails, funnels, sections of hose for the job. The fuel was spilled all over, leaving characteristic traces on the vehicles.

En combate, las reposiciones de combustible se efectuaron en el campo de batalla utilizando cubos, embudos improvisados y secciones de manguera. El combustible se derramaba sin remedio dejando rastros de manchas.

Art. 73.815

Engine Grime

Suciedad de Motor

On the surfaces of the engine block, inside the engine compartments and even in areas where rests of fuel and oil accumulate, dust and dirt create a grayish layer of dust on the vehicle surface.

Sobre las superficies de un bloque motor, en su compartimento o incluso en zonas donde se han acumulado restos de carburante o aceite se acumula una suciedad mezcla del polvo de un matiz grisáceo.

Art. 73.816

Diesel Stains

Manchas de Diesel

The stains of gasoline and diesel oil do not have the same color: Diesel Stains reproduces the exact orange shade of this fuel, the streaks, traces and splashes caused by refueling with diesel in the field are perfectly reproduced.

Las manchas de carburante tipo gasolina no tienen el mismo matiz que los de gasoil. Con Diesel Stains se reproduce el tono anaranjado y transparente del gasoil representando los rastros y trazas en los vehículos.

Art. 73.817

Petrol Spills

Salpicaduras de Petróleo

Reproduces the blue-black shade of intensity observed in heavy oils, lubricants, on barrels in a truck bed and round marks left by barrels on the ground, left by flame throwers and combat vehicles.

Reproduce el matiz negro azulado que podemos observar en lubricantes y aceites pesados sobre bidones en la caja de carga de un camión, los rastros circulares en el suelo, las manchas grasientas en el expulsor de los lanzallamas, tanto de infantería como en los carros de combate.

Art. 73.818

Brown Engine Soot

Hollín de Motor

Brown Soot, a combination of dirt, rests of engine oils and dust, accumulates on engine bulkheads, on compartment walls, on the wheel housings of trains and underneath the carter and crankshafts.

Matiz marrón, resultado de suciedad acumulada, restos de lubricante y polvo, observado sobre los mamparos de motor, las paredes de sus compartimentos y los bajos de los camiones y vagones de tren.

Environment Effects

A series of references formulated to recreate the effects of the elements on vehicles, armour, constructions and terrain. Environment Effects includes grass crushed under the wheels or tracks of a tank, the remains of dirt streaking the windows of a vehicle, the humidity, the appearance of moss and lichen on stones, rust and snow, and vegetation crushed and mixed in mud on the roads of the front. The elements of nature and the effects of weather are recreated in this range to provide the modeller with the environmental setting in a quick, easy and realistic way. Environment Effects is available in 40 ml./1.35 fl.oz. pots. Snow is also available in 200 ml./6.76 fl.oz.

Una serie de referencias diseñadas para recrear los efectos de los elementos sobre vehículos, armamento, construcciones y terrenos. Environment Effects incluye la hierba aplastada por unas ruedas o las cadenas de un carro de combate, las señales de suciedad arrastrada por la lluvia sobre los cristales de un vehículo, la humedad, el verdín y los líquenes que la piedra o la madera muestran en su superficie, hasta nieve, óxido o vegetación mezclada con el barro de un camino al Frente. La naturaleza y sus elementos, las consecuencias de la intemperie, quedan recreadas con esta gama para facilitar al modelista ambientar de forma sencilla, fácil y realista. Environment Effects está disponible en frascos de 40 ml./1.35 fl.oz. Nieve también está disponible en frascos de 200 ml./6.76 fl.oz.

Art. 73.819

Rain Marks

Marcas de Lluvia

Rain carries dust and dirt over surfaces, leaving streaks on vehicles and objects, while the dust, displaced by humidity, accumulates in the joints and chinks of the model.

La lluvia arrastra el polvo y la suciedad de forma que ésta deja rastros sobre las superficies de vehículos y objetos, en forma de depósitos en hendeduras o relieves.

Art. 73.820

Snow

Nieve

Snow is an ideal texture, coating surfaces evenly or in heaped mounds, with scale & proportion suitable for all scenarios, accumulated on vehicle tracks, on a cart, on the sides of the road or the roof of a cottage. Snow is also available in 200 ml./6.76 fl.oz. (Art. 26.820).

Nieve es una textura ideal, tiene un efecto de escala y matices adecuada a cualquier viñeta, acumulada sobre las cadenas de un carro, en los márgenes de un camino o cubriendo el techo de un cobertizo o barracón. Nieve también está disponible en 200 ml./6.76 fl.oz. (Art. 26.808).

Art. 73.821

Rust Texture

Texturas de Óxido

Rust Texture reproduces a rough orange coating, the dry, flaked aspect of rusted vehicles, burned out cars, oxidized metal surface in vignettes or dioramas. Apply by brush and airbrush, needle size 0.4 and high pressure.

Reproduce los tonos anaranjados y el aspecto áspero de un vehículo quemado y abandonado, un techo metálico o un coche en un desguace. Se aplica a pincel o aerógrafo con aguja de 0.4 y presión alta.

Art. 73.822

Slimy Grime Dark

Suciedad Húmeda Oscura

Humidity generates slime and verdigris on wood, tree trunks, rocks and stone walls, moorings and pilings, in different colors, depending on the humidity. Slimy Grime Dark recreates the darkest shade, a black green.

La humedad genera moho y verdín sobre madera, cortezas de árboles, rocas y muros, embarcaderos y postes sumergidos, con variaciones de tono. Slimy Grime Dark recrea el tono más oscuro, un matiz verde negro.

Art. 73.823

Slimy Grime Light

Suciedad Húmeda Clara

The effects of humidity create textures of greenish mould and slime even on areas exposed to the sun. The lighter shade of Grime is perfect combined with Slimy Grime Dark to recreate streaking from light to dark

Los efectos de humedad crean texturas de limo y moho incluso en zonas expuestas al sol. El matiz más claro de Grime es ideal combinado con Slimy Grime Dark para reproducir una progresión de tonos de claro a oscuro.

Art. 73.824

Streaking Grime

Rastros de Suciedad

Streaking Grime achieves the effect of light dust suspended in the air or blown by the wind to accumulate into the ridges of vertical surfaces on vehicles and buildings.

Con Streaking Grime se consigue el efecto de polvo en suspensión o desplazado por el viento, depositado como una pátina de tono neutro, acumulado alrededor de hendeduras en superficies verticales, en vehículos o construcciones.

Environment Effects

Art. 73.825

Crushed Grass *Hierba Aplastada*

Crushed Grass contains traces of vegetation and reproduces the grass sticking to the wheels and tracks of vehicles, and, in dioramas, crushed and flattened by the passage of heavy armour.

Hierba Aplastada contiene trazas de vegetación y reproduce el efecto de la hierba aplastada por el paso de los vehículos, en las cadenas de un tanque o el terreno de dioramas.

Art. 73.826

Mud and Grass *Barro y Hierba*

Mud and Grass Effect contains crushed vegetation, reproduces the texture of grass and mud compacted on the tracks of tanks and the wheels of armoured vehicles.

Mud and Grass Effect reproduce la textura que resulta del tránsito de los vehículos sobre hierba y barro. Contiene trazas de vegetación aplastada. Se aplica sobre ruedas o cadenas de los vehículos de combate y sobre dioramas.

Art. 73.827

Moss and Lichen Effects *Efectos de Musgo y Líquen*

Reproduces the weathered effect, the yellow green colors and textures of lichen on stones and walls, caused by the elements. Apply with a brush or dab on with a sponge to reproduce the mottled aspect of the fungus.

Este producto reproduce el color y la textura moteada de líquen generado sobre piedras y muros. Se aplica con un pincel fino, o bien usando una pieza de esponja para reproducir el moteado.

Art. 73.828

Wet Effects *Efectos de Humedad*

Wet Effects is an all purpose weathering product, formulated to reproduce the humid aspect on models and dioramas. Can be combined with other weathering effects to increase the impression of humidity and wet weather.

Wet Effects reproduce el aspecto de humedad sobre maquetas y dioramas. Se puede combinar con otros efectos de la gama para incrementar la sensación de humedad.

Model painted
by Todd Michalak

Diorama Effects

Earth, mud, water and ground textures for the realistic reproduction of the environment

Tierra, barro, agua y texturas de terreno para reproducir con realismo entornos naturales

EN The placement of a model in a diorama or vignette gives it a reality, a background and a history, an added dimension and a reason for the humidity, the traces of mud, of the dry sand of the desert or the dark earth of the wooded landscapes of central Europe. The range of Diorama Effects offers the modeller everything needed for the reproduction of a terrain, with effects of sandy and dusty roads, or snow, mud and water, all of which add to the realism of the setting and relate the model to its environment. Diorama Effects is not flammable, and does not contain solvents.

Packaging:

The range is available in 200 ml./6.76 fl.oz. pots.

ES Situar una maqueta en un diorama, una viñeta, supone conceder a nuestro modelo o figura un escenario, una realidad y un entorno físico que dará una dimensión de ubicación, una razón a la humedad o al barro, la arena reseca de un desierto o la tierra oscura de las zonas boscosas del centro de Europa. La gama de Diorama Effects facilita al modelista los medios para reproducir terrenos, efectos de nieve, barro y agua que aportaran mayor realismo a su maqueta. Diorama Effects no es inflamable y no contiene disolventes.

Presentación:

La gama está disponible en tarros de 200 ml./6.76 fl.oz.

Water Textures

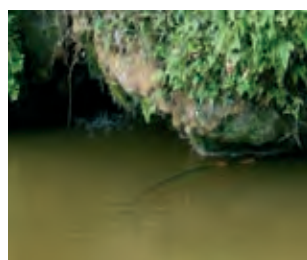

Art. 26.230

Still Water

Aguas Tranquilas

A crystal clear liquid which levels itself, even on irregular surfaces, to reproduce the effect of transparent still water. Apply in several fine layers of no more than 3 mm. thickness to prevent cracks or bubbles in the drying process. Still Water is also available in 35 ml./1.18 fl.oz. (Art. 26.235).

Producto líquido cristalino, que se extiende y autonivela incluso sobre superficies irregulares para reproducir el efecto de agua tranquila. Es aconsejable aplicarlo en finas capas de no más de 3 mm, evitando así grietas o burbujas en el proceso de secado. Aguas Tranquilas también está disponible en 35 ml./1.18 fl.oz. (Art. 26.235).

Art. 26.201

Transparent Water

Agua Transparente

Transparent gel, perfect for the reproduction of moving shallow waters, or shaping waves and peaks. Transparent Water dries to a transparent and glossy finish in about 24 hours, depending on the thickness of the application. Transparent Water is also available in 35 ml./1.18 fl.oz. (Art. 26.591).

Gel transparente, especialmente indicado para reproducir aguas poco profundas en movimiento y modelar olas y crestas. Seca en unas 24 horas, dependiendo del volumen de la aplicación, formando una película transparente y brillante. Agua Transparente también está disponible en 35 ml./1.18 fl.oz. (Art. 26.591).

Art. 26.202

Mediterranean Blue

Azul Mediterráneo

Dense blue gel, of a color similar color to the Mediterranean Sea. Due to the translucent nature of the product, it is recommended to apply it on a base previously painted with a darker color to enhance the effect of depth. The gel dries in approx. 24 hours, depending on the thickness of the application.

Gel denso azul, de matiz similar a las aguas del Mediterráneo. Debido a la naturaleza translúcida del producto se recomienda aplicarlo sobre una base pintada previamente con un color más oscuro para realzar el efecto de profundidad. Seca en unas 24 horas, dependiendo del volumen de la aplicación.

Art. 26.203

Pacific Blue

Azul Pacífico

Dense blue gel, of a similar color to the Pacific Ocean. Due to the translucent nature of the product, it is recommended to apply it on a base previously painted with a darker color to enhance the effect of depth. The gel dries in approximately 24 hours, depending on the thickness of the application.

Gel denso azul, de matiz similar a las aguas del Pacífico. Debido a la naturaleza translúcida del producto se recomienda aplicarlo sobre una base pintada previamente con un color más oscuro para realzar el efecto de profundidad. Seca en unas 24 horas, dependiendo del grosor de la aplicación.

Art. 26.204

Atlantic Blue

Azul Atlántico

Dense blue gel, of a similar color to the Atlantic Ocean. Due to the translucent nature of the product, it is recommended to apply it on a base previously painted with a darker color to enhance the effect of depth. The gel dries in approximately 24 hours, depending on the thickness of the application.

Gel denso azul, de matiz similar a las aguas del océano Atlántico. Debido a la naturaleza translúcida del producto se recomienda aplicarlo sobre una base pintada previamente con un color más oscuro para realzar el efecto de profundidad. Seca en unas 24 horas, dependiendo del grosor de la aplicación.

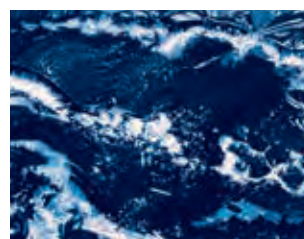

Art. 26.231

Foam

Espuma

A heavy, extra opaque white acrylic, which can be applied directly from the bottle, has been formulated for simulating raised crests on waves. The product can be sculpted with a palette knife or dry-brushed to form whirls & wakes on the surface of tinted Water gels. Dries quickly to a hard, white surface. Foam is available in 32 ml./1.08 fl.oz. bottles.

Espuma acrílica blanco denso y opaco. Se puede aplicar directamente del frasco para formar crestas de olas y modelar con espátula para formar remolinos y estelas de espuma. Sobre aguas ya pigmentadas se recomienda emplear la técnica de pincel seco. Seca rápidamente para formar una superficie blanca y dura. Espuma está disponible en botellas de 32 ml./1.08 fl.oz.

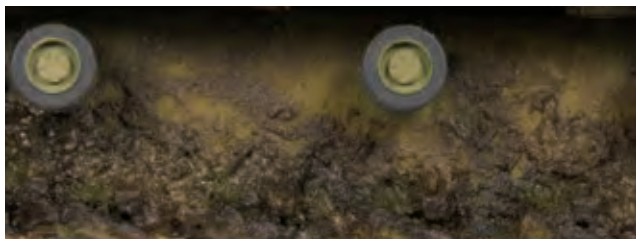

Thick Mud Textures

Art. 26.807

European Mud Barro Europeo

A dark brown color with traces of vegetation, most commonly observed in central European terrain and humid areas of the Mediterranean countries. Most of the non alkaline grounds present this color.

Tono marrón oscuro que incluye trazas de vegetación con el matiz más común observado en terrenos de Europa central y zonas mediterráneas húmedas. La mayoría de terrenos no alcalinos presentan este aspecto.

Art. 26.808

Russian Mud Barro Ruso

A familiar shade known as Black Earth, especially dark and dense, found in the very fertile soil of Eastern Europe, the Ukraine and Southern Russia. Russian Mud contains traces of vegetation which add a special density and realistic texture.

Un matiz especialmente oscuro y denso que incluye trazas de vegetación para aportar mayor realismo. Se localiza en terrenos especialmente fértiles del sur de Rusia y es conocido como "tierra negra" en Ucrania.

Art. 26.809

Industrial Mud Barro Industrial

The color of grayish mud, native to urban environments, where the presence of human activity, industrial construction, ruins and decay have caused this particular shade of sludge.

Tono de barro grisáceo, propio de entornos urbanos, donde la actividad humana y sus construcciones, las ruinas o zonas destruidas generan este matiz que sugiere presencia humana, suciedad y actividad industrial.

Art. 26.810

Light Brown Mud Barro Marrón Claro

The color of mud occurring on alkaline lands, in dry climates of desert and Mediterranean areas, which due to their sandy nature easily absorb humidity.

Tono de lodo generado sobre terrenos alcalinos, de matices arenosos que absorben la humedad con facilidad, propio de entornos secos, desérticos o mediterráneos.

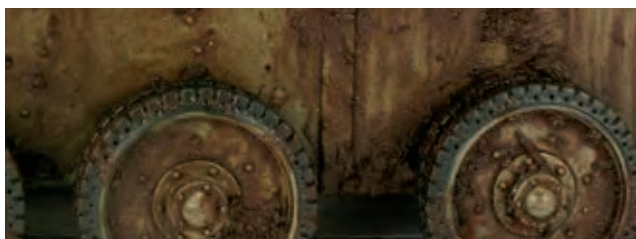

Art. 26.811

Brown Mud Barro Marrón

Dark colored mud, typical of fertile clay lands where humidity is retained during long seasonal periods, found mostly in Mediterranean areas and the East of Europe.

Tono oscuro, propio de tierras arcillosas y fértiles que retienen la humedad durante mucho tiempo y largos períodos estacionales, en zonas del Mediterráneo y del oeste de Europa.

Art. 26.812

Black Mud Barro Negro

Very dark color, seen in earth similar to peat, which is very rich in vegetal substratum, such as found in wooded and humid areas in the North of Europe.

Tono muy oscuro propio de terrenos muy ricos en sustrato vegetal, similar a la turba, como es habitual observar en zonas boscosas y húmedas del norte de Europa.

Ground Textures

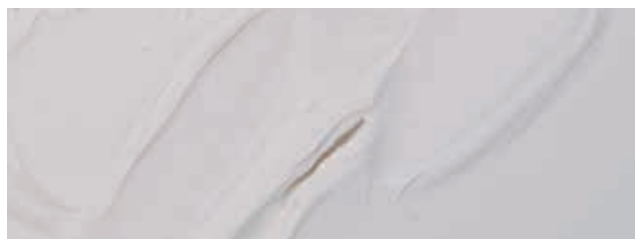

Art. 26.211

White Stone

Pasta Piedra Blanca

Finely textured smooth white marble paste. Once dry, surface can be carved and sanded. The product can be used as mortar and filler on constructions and joints.

Textura fina y lisa de color blanco. Una vez seco se puede tallar y lijar, y se puede emplear como masilla sobre edificaciones, o como mortero y relleno de uniones entre piezas.

Art. 26.212

Rough White Pumice

Piedra Pómez Blanca

Heavy paste of resin, titanium white and natural pumice, with a rough white finish, for surface building and irregular terrain, reliefs and peak.

Pasta espesa de resina, blanco de titanio y piedra pómez natural, con un acabado áspero blanco. Apto para crear superficies y terrenos irregulares, relieves y picos.

Art. 26.213

Rough Grey Pumice

Piedra Pómez Gruesa

Heavy paste of resin and natural pumice stone, with a rough grey finish, for surface building and irregular terrain, reliefs and peaks.

Pasta espesa de resina y piedra pómez natural, con un acabado áspero gris, para crear superficies y terrenos irregulares, relieves y picos.

Art. 26.215

Grey Sand

Arena Gris

Grey rough texture to reproduce the coarse terrain of dunes and rocks in arid climates. The texture is also ideal for creating surfaces of rusted metal. Grey Sand is also available in 35 ml./1.18 fl.oz. (Art. 26.232).

Pasta espesa con acabado gris áspero para reproducir entornos con dunas y relieves propios de climas áridos. Su textura es también idónea para crear superficies de metal oxidado. Arena Gris también está disponible en 35 ml./1.18 fl.oz. (Art. 26.232).

Art. 26.820

Snow

Nieve

Snow reproduces the glittery look of this element, and is an ideal medium to work with, easily coating all surfaces, evenly or in heaped mounds. The product dries in 24 hours, and further coats can be applied for more volume.

La nieve reproduce el efecto de brillo de dicho elemento así como una textura ideal para trabajarla aplicada sobre superficies o acumulaciones. Seca en 24 horas pudiendo añadir más capas para recrear efectos de volumen.

Art. 73.189

Mud & Puddles

Barro y Charcos

2 x 35 ml./1.18 fl.oz. Diorama Effects

+ 2 x 40 ml./1.35 fl.oz. Weathering Effects

A selection of 4 textures for the effects of wet Mud & Puddles on models and dioramas.

Selección de 4 texturas para crear efectos de barro húmedo y charcos en maquetas y dioramas.

Step
included

Earth Textures

Art. 26.214

Black Lava-Asphalt

Lava Negra

Black Lava has a thick and dense consistency, appropriate for volcanic grounds and for asphalt on roads and construction sites.

Textura de matiz negro intenso y de consistencia espesa y densa. Aplicado con una espátula reproduce el aspecto de asfalto en carreteras y tierra volcánica.

Art. 26.217

Desert Sand

Arena Desierto

A sand-colored, gritty acrylic paste of medium viscosity for grounds of beaches and deserts.

Producto de un matiz marrón claro, de consistencia media, que reproduce texturas de arena como playas o desiertos.

Art. 26.218

Dark Earth

Tierra Oscura

Dark Earth, the color of humid grounds, has a thick and dense consistency, appropriate for the reproduction of ground textures on diorama and vignette bases.

De matiz oscuro propio de zonas húmedas y de consistencia espesa y densa, apropiado para reproducir texturas de tierra sobre bases de dioramas o viñetas.

Art. 26.219

Brown Earth

Tierra Marrón

Brown Earth, the color of clay grounds, has a thick and dense consistency, appropriate for the reproduction of ground textures on diorama and vignette bases.

Una textura de matiz marrón propio de zonas arcillosas, de consistencia espesa y densa, para reproducir texturas de tierra, sobre bases de dioramas o viñetas.

Hobby Paint

Spray paint for metal, plastic and resin miniatures. The easiest & quickest way to get your Army fully painted and ready for battle

Pintura en spray para miniaturas de metal, plástico y resina. La manera más fácil y rápida de tener tu ejército listo para la batalla

EN The perfect combination of base coat and highly pigmented color, developed for use on all metal, plastic and resin models and miniatures. Our new original and unique spray formula leaves a perfect matt and self-levelling finish, designed to respect and bring forth even the finest details of the models and miniatures. The Hobby Paint assortment includes 3 basic colors, 19 fantasy shades, 5 WWII AFV and 4 WWII infantry colors. The colors are a perfect match to the equivalent shades available in our Game and Model Color ranges, so both painting techniques can be combined. Each Hobby Paint shows the original color applied on the colored ring around the top and is equipped with 2 different nozzles; one with a low discharge flow, especially recommended for fine lines and small details, and the other with a medium discharge flow, recommended for thicker lines and for covering larger surfaces; the low-pressure valve allows for excellent spray control. The range is complemented with 3 different varnishes: gloss, matt and satin, recommended for providing extra protection when handling your figures and to give them an overall uniform appearance.

Packaging:

The range is available in a 400 ml. / 9,31 oz. / 264 g. can.

ES Perfecta combinación de color base y color con alta concentración de pigmento para aplicar sobre miniaturas de metal, plástico o resina, con un perfecto acabado mate autorivelante. Nuestra original y exclusiva fórmula está diseñada específicamente con el objetivo de respetar y resaltar hasta el mínimo detalle de las maquetas y miniaturas. El surtido de la gama Hobby Paint incluye 3 colores para aplicar como capa base, 19 para fantasía, 5 para vehículos blindados y 4 para la infantería de la Segunda Guerra Mundial. Toda la gama está diseñada para que exista una perfecta equivalencia con su color correspondiente de las gamas Game Color o Model Color, de manera que se puedan combinar ambas técnicas de pintura. Cada spray incorpora un anillo de plástico (pintado con el mismo color del spray) para una correcta identificación del mismo, así como 2 difusores: una válvula de salida reducida, especialmente recomendada para líneas finas y pintura de detalles, y otra de salida media, especialmente recomendada para pintar líneas más gruesas y superficies de mayor tamaño. Las válvulas de baja presión permiten un excelente control del flujo del spray. La gama se complementa con 3 opciones de barniz: brillante, mate y satinado, que proporcionan una protección adicional contra el desgaste al manipular las miniaturas, así como un acabado general uniforme.

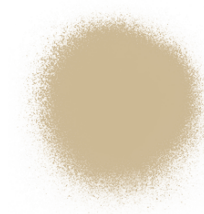

Presentación:

La gama está disponible en spray de 400 ml. / 9,31 oz. / 264 g.

Skinny Cap

Low discharge flow. Especially recommended for fine lines and small details.
Bajo flujo de descarga. Especialmente recomendado para líneas finas y pequeños detalles.

Pocket Cap

Medium discharge flow. Medium line. Recommended for thicker lines and covering larger surfaces.
Flujo de descarga medio. Línea media. Recomendada para líneas más gruesas y que cubren superficies más grandes.

Pigments

Pigments are used for weathering and ageing the finish of vehicles, armour, fortifications and structures

Los pigmentos se utilizan para envejecer y simular desgastes en los vehículos, blindajes, defensas y estructuras de las maquetas

EN A selection of natural earth and synthetic pigments which have been chosen for their permanence, their excellent light fastness, and for the extra fine milling of their particles, which facilitates the mixtures and their application on models and dioramas. The range of pigments includes a series of colors selected for representing the wear and erosion caused by the conditions of hard use and exposure on vehicles and buildings, to reproduce the dust caked on the tracks of the tanks, the rust on the armour and the wide range of effects caused by the climate and geographic conditions of deployment. Pigments can be applied in their dry form, directly by brush on the model, since they have excellent adherence; they can also be fixed in place with Thinner when used to portray dry mud or accumulated dust. With Pigment Binder, the pigments can be used to create volumes, such as accumulated dirt and mud. Painting tools are cleaned with water. Vallejo Pigments are not flammable.

Packaging:

Vallejo Pigments are available in 35 ml./1.18 fl.oz. pots (weight from 17-39 grams, depending on the pigment) with a childproof top.

ES Nuestra gama de pigmentos es una selección de tierras naturales y pigmentos sintéticos elegidos en función de su permanencia y resistencia a la luz. Los pigmentos se utilizan habitualmente para simular desgastes en todo tipo de vehículos. Los desgastes son de tipo operativo o climático y mediante el empleo de los pigmentos podemos representar múltiples efectos, como simular el polvo adherido en las cadenas y orugas de los blindados, o oxidaciones en la estructura de los blindados. La gama ha sido seleccionada por expertos modelistas con el fin de proporcionar todos los tonos necesarios para representar diferentes condiciones climáticas y geográficas en los terrenos de un diorama o de una maqueta. Los pigmentos pueden aplicarse de varias formas, aplicados a pincel sobre el modelo; en seco, pues sus características de adherencia son óptimas; fijados con Thinner, para representar barro reseco o polvo acumulado, y utilizando Pigment Binder, en el caso que el modelista desee crear un efecto de cierto volumen, como barro acumulado. Los utensilios se pueden limpiar con agua. Vallejo Pigments no es inflamable.

Presentación:

Vallejo Pigments está disponible en tarros de 35 ml./1.18 fl.oz. (aprox. 17-39 gramos según pigmento) con cierre de seguridad.

Model Wash

Model Wash is the perfect product for reproducing the weathering of surfaces exposed to harsh climatic conditions

Model Wash es el producto perfecto para reproducir los desgastes de las superficies expuestas a condiciones climáticas extremas

EN Model Wash is a range of liquid colors created with a unique water-based formula. The product provides the model painter with new techniques for rendering the processes of ageing and exposure to the elements. The range contains colors with a matt finish and of high capillarity, formulated to bring forth the minute details of the panels of the model and the contrasts produced by the wear and accumulated grime caused by operative and weather exposure. The versatility of Model Wash makes the product equally useful for a quick shading as for the creation of caked dust and dirt around the details of the model, such as rivets and panel lines. The washes are also used as a filter, applied in a uniform manner on the model to modify the base color. Model Wash can be applied by brush and airbrush and dries very quickly, after around 20 minutes the painting or weathering process can continue. Painting tools are cleaned with water. Model Wash is not flammable, and does not contain solvents.

Tip: Model Wash diluted with water or Airbrush Thinner is frequently used as a filter.

Packaging:

Available in 35 ml./1.18 fl.oz. bottles with a flip-top/eyedropper closure.

ES Model Wash, lavados formulados de base agua y acabado mate. Ofrece al modelista una nueva interpretación de los procesos de envejecimiento. Un lavado es un color muy diluido, de gran capilaridad, que se emplea para resaltar los detalles y paneles de las maquetas con la finalidad de crear un contraste habitualmente producido por el desgaste y la suciedad de origen climático u operativo. La versatilidad de los Model Wash permite su uso en forma de lavado puntual, para recrear efectos de sombra y suciedad alrededor de detalles como remaches o líneas de paneles. Se puede emplear a modo de filtro, aplicado de forma uniforme sobre una parte del modelo, para variar el matiz de fondo. Model Wash seca muy rápido y permite continuar con los procesos de pintura o envejecido transcurridos unos 20 minutos tras su aplicación. Se puede usar a pincel o a aerógrafo. Los utensilios se pueden limpiar con agua. Model Wash no es inflamable y no contiene disolventes.

Consejo: Model Wash diluido con agua o Airbrush Thinner se puede utilizar como un filtro.

Presentación:

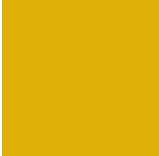

Disponible en botellas de 35 ml./1.18 fl.oz. con tapón bisagra y cuenta-gotas.

Model Wash Colors

76.501
White / Blanco

Recommended for winter, cold scenes or models painted in white.
Recomendado para escenarios de invierno, fríos y vehículos pintados en blanco.

76.503
Dark Yellow / Amarillo Oscuro

For yellow models and light colors. Also very suitable for all camouflages and natural scenes with vegetation, rivers and lakes.
Para maquetas pintadas en amarillo y colores claros. También es apto para camuflajes y escenarios naturales.

76.505
Light Rust / Óxido Claro

For rust effects and winter, cold scenes and decay or abandoned vehicles, metallic structures or all kind of metallic parts.
Para efectos de oxidación y para escenarios de invierno, deterioro en vehículos y todo tipo de partes metálicas.

76.506
Rust / Óxido

For rust effects and winter, cold scenes and decay or abandoned vehicles, metallic structures or all kind of metallic parts.
Para efectos de oxidación y para escenarios de invierno, deterioro en vehículos y todo tipo de partes metálicas.

76.507
Dark Rust / Óxido Oscuro

For rust effects and winter, cold scenes and decay or abandoned vehicles, metallic structures or all kind of metallic parts.
Para efectos de oxidación y para escenarios de invierno, deterioro en vehículos y todo tipo de partes metálicas.

76.512
Dark Green / Verde Oscuro

For all models painted in green. Also perfect for camouflage colors and natural scenes with vegetation, rivers and lakes.
Para maquetas pintadas en verde. También es apto para camuflajes y escenarios naturales con vegetación, ríos y lagos.

76.513
Brown / Marrón

For models painted in light or sand colors, ideal for application on tank tracks and pin washes.
Para modelos pintados en colores claros y tonos arena. Idóneo para orugas de tanques y para pequeños detalles ("pin wash").

76.514
Dark Brown / Marrón Oscuro

For models painted in light or sand colors, ideal for application on tank tracks and pin washes.
Para modelos pintados en colores claros y tonos arena. Idóneo para orugas de tanques y para pequeños detalles ("pin wash").

76.515
Light Grey / Gris Claro

For models painted in grey and dark colors; they are also perfect for rain marks and pin washes.
Para modelos pintados en gris y colores oscuros, perfectos para marcas de lluvia y para pequeños detalles ("pin wash").

76.516
Grey / Gris

For models painted in grey and dark colors; also perfect for rain marks and pin washes.
Para modelos pintados en gris y colores oscuros, perfectos para marcas de lluvia y para pequeños detalles ("pin wash").

76.517
Dark Grey / Gris Oscuro

For models painted in grey and dark colors; also perfect for rain marks and pin washes.
Para modelos pintados en gris y colores oscuros, perfecto para marcas de lluvia y para pequeños detalles ("pin wash").

76.518
Black / Negro

For ultra dark washes and pin washes in the most recessed areas or parts.
Para colores muy oscuros y pequeños detalles en las juntas y remaches de la maqueta.

76.519
Olive Green / Verde Oliva

Recommended for adding shadows around rivets or recessed details on vehicles painted in Olive Green or faded Pale Green.
Para añadir sombras alrededor de remaches o detalles hendidos sobre vehículos pintados en Verde Oliva o Verde Claro desgastado.

76.520
Dark Khaki Green / Verde Caqui Oscuro

Used to produce depth effects and natural shadows on vehicles painted with a khaki base color or light camouflage tones.
Para reproducir efectos de profundidad y sombreado natural sobre vehículos con base caqui o camuflajes de tonos claros.

76.521
Oiled Earth / Tierra Engrasada

Reproduces the effects of accumulated dirt when oil, grease & fuel are combined with caked dust on vehicles, wheels and other moving parts.
Para efectos de suciedad acumulada sobre los vehículos al mezclarse aceite, grasa o carburante con el polvo seco, tanto sobre ruedas como partes móviles.

76.522
Desert Dust / Tierra Desierto

Represents the natural accumulation of dust on vehicles painted with light or dark colors, especially in dry and desert climates.
Para vehículos localizados en ambientes secos y desérticos, tanto de tonos claros como oscuros en su pintura de base, representando su acumulación natural.

76.523
European Dust / Tierra Europea

Recommended for all types of vehicles; the wash represents the most common tones of dust in central and eastern Europe.
Recomendado para todo tipo de vehículos ubicados en el Teatro Europeo de Operaciones, representando el tono más común del centro y oeste de Europa.

76.524
Blue Grey / Gris Azulado

Wash indicated for vehicles with a Panzer Grey base color, as well as all vehicles with a similar grey base.
Recomendado para vehículos de base Panzer Grey así como todo tipo de vehículos de base similar.

Chipping Medium Medium de Desgaste

Water-based Medium to create flaked paint, scratches, and rust chips. Can be applied with airbrush or brush to create chipping effects with water-based acrylic colors.

Medium acrílico para la creación de roces, desgastes y desconchados. Se aplica con aerógrafo o pincel para crear efectos de desconchados con colores acrílicos.

Packaging:
73.214: 17 ml./0.57 fl.oz.
76.550: 35 ml./1.18 fl.oz.

Surface Primer

Primers for a tough and very resistant finish, formulated with acrylic polyurethane resin in a water-based formula

Imprimación de gran resistencia y dureza, formulados con resina de poliuretano de base agua

EN Surface Primer is available in a range of basic shades most frequently employed to prepare the surface of the model or miniature before starting the painting process. Primers can be applied on all surfaces, resin, PVC, brass, white metal or wood. The primer preserves even the smallest detail of a model, and improves the adherence of the colors applied on the base. It is recommended to apply the Primer in various layers; the product dries rapidly and forms a homogenous film of extraordinary strength and resistance within a few hours after its application. Surface Primer can be used directly or diluted with Airbrush Thinner or Flow Improver. The recommended compressor settings are around 15-20 PSI or 0.5 to 1 kg. For best maintenance of the airbrush, it is recommended to use Airbrush Cleaner. Surface Primer is not flammable, and does not contain solvents.

Packaging:

Available in 17 ml./0.57 fl.oz. bottles (with eyedropper) and in larger sizes of 60 ml./2.02 fl.oz. and 200 ml./6.76 fl.oz. (with flip-top and eyedropper).

ES Imprimaciones acrílicas mates especialmente formuladas para aerografía. La imprimación es la primera capa de color que se aplica sobre la maqueta con la finalidad de preparar la superficie para los procesos de pintura posteriores. Surface Primer no oculta los detalles de la maqueta y se puede aplicar sobre diversas superficies como resina, pvc, latón, metal blanco o madera. Con el fin de garantizar una excelente adherencia es necesario aplicarlo sobre una superficie previamente "desengrasada", por tanto es recomendable lavar la maqueta o la figura antes de imprimarla con la finalidad de retirar los restos de sustancias desmoldantes. Las imprimaciones se aplican por capas de forma sucesiva, y secan rápidamente formando una película homogénea de extraordinaria dureza y resistencia transcurridas unas horas tras su aplicación. Se pueden usar directamente o diluido con nuestro Airbrush Thinner o Flow Improver. Los ajustes del compresor recomendados para nuestros colores rondan los 15 - 20 PSI o 0.5 a 1 kg. Para un correcto mantenimiento del aerógrafo recomendamos emplear Airbrush Cleaner. Surface Primer no es inflamable y no contiene disolventes.

Presentación:

Disponible en botellas de 17 ml./0.57 fl.oz. (con cuentagotas), y botellas de 60 ml./2.02 fl.oz. y 200 ml./6.76 fl.oz. (con tapón bisagra y cuentagotas).

Premium RC Color

Acrylic airbrush colors. Suitable for all surfaces, especially for metals, fibreglass, polyethylene, clear Lexan^a polycarbonate, slot car and RC bodies

Pintura acrílica para aerógrafo. Para todas superficies, especialmente para metales, fibra de vidrio, polietileno, polycarbonato Lexan, Slot y carrocerías RC

EN Premium is a range of acrylic colors specifically designed for airbrushing and for optimum adherence on surfaces such as fiberglass, polyethylene, polycarbonate, metal and Lexan. Premium has been formulated with permanent pigments and a new, extremely resistant hybrid resin of acrylic-polyurethane. The Premium range contains matt and opaque, transparent, metallic, and fluorescent colors and includes specific varnishes and auxiliary products. Premium is especially recommended for painting motorcycle helmets, fuel tanks, surfboards and similar surfaces exposed to hard wear, and resists impacts and cracking as well as direct exposure to heat. The Premium colors resist fuel residue proof (as used in RC) of up to at least 35% Nitro. It is recommended to apply Premium in successive layers on previously primed surfaces. A few hours after application, the Premium colors will form a homogenous film of extraordinary strength and resistance. The recommended compressor settings are around 15-20 PSI, or 0.5 to 1 kg. To obtain especially resistant protection, a final (2K) urethane varnish is recommended (applied by aerosol or airbrush). Painting tools can be cleaned with water. Premium Color is not flammable, and does not contain solvents.

Packaging:

Available in flip-top bottles of 60 ml./2.02 fl.oz. and 200 ml./6.76 fl.oz.

ES Colores acrílicos especialmente formulados para aerografía, con una óptima adherencia sobre superficies como fibra de vidrio, polietileno, polycarbonato, metal y Lexan. Premium ha sido elaborado con pigmentos permanentes y una nueva resina híbrida acrílico-poliuretánica de gran resistencia. La gama Premium está formada por colores mates y opacos, transparentes, metalizados, fluorescentes y auxiliares específicos de la línea. Premium está especialmente indicado para pintar cascos, depósitos de motos, tablas de surf y otras superficies expuestas a grandes desgastes, y resiste impactos y agrietamientos, así como la exposición directa al calor. Los colores Premium permanecen inalterables a mezclas de combustible empleadas en R/C (hasta 35% nitro). Se recomienda aplicar Premium en sucesivas capas sobre superficies previamente imprimadas; se puede aplicar directamente o diluido con el AV Premium Reducer. Los colores forman una película homogénea de extraordinaria dureza y resistencia transcurridas unas horas tras su aplicación. Los ajustes del compresor recomendados rondan los 15-20 PSI o 0.5 a 1 kg. Para una protección especialmente resistente se recomienda un barniz final uretánico (2K). Los utensilios se pueden limpiar con agua. Premium Color no es inflamable y no contiene disolventes.

Presentación:

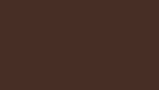

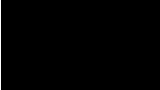

Disponibile in botellas de 60 ml./2.02 fl.oz. y 200 ml./6.76 fl.oz., con tapón bisagra.

Airbrush Mediums

Packaging:
Presentación:

	Airbrush Flow Improver Medium designed to improve the flow and delay the drying of paint on the needle while airbrushing. It is recommended to add 1-2 drops of Flow Improver to 10 drops of paint in the cup of the airbrush.	<i>Airbrush Flow Improver</i> <i>Médiu formulado para mejorar la fluidez de la pintura y retrasar su secado en el aerógrafo. Recomendamos añadir 1-2 gotas de Flow Improver a 10 gotas de pintura dentro de la copa del aerógrafo.</i>	71.262 17 ml./0.57 fl.oz. 71.362 32 ml./1.08 fl.oz. 71.462 60 ml./2.02 fl.oz. 71.562 200 ml./6.76 fl.oz.
	Airbrush Cleaner An indispensable product for cleaning the airbrush. It not only eliminates rests of the color used, but at the same time lubricates the interior of the airbrush without damaging the mechanism.	<i>Limpiador Aerógrafo</i> <i>Imprescindible para la limpieza del aerógrafo. Elimina restos del color y lubrica los mecanismos del aerógrafo sin deteriorarlos.</i>	71.099 85 ml./2.87 fl.oz. 71.199 200 ml./6.76 fl.oz.
	Airbrush Thinner Thinner is used to extend the colors, increase fluidity and delay their drying time. It does not alter the properties of the colors. We recommend the addition of a few drops of Thinner to the colors while airbrushing.	<i>Diluyente Aerógrafo</i> <i>Diluye el color sin perder las cualidades de adhesión, dureza y consistencia. Aumenta la fluidez y transparencia de la pintura y retrasa el secado de la misma. Se recomienda añadir algunas gotas de Diluyente durante el aerografiado</i>	71.261 17 ml./0.57 fl.oz. 71.061 32 ml./1.08 fl.oz. 71.361 60 ml./2.02 fl.oz. 71.161 200 ml./6.76 fl.oz.

Mediums

	Thinner Medium Thinner used to extend the colors, increase fluidity and delay their drying time. It does not alter the properties of the colors.	<i>Diluyente</i> <i>Diluye el color sin perder las cualidades de adhesión, dureza y consistencia. Aumenta la fluidez y transparencia de la pintura.</i>	70.524 17 ml./0.57 fl.oz. 73.524 60 ml./2.02 fl.oz.
	Matt Medium Extends the colors, increases their fluidity and transparency, and softens the blending of brush strokes. It heightens the flexibility of the colors, and their adhesion to the surface. Does not yellow or change tonality of the color. Can also be used as a binder for dry pigment.	<i>Medium Mate</i> <i>Mezclado con los colores aumenta su fluidez y transparencia, facilita difuminar las pinceladas, mejora la flexibilidad y su adhesión al soporte. No amarillea ni cambia de tonalidad. También se puede utilizar para mezclar con pigmentos.</i>	70.540 17 ml./0.57 fl.oz. 73.540 60 ml./2.02 fl.oz.
	Gloss Medium Extends the colors, increases their fluidity and transparency, and softens the blending of brush strokes. It heightens the flexibility of the colors, and their adhesion to the surface. Does not yellow or change tonality of the color. Can also be used as a binder for dry pigment.	<i>Medium Brillante</i> <i>Mezclado con los colores aumenta su fluidez y transparencia, facilita difuminar las pinceladas, mejora la flexibilidad y su adhesión al soporte. No amarillea ni cambia de tonalidad. También puede ser utilizado para mezclar con pigmentos en polvo.</i>	70.470 17 ml./0.57 fl.oz. 73.470 60 ml./2.02 fl.oz.

Mediums

Packaging:
Presentación:

	Metal Medium An acrylic medium formulated with mica, can be mixed with acrylic colors to create an iridescent lustre or applied by itself for a silvery iridescent effect.	Medium Metálico <i>Medium acrílico con mica, se puede mezclar con los colores para crear reflejos nacarados o utilizar sólo para conseguir efectos plateados e iridiscentes.</i>	70.521 17 ml./0.57 fl.oz.
	Retarder Medium Delays drying time of colors. Mix a few drops with the color or dip the brush into retarder on the palette. Colors will not change their consistency. Useful for "wet on wet" techniques and to stop the top layer of paint from drying.	Retardante de Secado <i>Retrasa el tiempo de secado de los colores. Se emplea mezclando unas gotas con los colores, o bien, humedeciendo el pincel con el mismo. También es útil para técnicas de "mojado sobre mojado" y para evitar el secado de la capa superficial de la pintura. Los colores no cambian su consistencia.</i>	70.597 17 ml./0.57 fl.oz. 73.597 60 ml./2.02 fl.oz.
	Glaze Medium A colorless glaze, used to mix with acrylic colors; improves fluidity, increases transparency, and slows drying time. Ideal for shadows, shadings, glazes and working with pigments.	Medium Veladuras <i>Patina incolora que se emplea para veladuras de secado lento, también se emplea en técnicas que requieren un tiempo de secado retrasado. Ideal para efectos con pigmentos.</i>	70.596 17 ml./0.57 fl.oz. 73.596 60 ml./2.02 fl.oz.
	Pigment Binder Water-based acrylic binder for pigments. Dries slowly, allows more time to manipulate pigment. Matt finish.	Fijador de Pigmentos <i>Fijador para pigmentos de base agua y secado lento. Proporciona más tiempo para manipular el pigmento. Acabado mate.</i>	26.233 35 ml./1.18 fl.oz.
	Brush Cleaner Cleaner for brushes which have been used with alcohol based paints (Liquid Gold, Supergold) and brushes which simply need a more thorough cleaning. Will not damage even the finest Kolinsky Sable brushes.	Limpiador de Pinceles al alcohol <i>Se emplea para limpiar pinceles que se han utilizado con pinturas a base de alcohol (Oros Líquidos) o para pinceles que necesitan una limpieza más profunda. No daña los pinceles de marta, se puede utilizar con todo tipo de pinceles.</i>	28.900 85 ml./2.87 fl.oz.
	Brush Restorer Softens and restores all fine sable brushes used for watercolors, miniatures, silk painting, etc. Does not contain alcohol.	Restaurador de Pinceles <i>Líquido para suavizar y restaurar pinceles, especialmente indicado para los pinceles de marta. No contiene alcohol.</i>	28.890 85 ml./2.87 fl.oz.

Auxiliary Products/Productos Auxiliares

Effect Mediums

Packaging:
Presentación:

	Crackle Medium Water-based medium, used between two coats of paint to create a weathered effect, or as a final coat to create a transparent crackled surface.	Medium para craquelar Un producto de base agua que se emplea entre dos capas de pintura o como capa final para un craquelado transparente. Utilizado para simular superficies envejecidas.	70.598 17 ml./0.57 fl.oz.
	Liquid Mask Forms a protective film on the area of the model which the modeller does not want to paint, especially useful in airbrush techniques. Once the work is dry, Liquid Mask is rubbed off with an eraser or piece of cloth, revealing the unpainted area.	Máscara Líquida Forma una película protectora sobre la zona del modelo que no se desea pintar, especialmente útil en técnicas de aerografía. Una vez terminado el trabajo, se retira la máscara con el dedo, con un trapo de algodón o una goma de crepé.	70.523 17 ml./0.57 fl.oz. 28.851 32 ml./1.08 fl.oz. 28.850 85 ml./2.87 fl.oz.
	Decal Softener Protects and smoothes the decal so that it blends with the surface of the model. It also softens the decal to adapt it to surface details such as recessed lines, raised edges, screws or bolts. The amount of coats needed depends on the quality and thickness of the decal. Final varnish can be applied to the Decal if desired. * Decal Softener contains alcohol and is flammable.	Ablandador de Calcas Protege y ablanda la calca para que pueda adaptarse a la superficie del modelo. Al ablandar la calca, ésta se adapta a detalles de superficie de la maqueta como líneas de paneles, relieves, tornillos o remaches. La cantidad de capas a aplicar dependerá de la calidad y grosor de las calcas. De manera opcional, podemos añadir una capa final de barniz sobre la calca. * Ablandador de Calcas contiene alcohol y es inflamable.	73.212 17 ml./0.57 fl.oz.
	Decal Fix Cleans and prepares the model surface before placing decals and wet transfers, improves adherence of the decal, and prevents formation of air bubbles without need for a previous coat of varnish. Apply Decal Fix with a soft brush on model surface, gently slide decal from its paper support and with a wet brush tip place decal on the model, pressing down lightly with the brush to eliminate excess liquid and avoid air bubbles. Remember the result depends on the quality of the brand of decals.	Fijador de calcas Limpia y prepara la superficie del modelo antes de colocar sobre el mismo transfers húmedos y calcas, mejorando la adherencia de las mismas, previniendo la formación de burbujas y sin necesidad de barnizar previamente la superficie. Aplicaremos Decal Fix usando un pincel suave, deslizaremos la calca desde el papel soporte utilizando la punta de un pincel humedecido, hasta situarla en la zona deseada, presionando luego con el mismo para eliminar el exceso de producto y evitar burbujas. Debemos recordar que los resultados dependen de la calidad de la marca que comercialice las calcas.	73.213 17 ml./0.57 fl.oz.
	Plastic Putty A modelling paste which dries to a white, totally opaque, stone hard finish. It is used principally for rebuilding or restoring models and miniatures, for textures and high reliefs.	Masilla Plástica Se emplea principalmente en la elaboración y la reestructuración de modelos, trazado de relieves, decoración de superficies, reparación y restauración de maquetas.	70.400 17 ml./0.57 fl.oz. 70.401 (tube) 20 ml./0.67 fl.oz.
	Chipping Medium Water-based medium to create flaked paint, scratches, and rust chips. Can be applied with airbrush or brush to create chipping effects with acrylic colors.	Medium de Desgaste Medium de base agua, para la creación de roces, desgastes y desconchados. Se aplica con aerógrafo o pincel para crear efectos de desconchados con colores acrílicos.	73.214 17 ml./0.57 fl.oz. 76.550 35 ml./1.18 fl.oz.

	Acrylic Gloss Varnish Water-based acrylic varnish with a quick drying formula, and an acrylic resin of extraordinary hardness and permanence. Protects painted models from dust and scratches, dirt and humidity.	Barniz Acrílico Brillante Barniz acrílico de base agua con una formulación de secado rápido y una resina acrílica de dureza y permanencia extraordinarias. Protege las miniaturas contra el polvo y el roce.	70.510 17 ml./0.57 fl.oz. 26.517 60 ml./2.02 fl.oz. 28.517 500 ml./16.9 fl.oz.
	Acrylic Matt Varnish Water-based acrylic varnish with a quick drying formula, and an acrylic resin of extraordinary hardness and permanence. Protects painted models from dust and scratches, dirt and humidity.	Barniz Acrílico Mate Barniz acrílico de base agua con una formulación de secado rápido y una resina acrílica de dureza y permanencia extraordinarias. Protege las miniaturas contra el polvo y el roce.	70.520 17 ml./0.57 fl.oz. 26.518 60 ml./2.02 fl.oz. 28.518 500 ml./16.9 fl.oz.
	Acrylic Satin Varnish Water-based acrylic varnish with a quick drying formula, and an acrylic resin of extraordinary hardness and permanence. Protects painted models from dust and scratches, dirt and humidity.	Barniz Acrílico Satinado Barniz acrílico de base agua con una formulación de secado rápido y una resina acrílica de dureza y permanencia extraordinarias. Protege las miniaturas contra el polvo y el roce.	70.522 17 ml./0.57 fl.oz. 26.519 60 ml./2.02 fl.oz. 28.519 500 ml./16.9 fl.oz.
	Polyurethane Varnish Permanent and very resistant. Dries to touch in one hour. For application of two coats of varnish, we recommend an interval of 4 hours. Can be used directly with brush or airbrush of needle size 0.4 mm. without dilution. Clean up with soap and water.	Barniz Poliuretano De base agua, permanente y muy resistente. Seca al tacto en una hora. Para aplicar dos capas de barniz recomendamos un intervalo de 4 horas. Se puede emplear directamente a pincel o a aerógrafo de 0.4 mm. sin necesidad de diluir. Limpieza con agua y jabón.	Gloss/Brillante 26.650: 60 ml./2.02 fl.oz. 27.650: 200 ml./6.76 fl.oz. Matt/Mate 26.651: 60 ml./2.02 fl.oz. 27.651: 200 ml./6.76 fl.oz. Satin/Satinado 26.652: 60 ml./2.02 fl.oz. 27.652: 200 ml./6.76 fl.oz.
	Acrylic Aerosol Varnish Quick protection for painted models. Should not be applied until paint has dried completely. It is recommended to apply fine coats at approximately 30 minute intervals. Does not contain CFC.	Barniz acrílico en Aerosol Barniz acrílico de base agua. Se recomienda aplicar una vez la pintura se haya secado por completo, en capas finas con intervalos de 30 minutos. No contiene CFC.	Gloss/Brillante 28.530: 400 ml./13.52 fl.oz. Matt/Mate 28.531: 400 ml./13.52 fl.oz. Satin/Satinado 28.532: 400 ml./13.52 fl.oz.

Vallejo Scenics

Diorama bases of lightweight resin and a matt white finish for modelling projects

Bases de diorama de resina ligera y acabado blanco mate para crear maquetas

Diorama Bases

EN Vallejo Scenics is a new range with an initial selection of diorama bases for the setting of figures and vehicles in scale 1/35. The bases are precast in a novel and exclusive type of lightweight resin, which has a matte white finish, is easy to cut and adapt to different sizes, and permits sanding and painting as well as any further weathering processes. The first six references now available can be used as a simple base or can be further enriched with shrubbery, trees, telegraph posts, street lights, military equipment and figures, or with sections of ruined walls and buildings, using as many complements as considered right for the suggested scenery.

ES Vallejo Scenics es una nueva gama de bases para dioramas diseñadas para crear ambientación en vehículos y figuras. A una escala de 1/35 y moldeadas en una nueva resina ligera de acabado blanco mate, que permite el lijado fácil y la utilización de pintura para obtener diversos procesos posteriores de weathering. Es fácil de cortar y adaptar al tamaño que pueda necesitar el modelista. Iniciamos la serie con seis referencias que pueden utilizarse como base directa sobre la que incluir vehículos, figuras y tantos complementos como el modelista decida, así como base para ubicar fácilmente secciones de edificios, ruinas, muros, ambientación natural o urbana, árboles, postes telegráficos, farolas, equipamiento

Art. SC001

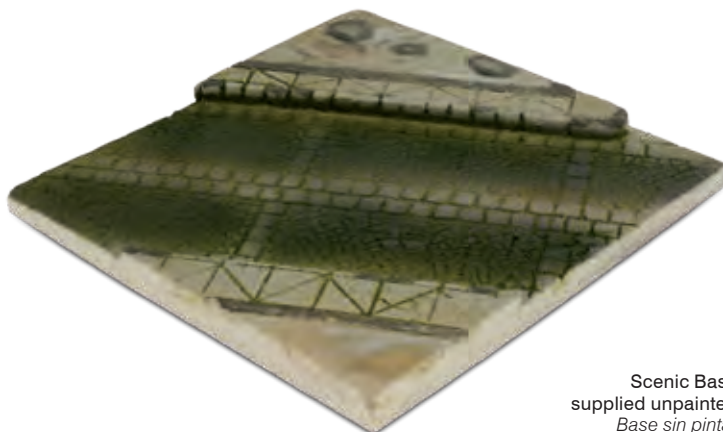

Paved street section

Base urbana

14x14 cm./5,51x5,51 in.

An ideal base for placing a vehicle, for cars and small or medium size tanks, motorcycles or figures, civilian as well as military, and for complementing these with a series of details such as undergrowth, street lights or telegraph poles.

Base ideal para colocar vehículos de ruedas ligeros, carros de combate de tamaño medio o pequeño, coches, motocicletas o figuras, tanto civiles como militares, pudiendo complementar la misma con toda una serie de detalles según el criterio del modelista: farolas, postes telegráficos, etc.

Scenic Base
supplied unpainted
Base sin pintar

Art. SC002

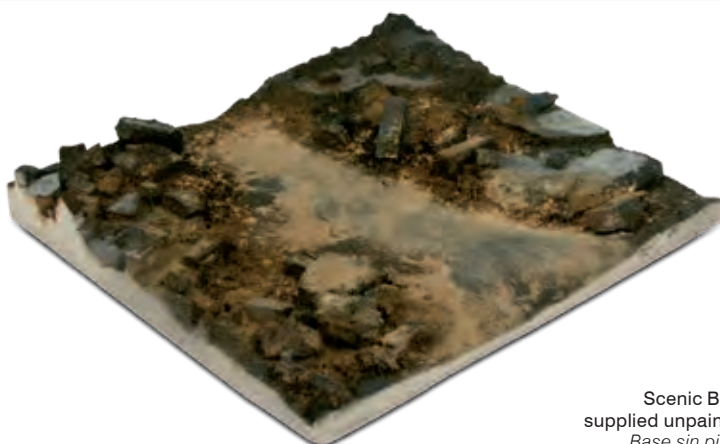

Rubble street section

Base escombros

14x14 cm./5,51x5,51 in.

Section of road, cleared amidst ruins, appropriate for placing the remains of a destroyed vehicle, perhaps accompanied by figures and troops in movement, or with science fiction or fantasy themes, any of these can be situated in this environment while the modeller adds as many details as considered suitable and in context.

Sección de camino despejado entre ruinas. Perfecta para situar restos de vehículos destruidos con figuras, tropas en movimiento, o incluso adecuando temáticas de Ciencia Ficción o Fantasía, pudiendo añadir tantos complementos como el modelista desee para crear el entorno adecuado.

Art. SC102

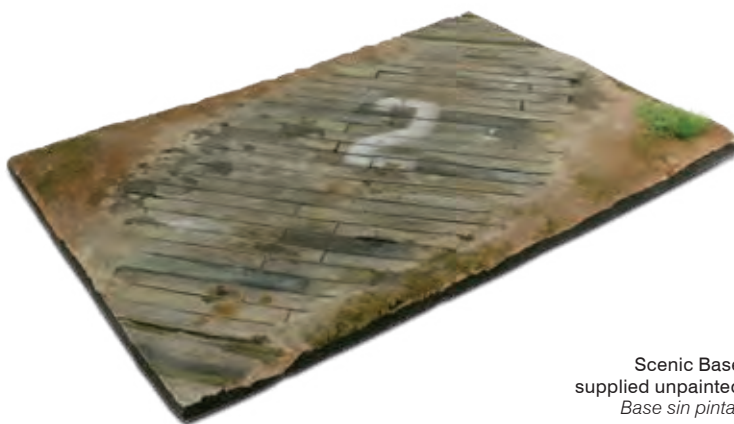

Wooden airfield surface

Base aérea de madera

31x21 cm./12,20x8,26 in.

This base, an improvised section of wooden planks, is a landing area for aircraft in 1/48 scale which also permits the placement of any type of vehicle in scale 1/35. The base has the texture of weathered wood, as well as an area of ground next to the wood surface.

Esta base nos permite ubicar cualquier tipo de vehículo a escala 1/35 sobre una improvisada sección de entablado, apta también en este caso para aviones a escala 1/48, representando la textura de madera desgastada, así como las zonas de terreno cercano a la sección de madera.

Scenic Base
supplied unpainted
Base sin pintar

Art. SC103

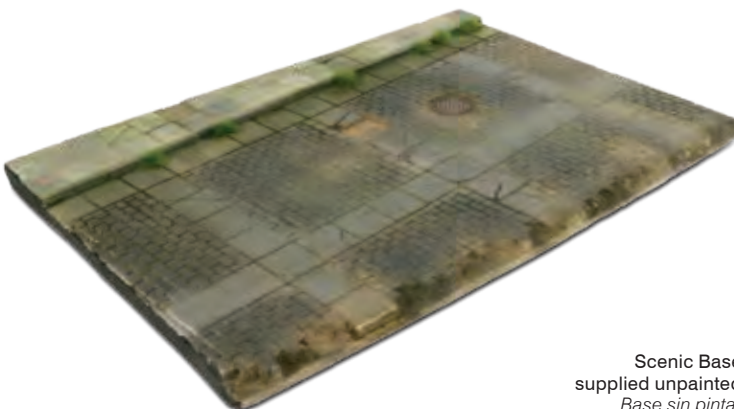

Cobblestone street with drain

Base empedrado con alcantarilla

31x21 cm./12,20x8,26 in.

A base for city environment which shows a cobblestone pavement with realistic details. The size of this street allows for the placement of the model of a tank, of various light vehicles or of a combination of models to create a complete scene.

Base de ambientación urbana mostrando un detallado pavimento en forma de adoquinado con varios acabados de gran realismo. Su tamaño permite ubicar un modelo de carro de combate en un amplio espacio, e incluso varios vehículos ligeros o una combinación de modelos creando una escena compleja.

Scenic Base

Doce Bidones de 20 litros usados por la Wehrmacht durante la WWII, tanto para el transporte de agua como el de combustible.

Art. SC208
IDF jerrycan set
Set de bidones de gasolina IDF

(x12)

12 Jerrycans for up to 20 liters of fuel, used by the Israeli Defense Forces as standard equipment on vehicles and for general transport of fuel.

12 bidones de 20 litros usados por las Fuerzas de Defensa de Israel como equipamiento en vehículos y transporte de combustible.

Art. SC209

Modern gas bottles

Bombonas de gas modernas

(x11)

Twelve assorted gas bottles of different sizes and with great detail, including some units with separate covers which show the specifics of the valves.

Surtido de doce bombonas de gas de diversa capacidad y gran detalle. Incluye tapones por separado de algunas unidades mostrando el detalle de las válvulas.

Art. SC210

Modern plastic drums (N.1)

Bidones de plástico modernos (Nº1)

(x4)

Four modern plastic drums with safety closures, for transporting different liquid substances.

Cuatro bidones modernos en material plástico para el transporte de diversas sustancias líquidas y cierre de seguridad.

Art. SC211

Assorted modern plastic drums (N.2)

Surtido bidones de plástico modernos (Nº2)

(x14)

Ten assorted modern plastic drums used for transport of liquids, in different sizes, from size 10 to 50 liters and 50 to 120 liters.

El set incluye diez bidones, un surtido de diversos formatos en material plástico, para el transporte de líquidos, desde de 10 y 50 litros a 50 y 120 litros.

Art. SC212

Garbage bins (N.1)

Cubos de basura (Nº1)

(x3)

Three metal garbage bins of contemporary design, including separately the covers for the bins.

Tres cubos de basura metálicos de diseño contemporáneo. Incluye las tapas de los mismos por separado.

Art. SC213

Assorted garbage bins (N.2)

Cubos de basura (Nº2)

(x4)

Four units of metal garbage cans, each of different design and capacity and with much detail, ideal for setting a scene.

Cuatro unidades de cubos de basura metálicos, de diseño y capacidad variada, de gran detalle e ideales para crear ambientación.

Art. SC214

Concrete barriers

Barreras de cemento

(x4)

Four units of concrete barriers type "New Jersey", a modern design in current usage which is ideal for setting a scene.

Cuatro unidades de barreras de cemento tipo "New Jersey", de diseño moderno y de uso en la actualidad. Ideal para crear ambientación.

Art. SC215

Damaged concrete barriers

Barreras de cemento dañadas

(x4)

Four units of damaged concrete barriers type "New Jersey", a modern design, showing the effects of impact and collision, ideal for setting a scene.

Cuatro unidades de barreras de cemento tipo "New Jersey" dañadas, de diseño moderno, mostrando impactos y roturas. Ideal para crear ambientación.

Art. SC216

Urban street poles (N.1)

Bolardos urbanos (Nº1)

(x6)

Six stone poles, type number 1, the perfect detail for creating an urban scene with sidewalks, crossings and entry ways or portals.

Seis bolardos en piedra, modelo nº 1. Detalle de ambientación ideal en bases urbanas, aceras, accesos o umbrales de puertas o portones.

Art. SC217

Urban street poles (N.2)

Bolardos urbanos (Nº2)

(x6)

Six stone poles, type number 2, the perfect detail for creating an urban scene with sidewalks, crossings and entry ways or portals.

Airbrushes

Highest quality airbrushes
for hobby and miniatures

Aerógrafos de alta calidad
para modelismo y hobby

EN Vallejo has added a selection of airbrushes to our range of products. The airbrushes are manufactured by Harder & Steenbeck, a well-known German company specialized in manufacturing high-quality airbrushes which are valued for their precision, easy handling and outstanding performance.

ES Vallejo comercializa una selección de aerógrafos producidos por Harder & Steenbeck, reconocida empresa alemana que elabora aerógrafos de alta calidad, cuya marca es sinónimo de garantía para profesionales del Hobby y el Modelismo, muy valorados por su precisión y fácil manejo.

Art. 135503

Ultra Airbrush Aerógrafo Ultra

The Ultra airbrush is the original standard instrument made by Harder & Steenbeck. It is provided with independent, gravity fed double action function. The Ultra includes a Nozzle set of 0.2 mm. and 2 ml. cup.

El aerógrafo Ultra es el modelo estándar de iniciación de Harder & Steenbeck. Incluye una función de doble acción independiente alimentada por gravedad. El Ultra incluye set de boquillas de 0.2 mm y un depósito de 2 ml.

Airbrushes

Art. 135533

Ultra "2 in 1" Airbrush Aerógrafo Ultra "2 en 1"

The Ultra airbrush is the original standard instrument made by Harder & Steenbeck. It is provided with independent, gravity fed double action function. The "2 in 1" includes a Nozzle set of 0.2 and 0.4 mm and two cups of 2 and 5 ml.

El aerógrafo Ultra es el modelo estándar de iniciación de Harder & Steenbeck. Incluye una función de doble acción independiente alimentada por gravedad. El "2 en 1" incluye dos sets de boquillas de 0.2 mm y 0.4 mm y dos depósitos intercambiables de 2 y 5 ml.

Art. 133003

Evolution Airbrush Aerógrafo Evolution

The Evolution "2 in 1" is a success story among paint sprayers: a solid system structure, excellent processing and a smooth double-action function have made this instrument one of the most widely-used airbrushes since it was introduced. The Evolution is a gravity feed system available as a "2 in 1" model as each has two nozzle sets in different sizes and enable rapid and flexible conversion of the instrument for all areas of application. The "2 in 1" includes a Nozzle set of 0.2 and 0.4 mm and two cups of 2 and 5 ml.

El modelo Evolution "2 en 1" es un éxito entre los aerógrafistas tanto profesionales como aficionados: su sólida estructura, excelentes prestaciones y su función de doble acción independiente han convertido a dicho modelo en uno de los aerógrafos más utilizados por los usuarios desde su introducción. El "Evolution" funciona alimentado por gravedad, versátil y de rápida conversión para adaptarse a cualquier área de aplicación. El "2 en 1" incluye dos sets de boquillas de 0.2 mm y 0.4 mm y dos depósitos intercambiables de 2 y 5 ml.

Art. 136543

Infinity "2 in 1" Airbrush Aerógrafo Infinity "2 in 1"

The Infinity "2 in 1" is the high-end airbrush for professional fine art application, it not only sets new standards in design, but also offers smart functional possibilities and a more comfortable use. The Quick Fix system allows a very precise paint volume control by means of an engraved scale. Lever resistance is individually adjustable and the open needle cap provides permanent control of the needle's tip. The "2 in 1" includes a Nozzle set of 0.15 mm. and 0.4 mm. and two cups of 2 and 5 ml. and the distance cap.

El Infinity "2 en 1" es un aerógrafo de doble acción de alta tecnología para artistas profesionales. Este aerógrafo no sólo establece un nuevo estándar en diseño, sino que también ofrece funciones inteligentes y excelencia ergonómica. El nuevo gatillo es el más preciso del mercado y posibilita rápidos ajustes y fácil desmontaje, la tensión del gatillo se puede regular mediante una tuerca que se encuentra delante de la palanca de sujeción de la aguja, gracias a la tapa de aguja en forma de V se puede tener una clara visión de la aplicación de color. El "2 en 1" incluye dos sets de boquillas de 0.15 mm. y 0.4 mm. y dos depósitos intercambiables de 2 y 5 ml., una boquilla de distancia.

Art. 26.005

Airbrush Cleaning Pot Estación de limpieza

Glass pot with plastic lid, used to spray-clean airbrush. The airbrush is inserted into the opening of the plastic lid and is cleaned by spraying Airbrush Cleaner, ref. 71.099, or water into the container.

Tarro de cristal con tapa de plástico para la limpieza del aerógrafo. El aire que atraviesa el filtro quedará limpio y el agua sucia se depositará en el tarro. El aerógrafo se introduce en la apertura de la tapa de plástico y se limpia pulverizándolo con Limpiador de Aerógrafo, ref. 71.099, o agua en el interior del tarro.

Color Cases

EN Rigid plastic carrying cases, handy for storage and transportation of 17 ml./0.57 fl.oz. bottles, with varying contents, from 29 colors and a Harder and Steenbeck Ultra 0,2 mm. airbrush to 80 colors and mediums, and including three synthetic paint brushes.

ES Maletines de plástico rígido idóneos para el almacenaje y el transporte de botellas de 17 ml./0.57 fl.oz., con varias opciones de contenido y producto, desde 29 colores con un aerógrafo Harder and Steenbeck Ultra de 0,2 mm., hasta una selección de 80 colores, médiums y 3 pinceles sintéticos.

Hobby Tools

**Highest quality precision tools
for hobby and miniatures**

**Herramientas de precisión de alta
calidad para modelismo y hobby**

EN A wide selection of highest quality precision tools, designed to cover all the needs of modellers and hobby fans. The tools are useful for easy assembly or for the most complicated set up, and are indispensable in all quality modelling projects.

The range includes tools in stainless steel, such as special cutting knives; tools used for sanding and precise manipulation; tools for carving and sculpting; and a superior grade of masking tapes for the most intricate details.

Packaging:

The Vallejo Hobby Tools range is packaged in individual blisters.

ES Selección de herramientas de precisión ideales para cubrir todas las necesidades de modelistas y aficionados al hobby, facilitando tareas simples o complejas con el fin de conseguir acabados de calidad sobre cualquier proyecto.

La gama incluye herramientas esenciales de acero inoxidable, como las especializadas en corte, útiles para el lijado y la manipulación de alta precisión, herramientas de tallado y esculpido o bien cintas de enmascarar muy versátiles de excepcional calidad.

Presentación:

La gama Hobby Tools se presenta en blísters individuales.

Hobby Tools

T01001

Set of 20 Drill Bits, 0.3-1.6 mm.
Set de 20 Minibrocas, 0.3-1.6 mm.

Twenty high speed steel metric drill bits, presented in a sliding top index storage dispenser, excellent for keeping the drills securely in place and dispense one drill at a time.

Set de 20 minibrocas de alta velocidad en acero y medidas métricas indicadas. Incluye estuche con tapa deslizante indicando medida de la broca; excelente para guardar las brocas con seguridad y dispensar la broca seleccionada.

Drill Sizes mm. / Medidas en mm.:
0.30, 0.35, 0.40, 0.45, 0.50, 0.55, 0.60, 0.65, 0.70, 0.75, 0.80, 0.85, 0.90, 0.95, 1.00, 1.20, 1.30, 1.40, 1.50, 1.60.

T01002

Set of 20 Drill Bits, Nº 61-80
Set de 20 Minibrocas, Nº 61-80

Twenty high speed steel drill bits in USA sizes with handy slide-top box that releases only chosen drill bit.

Set de 20 minibrocas de alta velocidad en acero y medidas USA (AWG). Incluye estuche con tapa deslizante, excelente para guardar las brocas con seguridad y dispensar únicamente la broca seleccionada.

Drill numbers / Calibres (AWG):
61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 78, 79, 80.

T02001

Set of 3 Stainless Steel Probes
Set de 3 Curetas Acero Inox.

A selection of 3 quality probes in storage wallet. These precision tools allow controlled scraping, shaping and forming work on models. The three profiles are also particularly useful when applying, spreading and filling materials such as clay, modelling compounds, putty, epoxy and wood filler.

Selección de 3 curetas. Estas herramientas de precisión permiten trabajar con exactitud tallando, modelando o retocando figuras y modelos. Sus tres cabezales son especialmente útiles en las aplicaciones precisas de materiales tales como arcilla, pastas de modelado, masilla, epoxi y relleno de madera o materiales de relleno sobre el modelo.

T02002

Set of 3 Stainless Steel Carvers
Set de 3 Curetas de Acero Inox.

A selection of 3 double ended quality carvers in storage wallet. These precision tools allow controlled carving, shaping and forming work on models prior to casting. The six head profiles are also particularly useful when applying, spreading and smoothing materials such as clay, modelling compounds, putty, epoxy and wood filler.

Selección de 3 curetas con doble cabezal. Estas herramientas de precisión permiten trabajar con exactitud tallando, modelando o retocando figuras y modelos. Sus seis cabezales son especialmente útiles en las aplicaciones precisas de materiales tales como arcilla, pastas de modelado, masilla, epoxi y relleno de madera o materiales de relleno sobre el modelo.

T03001

Set of 10 Needle Files
Set de 10 Limas de Aguja

10 different medium cut files. The medium cut files come in a handy wallet for easy storage. Excellent for general modelling use.

Este set de 10 limas tiene una presentación en estuche que hace más fácil su manipulado y almacenamiento. Excelente para uso en modelismo en general.

T03002

Set of 5 Diamond Files
Set de 5 Limas de Diamante

The diamond needle file set includes 5 profiles, flat, square, round, half round and triangle. These 140mm tools are excellent for precise filing tasks in plastics and metals. Longer lasting and faster working than conventional files. Diamond files stay cooler and do not clog.

El set de limas de aguja de diamante incluye 5 secciones, plana, cuadrada, redonda, media caña y triangular. Estas herramientas de 140mm son excelentes en su función de limados de precisión sobre superficies de plástico o metal. Su capacidad abrasiva y su utilidad práctica son más eficaces que las que podemos encontrar en limas convencionales. Las limas de diamante no se calientan ni embotan su grano.

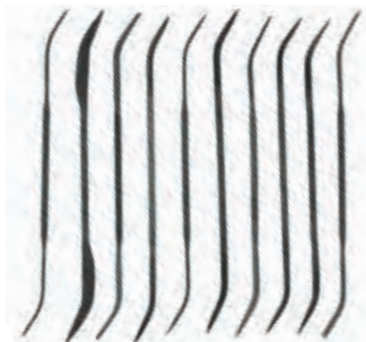

Hobby Tools

T03003

Set of 10 Curved Files

Set de 10 Limas Curvadas

For reaching places not accessible with other needle files. Ideal for working on uneven surfaces. Although these are double ended files, they are still the same size as the needle files and are designed to have a very fine cutting surface with good sharp points. The shapes include flat, curved, round, triangular and knife.

Para trabajar zonas no accesibles con otras limas convencionales. Ideal para utilizarlas sobre superficies irregulares. A pesar de tratarse de un diseño de limas de doble extremo, conservan el tamaño de una lima de aguja convencional y han sido diseñadas para ofrecer una buena superficie de contacto así como puntos de lijado especialmente precisos. Los perfiles incluyen acabado plano, curvado, redondo, triangular y de cuchilla.

T03004

Set of 5 Mini Diamond Files

Set de 5 Mini Limas de Diamante

5 x 100 mm. mini diamond file profiles for working on various shapes and contours. The set includes 5 profiles: flat, square, round, half round and triangle. These tools are excellent for the smaller, more intricate modelling and filing tasks in plastics and metals. Diamond files stay cooler and do not clog.

Set de 5 x 100 mm. mini limas de diamante. Incluye varios perfiles: plano, cuadrado, redondo, media caña y triangular. Estas piezas son excelentes para afrontar trabajos de precisión sobre reducidas superficies, moldeando y lijando las mismas, sean de metal o de plástico. No se calientan con el uso y no se embota el grano.

T06001

Modelling Saw Set with 4 Blades with Scalpel Handle*

Set de 4 Sierras de Modelismo con Mango tipo Escalpelo*

The set includes 4 very fine saw blades (10 thou/0.24mm thick) and scalpel handle. Excellent for intricate sawing and cutting in plastics, wood and photo etched parts. Blades can fit all small size scalpel handles.

El set incluye 4 hojas de sierra ultrafinas de precisión de 10/0.24mm grosor y mango tipo escalpelo. Excelente para cortes de trazo complicado, sobre plástico, madera y latón (fotograbados). Las hojas pueden montarse en todos los soportes de mango tipo cutter o escalpelo.

* Not to be sold to persons under 18 years of age (18+). Keep blade out of reach of children and animals to avoid injury.
* Prohibida su venta a menores de 18 años (18+). Mantener fuera del alcance de niños o animales, puede provocar heridas.

Sets of 5 Blades*

Sets de 5 Cuchillas*

These blades work with various materials such as paper, card, plastic, balsa wood and foil. Can be used for fine cuts, carving and etching, piercing, scoring, scraping, scribing and trimming.

Estas cuchillas son efectivas sobre diversos materiales como papel, cartulinas, plástico, madera de balsa, láminas de aluminios. Se pueden utilizar para cortes precisos, tallado y grabado, perforación, punteados, raspado, corte y recorte.

T06002
#10 Curved blades
#10 Cuchillas curvas

T06003
#11 Fine point blades
#11 Cuchillas de hoja recta

T06004
#17 Chisel Blades
#17 Cuchillas cincel

T06005
#68 Stencil Blades
#68 Cuchillas de recorte

* Not to be sold to persons under 18 years of age (18+). Keep blade out of reach of children and animals to avoid injury.
* Prohibida su venta a menores de 18 años (18+). Mantener fuera del alcance de niños o animales, puede provocar heridas.

T06006

Modelling Knife* N°1

Cutter de Modelismo N°1*

This aluminium handle includes the #11 blade for fine angle cuts, carving, etching, piercing, scoring, scraping, scribing and trimming. The slim handle is easy to grip and allows for complete control when working on various tasks. For model making, military modelling, plastic modelling and any other miniature projects.

De mango torneado en aluminio, incluye cuchilla del N°11, ideal para cortes de precisión, troquelados, grabado, perforación, punteado, raspado, corte y recorte. El mango ha sido diseñado para proporcionar una sujeción firme y permite un control total sobre las múltiples tareas posibles. De uso en modelismo militar, modelismo en plástico y muchos proyectos sobre miniaturas.

* Not to be sold to persons under 18 years of age (18+). Keep blade out of reach of children and animals to avoid injury.
* Prohibida su venta a menores de 18 años (18+). Mantener fuera del alcance de niños o animales, puede provocar heridas.

T06007

Deluxe Modelling Knife N°1*

Cutter Deluxe de Modelismo N°1*

This aluminium soft grip slim handle comes with the #11 blade for fine angle cuts, carving, etching, piercing, scoring, scraping, scribing and trimming. It features an inbuilt magnetic end for safely picking up blades and metal components. Perfect for crafters, hobbyists and professionals looking for control when working on precise tasks.

De mango de aluminio con agarre de silicona suave, viene con hoja del N°11 para cortes de ángulo preciso, tallado y grabado, trazado, perforación, raspado, trazado y recorte. Cuenta con un extremo magnético incorporado para sujetar con seguridad las cuchillas y los componentes metálicos. Perfecto para labores de artesanía, modelistas y profesionales que buscan un control total en sus tareas de precisión.

* Not to be sold to persons under 18 years of age (18+). Keep blade out of reach of children and animals to avoid injury.
* Prohibida su venta a menores de 18 años (18+). Mantener fuera del alcance de niños o animales, puede provocar heridas.

Hobby Tools

Set of 3 Flexi Sanders Dual-Grit

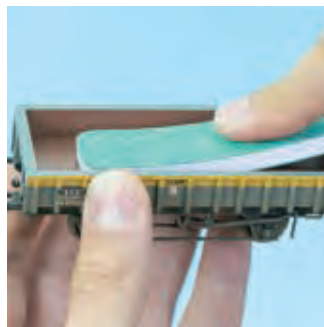

Set de 3 Flexi Sanders, Doble Grano

The flexi sanders come in a set of 3 and are washable and reusable. They offer the following grade combinations:

- Coarse (60/100): Effective material removal.
- Medium (240/400): Blending and smoothing.
- Fine (600/1000): Finishing and polishing.

Set de tres tacos de lija de doble cara, lavables y reutilizables, que ofrece las siguientes combinaciones:

- Grueso (60/100): Para eliminar material de forma efectiva.
- Medio (240/400): Para suavizar y uniformar.
- Fino (600/1000): Para acabados y pulidos.

T09001

Spin Top Pin Vice Double Ended Portabrocas Manual Doble

Handy holder for drills, taps, pins and other tools. Includes: 2 reversible collets with capacities 0 to 1.2 mm., 1.3 to 2.4 mm., 0.8 to 2.0 mm. and 1.8 to 2.9 mm. Incorporating swivel head for comfort and efficiency.

Portabrocas manual de doble cabezal para perforar, taladrar y marcar superficies. Incluye: 2 soportes reversibles de 0 a 1.2 mm., de 1.3 a 2.4 mm., de 0.8 a 2.0 mm. y de 1.8 a 2.9 mm. Cabezal giratorio para una mayor comodidad de uso y precisión.

T10001

Scriber Grabador

Basic single ended scriber for marking and scraping. This precision scriber is designed for the modelling enthusiast. It is ideal for marking out in confined spaces, particularly on pre-machined work pieces. Also good for scraping tasks.

Punzón de punta simple para marcar y grabar. Este grabador de precisión está diseñado para los entusiastas del modelismo. Es ideal para trabajar en espacios reducidos, especialmente sobre piezas pre-mecanizadas. También resulta de utilidad en tareas de raspado.

Hobby Tools

T08001

Sprue & Photo Etch Cutter *Alicates de Corte*

This flush cutter is perfectly designed for precise and intricate cuts in compact places. Excellent for flush cuts in thin wire, photo-etched parts, soft metal and plastic. For general hobby and modelling applications.

Esta herramienta de corte está perfectamente diseñada para ofrecer cortes precisos y definidos. Excelente para cortes de precisión sobre alambre, partes de fotograbado, metal blando y plástico. Para uso general en hobby y modelismo.

T12002

Pick Up Tool *Herramienta Pick & Place*

A pick up tool especially designed to accurately pick up and place small components, with an impregnated silicone tip to aid adhesion. For plastic model components, decals and other small components.

Esta herramienta está especialmente diseñada con una punta de silicona adherente para manipular y ubicar pequeñas piezas y componentes de modelismo o miniaturas. Para pequeñas piezas en plástico, calcas y otros elementos de reducido tamaño.

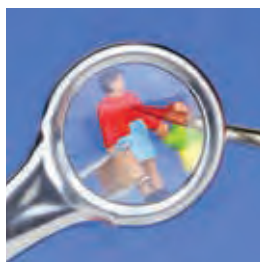

T12001

Tweezers with Magnifier *Pinzas con Lupa*

Super fine tweezers with magnification of 1.75x are ideal for picking, holding and viewing very small parts and components. Also useful for removing tiny splinters and threading needles.

Estas pinzas de alta precisión con lupa de 1.75x aumentos, son ideales para sujetar, manipular y observar piezas de tamaño reducido y partes minúsculas. También son útiles para retirar pequeñas astillas o tornillos de aguja.

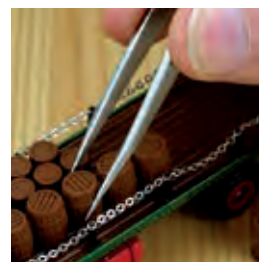

T12003

Fine Tweezers *Pinzas de Precisión de Punta Recta*

Fine tweezers, ideal for picking, holding and placing very small parts and components with great accuracy.

Estas pinzas finas son ideales para manejar, sujetar y colocar piezas y componentes muy pequeños con gran precisión.

T12004

Extra Fine Curved Tweezers *Pinzas de Precisión de Punta Curva*

Extra fine curved tweezers, ideal for reaching into awkward areas, picking, holding and placing very small parts and components with great accuracy.

Pinzas finas curvadas, ideales para manejar, sujetar y colocar piezas y componentes muy pequeños con gran precisión incluso en zonas de difícil acceso.

T11001

Plastic Modelling Tool Set *Set de Herramientas Básicas*

A set for plastic modelling, military modelling and other hobby applications. Includes: plastic sprue cutter, knife N°1, #11 blades (x5), cutting mat and flat file.

Set de herramientas básicas para modelismo en plástico y modelismo militar. Incluye: alicates de corte, cutter N°1, #11 cuchillas (x5), superficie de corte y lima plana.

FC Modeltips

A book focused on easy tips and tricks for modelling paint techniques that can be as handy for beginners as for experienced modellers, saving time in the painting and weathering processes, and getting the most professional and realistic results.

In discussions with other modellers, we almost always arrive at the same question: how many models can you finish in a year? Some mention the time needed to finish just a few models per year, others talk about the several months invested just to see one model completed, but most of them were talking about the difficulty of a complete and complex weathering process, the many hours invested in looking for the real finish, the real final effects.

The intention of this book is to share with other modellers a collection of very easy techniques, some useful and well known, some completely original, all with the purpose of making the process of painting and weathering a model easier and faster, and above all, enjoyable, so that the modeller can go on to the next project, just for fun, just for the joy of modelling, the pleasure of achieving the most realistic replica of the original in its place and time.

120 pages.

Art. 75.002

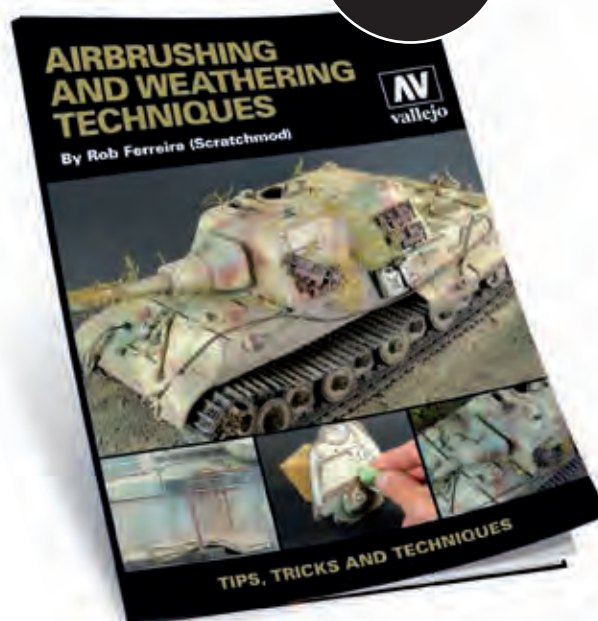

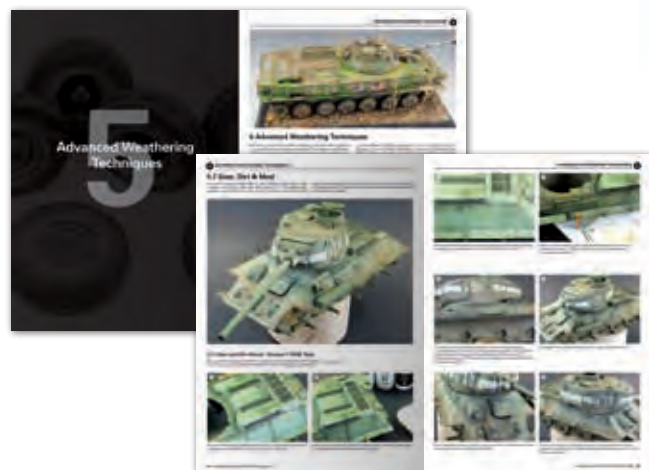

Airbrushing and Weathering Techniques by Rob Ferreira (Scratchmod)

Times have changed in the hobby of model building and painting, most modellers are now starting out using only water-based acrylics. This guide covers the uses of acrylic colors, with the focus mainly on Acrylicos Vallejo, pioneers in this field.

The intention is to share the experience in using acrylics with all model painters, whether they are just starting out or switching over from solvent based paints.

The information in this book is the result of nearly twenty years working with Vallejo acrylic colors and auxiliary products and is meant to be used as a guide and reference.

Painting Miniatures from A to Z Masterclass (Vol. 1) by Ángel Giráldez

We are pleased to announce that we are reprinting Ángel Giráldez's book "Painting Miniatures from A to Z", after the tremendous success of the first editions.

The book shows the painting methods which, over the years, have helped Ángel bring Infinity's miniature range to life.

This manual describes, in meticulously detailed step-by-step tutorials accompanied by hundreds of full-color pictures, how to apply Ángel's techniques to some of the most outstanding miniatures of the Infinity range. 120 pages.

Painting Miniatures from A to Z Masterclass (Vol. 2) by Ángel Giráldez

Ángel Giráldez's second Vallejo figure painting manual, Painting Miniatures from A to Z (Masterclass Volume 2), complementary to the first volume.

This volume explains new techniques and tips through hundreds of pictures of the painting process, which will help painters to continually improve their miniature painting skills.

The Masterclasses section includes tutorial guides on how to paint all the different Infinity armies, in addition to detailing which colors Ángel used to paint the official Infinity color patterns.

If you are a fan of the Infinity universe, or if you are a painter who wants to improve, then this volume will be an invaluable resource.

So take your paints and brushes, and enjoy alongside Ángel this new step forward in the hobby world of miniature painting. 154 pages.

Civil Vehicles

Civilian trucks and other civilian equipment have a much longer lifetime than military equipment, and are therefore much more subject to the influence of the natural effects of dust, dirt, and of course rust. In this book Eugene Tur shows the complete step by step weathering of 7 vehicles. 120 color pages.

Warpaint Armour 1: Armour of the Eastern Front 1941-1945

"Armour of the Eastern Front 1941-1945" is the first in the new series by Guideline License Publications and the team that brings you Military Modelcraft International in collaboration with Acrylicos Vallejo.

The publication examines some of the AFVs that shaped the war on the Eastern Front during World War II – or the "Great Patriotic War" as it is remembered in Russia – which was a titanic conflict and the greatest clash of arms in history.

The subjects have been chosen with the modeler in mind and each article provides both reference and inspiration using authoritative text, archival and walkaround photos as well as specially commissioned colour profiles. 84 pages.

HOW TO USE Metal Color

Metal Color is a water-based metallic color range, especially designed for airbrush techniques. The range also includes a Gloss Black Primer and a Gloss Metal Varnish.

Metal Color es un gama de colores metálicos a base de agua especialmente diseñados para aerógrafo. La gama también incluye Imprimación Negro Brillante y un Barniz Metálico Brillante.

by José Brito

- 1** Some plastic parts from a gladiator figure are prepared for painting with Metal Colors. The approach is always the same. The parts are airbrushed with Gloss Black 77.660 Surface Primer..

Vamos a pintar algunas partes de la figura de un gladiador con Metal Color. Aplicamos con aerógrafo una capa de Imprimación Negro Brillante 77.660..

- 2** Once the parts are well dry, the sword was airbrushed with Steel 77.712 and highlighted with Aluminium 77.701.

Una vez seca la imprimación, con el aerógrafo pintamos la espada con Acero 77.712 y después la iluminamos con Aluminio 77.701.

- 3** The helmet was airbrushed with Copper 77.710. Small details can also be applied by brush. In this case small details are brush painted with Gold 77.725.

A continuación, pintamos el casco con Cobre 77.710. Los pequeños detalles se pueden repasar con pincel. En este caso pintamos algunos detalles con Oro 77.725.

- 4** The shield was masked and the metal parts airbrushed with Gloss Black 77.660 Surface Primer.

Añadimos cinta de enmascarar para proteger algunas zonas del escudo y aplicamos una capa de Imprimación Negro Brillante 77.660.

- 5** Once Gloss Black 77.660 is well dry, the desired parts were airbrushed with Gold 77.725.

Una vez seco, aplicamos Oro 77.725 sobre las zonas deseadas.

- 6** Once the paint has dried, the masking tape was removed. Now the shield is ready for the weathering final steps.

Retiramos la cinta de enmascarar dejando el escudo listo para los siguientes pasos de pintura y envejecido.

- 7** The Metal Color range looks amazing and the colors are very vivid. They can be easily and safely weathered in acrylics or enamels. The final results are stunning.

Los colores de la gama Metal Color son muy luminosos y con un acabado asombroso. Pueden soportar perfectamente los procesos posteriores de envejecido con acrílicos o esmaltes.

- 8** The base finished.
La base terminada.

HOW TO USE

Black Lava Asphalt

26.214 Black Lava-Asphalt has a thick and dense consistency, appropriate for volcanic grounds and for asphalt on roads and construction sites.

26.214 Lava Negra-Asfalto es una textura de color negro intenso y de consistencia densa y espesa. Aplicado con espátula reproduce la textura de asfalto de las carreteras y superficies volcánicas.

by José Brito

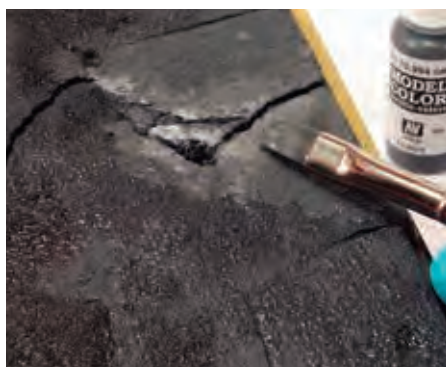

1 A heat isolation foam sheet is cut into the desired size, framed and some damage is carved into the surface. 26.214 Black Lava Asphalt is applied with a spatula. Water can be used as thinner and in order to improve the flow. Let it dry for about 24 hours.
Sobre un marco de foto ajustamos una pieza de espuma. Podemos realizamos cortes y agujeros sobre la superficie. Aplicamos con una espátula textura de Asfalto sobre la superficie. Podemos diluir la textura con agua para aumentar la fluidez. La dejamos secar unas 24 horas.

2 Some road patches can be added with 26.213 Rough Grey Pumice. A frame is made with Masking Tape and the paste applied with the help of a spatula. Let the paste dry for about 24 hours and remove the masking tape.
Podemos añadir algunos parches con 26.213 Piedra Pómez Gruesa. Con cinta de enmascarar protegemos y enmarcamos la zona que queremos aplicar la textura. La dejamos secar unas 24 horas y retiramos la cinta.

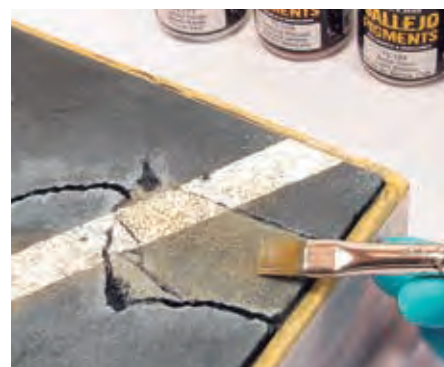

3 Once the paste applied previously is well dry, a coat of 70.994 Dark Grey is brushed over the entire base. Several layers can be applied. Let each layer dry for about 12 hours.
Una vez seco pintamos la superficie con 70.994 Gris Oscuro. Podemos aplicar varias capas y la dejamos secar unas 12 horas.

4 Next step is adding color variation to our asphalt base. For that 70.994 Dark Grey is mixed with 70.990 Light Grey. Combining the two colors we will achieve an infinite number of grey tones. This will add an extra touch of accuracy to our project.
Aplicaremos una variación de colores sobre la textura de asfalto. Usaremos 70.994 Gris Oscuro mezclado con 70.990 Gris Claro. Con esta mezcla de colores lograremos una gran variedad de grises. Esto añadirá al diorama un acabado más realista.

5 A white line of pavement is easily achieved by applying two strips of Masking Tape and then applying 70.918 Ivory, with the help of a sponge (inserted into a plastic tube, for a better hold). With the sponge we can achieve a more random look.
Con una esponja pintamos con 70.918 Hueso una línea blanca sobre el asfalto (para sujetarla mejor la colocamos en un tubo o la sujetamos con unas pinzas). Con esta técnica conseguiremos un acabado más aleatorio.

6 Several Pigment colors are mixed with each other and applied with the help of a medium size flat brush. The pigments are thinned with 71.061 Airbrush Thinner and applied heavily thinned. Let them dry for about 24 hours.
Con un pincel plano aplicamos un surtido de pigmentos sobre el asfalto. Los pigmentos son mezclados con 71.061 Diluyente de Aerógrafo y los aplicamos muy diluidos. Lo dejamos secar unas 24 horas.

7 Once the pigments are well dry, we can remove the excess with the help of a sponge moistened in water. We pass the sponge over the entire base and the pigments, over the raised parts, are easily removed. Only the pigments in the recessed parts remain.
Una vez seco, podemos retirar el exceso de pigmento con una esponja humedecida. Solamente quedará el pigmento entre los huecos y agujeros del asfalto.

8 The base finished. The color variation is very subtle but works perfectly and our asphalt base is fully realistic. The combination of model paints and pigments really brings our project into life.
La base terminada, donde se aprecian las variaciones de color sobre el asfalto. La combinación de pintura y pigmentos proporciona un acabado realista al diorama.

HOW TO USE Chipping Medium

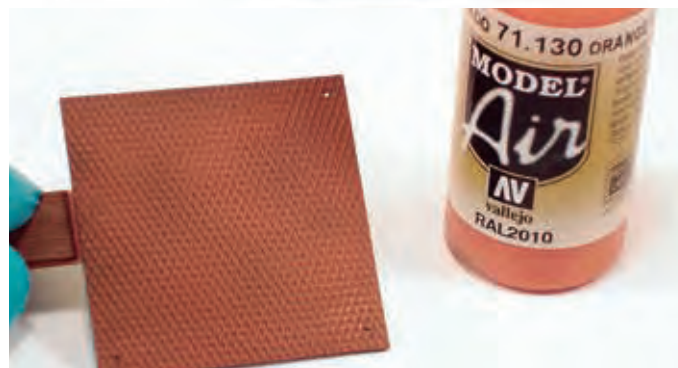

76.550 Chipping Medium is a water-based medium to create flaked paint, scratches and chipped paint. Can be applied with airbrush or brush to create chipping effects with acrylic colors.

76.550 Chipping Medium es un medium acrílico para crear roces, desgastes y desconchados. Se aplica con aerógrafo o pincel creando así los efectos de desconchados con colores acrílicos.

by José Brito

- 1 The parts of the model are primed with Surface Primer 70.605 German Red Brown. Las piezas se impriman con Surface Primer 70.605 Rotbraun RAL8012.

- 2 Once the primer has dried completely, the model is painted in 71.129 Light Rust and 71.130 Orange Rust. Both colors are ideal for representing the rust underneath the final paint layer. Una vez la imprimación está seca, pintamos con 71.129 Óxido Claro y 71.130 Óxido Anaranjado. Ambos colores son ideales para crear el óxido.

- 3 When the rust colors have dried completely, a coat of 76.550 Chipping Medium is applied. This product, a water based solution, slows down the drying of the next, final color. The Chipping Medium must be allowed to dry for about 30 minutes. Una vez seco, aerografamos las piezas con 76.550 Chipping Medium. El producto es de base agua y se puede usar directamente. Puede ser aplicado con aerógrafo y pincel. Una vez aplicado, debemos dejarlo secar unos 30 minutos.

- 4 Once the Chipping Medium is has dried, the top color will be applied on the model. In this case the parts are painted with 71.008 Blue. When dry, this color will be scratched to show the rust underneath. Aplicamos 71.008 Azul sobre las piezas. Este será el color final y la capa donde se aplicará el desconchado, mostrando los tonos de óxido de la capa inferior.

- 5 Due to the application of the Chipping Medium, the top layer of 71.008 Blue dries more slowly and can be easily scratched or peeled and flaked off with a tooth pick or other sharp object. Para realizar los desconchones necesitaremos agua, pinceles. También podemos usar palillos, agujas. Las piezas son humedecidas con agua y suavemente empezamos a pelar la última capa de pintura.

- 6 When the chipping has been completed, a final application of protective varnish can be airbrushed to protect the model before the weathering process. Con estos simples consejos podemos lograr un asombroso acabado y dejaremos las piezas listas para el proceso de envejecido.

HOW TO USE Splash Mud

The range includes six different kinds of mud available in 40 ml./1.35 fl.oz. pots, manufactured with natural pigments and waterbased acrylic resins, which dry to a slightly glossy finish, suggesting the humid nature of the products.

La gama consta de seis referencias disponibles en frascos de 40 ml./1.35 fl.oz. que reproducen los tonos de barro. Fabricados con pigmentos naturales y resinas acrílicas. Con un acabado ligeramente brillante, sugiriendo la naturaleza húmeda de los productos.

by José Brito

- 1** For this project we will use a picture frame and a piece of heat isolation foam.

Para este proyecto usaremos un marco de foto y espuma de poliestireno.

- 2** We recommend to place the colors in a wet palette. Being acrylic based, the wet palette will keep the colors ready to use for a few days. Airbrush Thinner can be used as thinner in order to increase the flow and transparency. The colors can be mixed each other. Recomendamos colocar los colores sobre una paleta húmeda, así podremos usarlos durante días. Airbrush Thinner puede usarse como diluyente para aumentar la fluidez y transparencia. Los tonos se pueden mezclar entre sí.

- 3** Once the base is painted we can start applying Splash Mud. It is really easy to apply. In this case, we are projecting the mud unto the desired spots. All we need is a toothpick and a medium size round brush.

Una vez la base está pintada podemos empezar a aplicar Splash Mud. Es muy fácil de usar, en este caso con un pincel y un palillo creamos salpicaduras en las zonas deseadas.

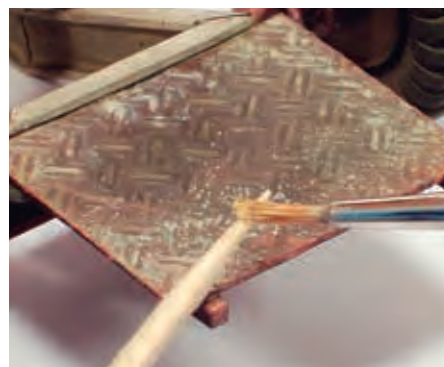

- 4** The same approach can be used to apply Splash Mud unto a vehicle, combining several colors we will reach a stunning realistic effect.

Podemos usar el mismo método sobre un vehículo y combinando difentes tonos conseguiremos efectos más realistas.

- 5** Splash Mud can also be used as a thinned paint. All we have to do is add some Airbrush Thinner to Splash Mud and start applying it as a normal paint. The flow and control is really great and we can reach all areas. Applying several layers will add an extra touch of realism to our model.

Splash Mud también puede usarse como pintura diluida. Añadiendo Airbrush Thinner al color y aplicándolo como una pintura normal. La fluidez y el control es muy bueno pudiendo alcanzar todas las zonas. Aplicando varias capas lograremos añadir más realismo a nuestra maqueta.

- 6** The final steps to portray projected mud are made with the help of a toothpick and a medium size round brush. Simple and very effective.

Con la ayuda de un palillo y un pincel crearemos salpicaduras de barro sobre nuestra maqueta. Es un proceso muy sencillo y efectivo.

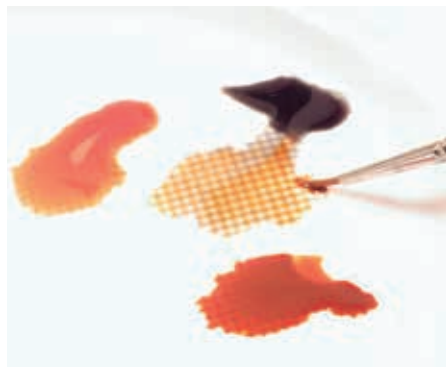

HOW TO USE Engine

Engine Effects offers the modeller a series of references to reproduce the fuel stains, the spilled oil (leaving a trail of drops on the vehicle panels and in the dust of the road), the marks left by the oil drums on the floor of the truck, the dirt accumulated in the engine compartment, all these to enhance the realistic aspect of the model. Engine Effects is available in 40 ml./1.35 fl.oz. pots.

Engine Effects ofrece al modelista una serie de referencias para reproducir las manchas de combustible, el aceite derramado (dejando un rastro de gotas sobre las planchas del carro o en el polvo del camino), las marcas en la caja del camión de los bidones cargados de petróleo, y la suciedad acumulada en el compartimento motor, para aportar el toque de realismo adecuado al modelo. Engine Effects está disponible en frascos de 40 ml./1.35 fl.oz.

by José Brito

- 1** Engine colors can be mixed with all the other Acrylics Vallejo products to get an infinite range of tons.
Los colores Engine pueden mezclarse con otros productos acrílicos de la gama vallejo, así podrás conseguir infinitud de tonos.

- 2** Urban stuff like decayed air conditioning devices are easily weathered by applying several Engine colors on the desired spots.
Elementos urbanos, como una aire acondicionado son fácilmente envejecidos aplicando varios tonos de los colores Engine sobre las zonas deseadas.

- 3** Drums are also brought to life with some simple steps. Just apply some Engine colors over already weathered items and we immediately get an ultra-accurate look.
Envejecemos los bidones con unos sencillos pasos. Simplemente aplicando los tonos Engine sobre los objetos previamente envejecidos.

- 4** Same thing for some modern eco stations and around the trash. The brightness of the Engine colors is a great solution to represent the dirt and grease.
Realizamos el mismo paso para otros elementos urbanos. La luminosidad de los colores Engine son perfectos para crear los efectos de suciedad y grasa.

- 5** Once the engines are painted we can easily apply the Engine colors. Combining several colors we can achieve an ultra-realistic look. We can make oil streaks, fuel splashes, etc.
Una vez pintados los motores podemos fácilmente aplicar la gama de colores Engine. Podemos combinar varios colores y conseguir unos efectos realistas. Podemos crear manchas de aceite, salpicaduras de gasolina, etc.

- 6** The underside of a model car can be treated in the same way. With a fine round brush we apply the Engine colors in the desired spots.
La parte de abajo del coche es pintada de la misma forma. Con un pincel fino aplicamos los colores Engine en las zonas deseadas.

- 7** Plane parts, like wheels, propellers, and engines received the same treatment. A fine round brush is used to apply the Engine colors around the recessed and raised parts.
Usaremos el mismo método para diferentes partes de aviones, como ruedas, hélices y motores. Con un pincel de punta redonda aplicaremos los colores Engine alrededor de los huecos y zonas más expuestas.

HOW TO USE Mud Effects

Use the Weathering Effects products for creating built up mud on my Berge Tiger. The model is to be depicted as being stuck in thick deep mud which has buried the tank's suspension in the muck up to the hull.

En este tutorial enseñaremos como he usado la gama Weathering Effects para crear los efectos de barro sobre mi Berge Tiger. Representaremos el tanque atascado en el barro denso.

by Scratchmod

- 1 I have mixed the three Environment products with small amounts of the pigments to a consistency and color I was happy with.
Mezclamos los tres productos con pequeñas cantidades de pigmentos para obtener el color y consistencia deseada.

- 2 Using an old brush the mud was applied onto the lower hull and wheels. I went ahead and applied full coverage to avoid any bare spots that may end up being seen if viewed from a certain angle.
Usamos un pincel viejo y aplicamos el producto sobre la parte inferior y el casco del tanque. Aplicamos una capa gruesa evitando así zonas descubiertas que puedan ser vistas desde otros ángulos.

- 3 To create small mud splatters or splashes I used 73.802 Russian Splash mud. I placed small amounts of this product as splattered mud on the front and rear of the model.
Para crear salpicaduras usamos 73.802 Russian Splash Mud. Aplicamos pequeñas cantidades de producto sobre la maqueta y creamos salpicaduras en la parte frontal y trasera del tanque.

- 4 After allowing the applied mud effects to dry and start to cure an hour or two I then mounted the tank tracks on to the model.
Una vez seco montamos las cadenas del tanque y lo presentamos sobre la base del diorama.

- 5 To start the build up of mud on the tracks I first applied 73.826 Mud and Grass. And allowed this to start to dry. Aplicamos 73.826 Mud and Grass para crear el efecto de acumulación de barro sobre las cadenas.

- 6 While the Mud and Grass was drying I then made a mud mixed as I did for the hull and wheels. This was then applied and blended into the previously applied Mud and Grass.
Mientras que 73.826 Mud and Grass se este secando repetimos la mezcla del paso 2 y la aplicamos sobre la capa de Mud and Grass.

- 7 Before the mud had dried I added some roots to the still wet mud effects. The model was then set aside to allow all the mud effects to fully dry and cure for a couple of hours. These acrylic products dry very fast and are rock hard when dry and cured.
Antes de que el barro seque añadimos algunas raíces sobre el barro húmedo. Una vez seco, el barro quedará bien fijado a las cadenas.

- 8 Some items that will be used for the base and to replicate thick wet earth and mud: some roots, some grass tufts, sifted dirt, small pebbles and some dry coarse material ground-up from a piece of ceiling tile.
Podemos usar algunos complementos como raíces, piedras y hierba para crear un escenario más realista.

HOW TO USE Liquid Mask

70.523 Liquid Mask, a water-based medium, is employed to form a protective film on areas which are to remain unpainted. Masking is especially useful in airbrush techniques, but also employed with watercolors and temperas.

70.523 Máscara Líquida es un medium de base agua, empleado para formar una capa protectora en las zonas que no queremos pintar. Es especialmente útil para técnicas de aerografía, pero también se usa en acuarelas o témperas.

by Lothar Limprecht

- 1** Pour a drop of well-shaken Liquid Mask into a small container and stir before using. Avoid bubbles.
Agitamos bien el bote y ponemos la cantidad deseada de Máscara Líquida en un recipiente evitando las burbujas.

- 2** Cover the area to be masked and apply Liquid Mask with a brush, working from the center to outer edge.
Aplicamos Máscara Líquida sobre la zona que no queremos que se cubra con pintura.

- 3** It may be useful to rotate the model and to allow the Liquid Mask to spread evenly.
Puede ser útil girar la maqueta y dejar que la Máscara Líquida se expanda uniformemente sobre la superficie.

- 4** A second coating of Liquid Mask can be applied, especially on straight edged areas. If too much masking fluid has been applied, it will extend to form a layer which is too thick and difficult to remove.
Podemos aplicar una segunda capa, especialmente sobre los bordes. Si aplicamos mucha Máscara Líquida se formará una capa muy gruesa y puede ser difícil retirarla.

- 5** Use a sharp piece of wood to remove excess Liquid Mask, and wipe off surplus fluid on a paper towel.
Usamos un palo de madera con punta para retirar el exceso de producto y el líquido sobrante con una servilleta de papel.

- 6** To avoid any damage to the model during the removal process, I carved along the edges of the masked areas with the point of a sharp knife.
Para evitar daños al retirar la máscara podemos perfilar ligeramente con un cúter sobre los extremos.

- 7** A wooden stick with a flat edged tip is ideal for removing the dried masking agent, working carefully and with little pressure to keep the windows free of scratches. Finally Liquid Mask has been removed completely.
Un palillo de madera es ideal para retirar la Máscara Líquida. Para evitar las rayaduras en las ventanas trabajamos cuidadosamente y con poca presión.

- 8** The vehicle finished.
El vehículo terminado.

Health & Safety/Salud y seguridad

EN REACH

Vallejo is compliant with REACH regulations. REACH is a European Community Regulation on chemicals and their safe use. It deals with the Registration, Evaluation, Authorization and Restriction of Chemical substances. The law entered into force on 1 June 2007.

The aim of REACH is to improve the protection of human health and the environment through better and earlier identification of the intrinsic properties of chemical substances. One of the main reasons for developing and adopting the REACH Regulation was that a large number of substances have been manufactured and placed on the market in Europe for many years, sometimes in very high amounts, and yet there is insufficient information on the hazards that they pose to human health and the environment. There is a need to fill these information gaps to ensure that industry is able to assess hazards and risks of the substances, and to identify and implement the risk management measures to protect humans and the environment.

ASTM D-4236 CERTIFIED

The USA certification ASTM D-4236* Standard Practice for Labeling Art Materials for Chronic Health Hazards describes the standard procedure for developing precautionary labels for art materials in case of chronic health hazards and provides precautionary statements based on knowledge that exists in the scientific and medical communities. These statements concern hazards known to be associated with a product or product component(s) when it is present in a physical form, volume, or concentration that in the opinion of a toxicologist has the potential to produce a chronic adverse health effect. This practice applies exclusively to art materials packaged in sizes intended for individual users of any age or those participating in a small group, and does not apply to products appropriately labeled for known chronic health hazards. Also, this practice does not specify test methods for determining whether a substance or product presents adverse chronic health effects.

Labels should include the signal word WARNING, list of potentially chronic hazards, name of chronically hazardous component(s), safe handling instructions, list of sensitizing components, information sources, labeling content and product size, and other supplementary information. (ASTM International, known until 2001 as the American Society for Testing and Materials, is an international standards organization that develops and publishes voluntary consensus technical standards).

* To obtain the ASTM certification, the manufacturer presents the formulation of the products in question to an accredited toxicologist, who after careful study of the ingredients of each color provides the documentation which informs of the warning, if applicable, that each of the product labels should provide.

ES REACH

Vallejo cumple con la normativa REACH, que es un reglamento de la Comunidad Europea que entró en vigor el 1 de junio de 2007 para regular el uso de sustancias químicas. El Protocolo REACH ha sido descrito como la más compleja legislación de la Unión Europea y la más importante en los últimos 20 años puesto que regula el registro, evaluación y autorización o restricción de las sustancias y preparados químicos con el objetivo de garantizar el más elevado nivel de protección al usuario y al medio ambiente. El propósito de REACH es mejorar la protección de la salud del usuario y del medio ambiente mediante una identificación mejor y más temprana de las propiedades intrínsecas de las sustancias químicas. Una de las principales razones para desarrollar y adoptar el reglamento REACH ha sido que durante muchos años se han estado fabricando y distribuyendo en el mercado europeo una gran cantidad de productos de los cuales todavía no hay información suficiente sobre los peligros que pueden representar para la salud del usuario y el medio ambiente.

CONFORMES A ASTM D-4236

Las siglas ASTM corresponden a la American Society for Testing and Materials. La norma ASTM D-4236* describe el procedimiento estándar a seguir en la información que el fabricante debe facilitar en la etiqueta del producto con el fin de advertir, mediante frases de precaución o advertencia, del posible riesgo para la salud del usuario. Estos documentos se refieren a los riesgos que se sabe que están asociados a un producto, o a uno o varios de sus componentes, cuando éste se encuentre presente en una forma física, volumen o concentración que en opinión de los toxicólogos pudiera llegar a ser causante de algún efecto crónico perjudicial para la salud. Este procedimiento afecta exclusivamente a los materiales de arte destinados a la venta a particulares de cualquier edad y es de aplicación a los productos que hayan sido etiquetados específicamente como causantes reconocidos de efectos crónicos perjudiciales para la salud.

Además, esta práctica no especifica los métodos de análisis utilizados para determinar si una sustancia o producto puede producir efectos crónicos perjudiciales para la salud. Las etiquetas deberán incluir la indicación ADVERTENCIA, una lista de los riesgos potencialmente crónicos, el nombre del componente o componentes peligrosos, instrucciones para su manipulación segura, una lista de componentes sensibilizadores, las fuentes de información, el contenido nominal y cantidad del producto, así como cualquier otra información complementaria.

* Para obtener dicha certificación es necesario facilitar las formulaciones de nuestros colores a un toxicólogo acreditado por la organización ASTM para que éste, tras un pormenorizado estudio de los ingredientes de cada uno de los colores, redacte un documento en el cual informa de las frases de advertencia que debe portar cada una de las etiquetas.

Health & Safety/Salud y seguridad

EN Color Index

The pigments used to create colors for artists can be inorganic or organic. The inorganic pigments have been used since antiquity; most of them are extracted from minerals and soil, such as natural earth colors, siennas and ocre. Titanium, carbon and ultramarine pigments also belong to this category, as well as cobalt and cadmium. Many of these pigments are now also manufactured synthetically. Organic pigments have their origins in the 19th century. Industrial production developed at the beginning of the twentieth century owing to new manufacturing processes in organic chemistry. These synthetic pigments have become an important group in the manufacture of colors for artists, producing bright and luminous shades of great intensity and excellent light fastness and permanence. The range has extended continuously and now, besides the familiar phthalocyanines and naphthols, includes azo compounds, dioxacines and pyrroles, anthraquinones and quinacridones.

ES Color Index

Los pigmentos empleados son tanto inorgánicos como orgánicos. Los inorgánicos han sido utilizados desde la antigüedad y la gran mayoría proceden o se extraen de minerales y arcillas, como las tierras naturales, sienas, y ocre. También los pigmentos de titanio, carbón, azul ultramar, cobaltos y cadmios pertenecen a esta categoría. Muchos de ellos son sintetizados actualmente en procesos industriales. Los pigmentos orgánicos son más modernos, se desarrollan a principios del siglo XX gracias a los nuevos métodos de síntesis en Química Orgánica. Estos pigmentos sintéticos son ahora un grupo muy importante en la fabricación de colores para artistas, produciendo tonos brillantes e luminosos de una intensidad extraordinaria con una estabilidad y permanencia excelente. La gama de pigmentos orgánicos es actualmente muy extensa y abarca desde pigmentos azoicos, azules, verdes ftalocianinas, dioxacinas, piroles, antraquinonas, quinacridonas, etc.

Symbols/Símbolos

The symbols below are printed on different products following the rules of dangerous substances, in order to protect the user.

Los siguientes símbolos se hallan en diferentes productos destinados a la advertencia y protección del usuario siguiendo las normativas de sustancias peligrosas.

FLAMMABLE (F)
INFLAMABLE (F)
Indicates that the product is easily set alight.
Indica que el producto es fácilmente inflamable.

EXCLAMATION SYMBOL
SÍMBOLO EXCLAMACION
Indicates that the product is irritating.
Este símbolo indica que el producto es irritante.

TRIANGLE
TRIÁNGULO
A raised triangle on the label, as a tactile warning for blind people that the material might have a certain risk.
Un triángulo saliente en la etiqueta es una advertencia táctil para personas ciegas que indica que el material puede tener cierto riesgo.
